## 'New federalism'

### Reagan promises better times

WASHINGTON (AP) — President Reagan asked Congress last night to join in "a single, bold stroke" by transferring \$47 billion worth of federal social programs — and the taxes to pay for them — from Washington to state and local governments.

He said his plan, including the gradual shift over the next decade of the welfare and food-stamp programs, is designed "to make government again accountable to the people, to make our system of federalism work again."

It was the centerpiece proposal in a State of the Union message that promised better times, "much better," if the nation continues on his course of budget and tax reductions as the cure for recession and inflation.

Reagan declared he will "seek no tax increases this year and I have no intention of retreating from our

basic program of tax relief."

"I will not ask you to try to balance the budget on the backs of the American taxpayers," he said in the speech, scheduled for delivery at 9 p.m. EST.

He vowed to the joint session of Congress and a nationwide broadcast audience to "put the economy out of its slump and put us on the road to prosperity."

Reagan said that the fiscal 1983 federal budget deficit will be less than \$100 billion and that "the policies we have in place will reduce the deficit steadily, surely and, in time, completely."

The president, describing his program as "a bold and spirited initiative that I believe can change the face of American government," outlined a second-year economic program in which his goal of turning many federal chores over to the states plays a central role.

At the same time, he defended his decision not to try to stem a ballooning federal deficit by increasing taxes.

"Higher taxes would not mean lower deficits," the president said. "Raising taxes won't balance the budget."

Reagan said that a "grass-roots trust fund," filled by federal revenues, would distribute \$28 billion a year to the 50 states to pay for the additional responsibilities handed over to them.

"The economy will face difficult moments in the months ahead," Reagan stated. "But, the program for economic recovery that is in place will pull the economy out of its slump and put us on the road to prosperity and stable growth by the latter half of this year."

Reviewing his first year in office, the president said, "We have made a new beginning, but we have only begun."

He said that had he not pursued a policy of tax and spending cuts, "things would be far worse for all

## HPC discusses graft, meeting with Provost

By AMY BRECOUNT  
News Staff

Accusations that Pangborn food sales managers committed graft and an agreement by Provost Timothy O'Meara to attend a March session highlighted last night's meeting of the Hall President's Council.

The president of Pangborn described the problems with food sales, speculating that the managers had been reporting smaller profits than were actually being made. The managers had been contracted to turn over 50 percent of their profits along with a rental fee. Hall presidents admitted the difficulty of supervising food sales, suggesting alternative methods which include requiring the rector's signature on all checks.

In other business, Dr. O'Meara agreed to attend the first H.P.C. meeting in March to discuss the recent failure of the keg policy and the lack of communication between the student body and the administration.

Andy Tucker from Ombudsman announced the extension of the deadline to pick up petitions for the student senate. The poor turnout from all districts made this extension necessary. Petitions can be picked up today in the O.B.U.D. office before 5 p.m. and must be returned tomorrow.

The H.P.C. also announced that An Tostal will be held April 20-24. Hall presidents will try to schedule formals around these dates. The council members were asked to fill out surveys about each hall's study lounges. The library is analyzing the need for permanently extended hours similar to those during exam periods.

## 'Damaging testimony'

### Teen links Williams, slain youth

ATLANTA (AP) — A black teenager testified as a surprise witness Tuesday that Wayne B. Williams lured him into a car and sexually fondled him. He also said he once saw Williams get into a car with a youth who was later slain.

It was the most damaging testimony to the defense yet at Williams' murder trial, now in its fifth week.

The witness, who was not identified, said he saw Williams and Lubie Geter, 14, get into a car sometime during the first weekend in January 1981. Geter is believed to have disappeared on Jan. 2 and was found slain a month later.

The youth also said Williams was the man who approached him in the same area of south Atlanta in August 1980, invited him into a car and fondled his sex organ.

"I can't forget his face," the witness said. "I remember his face, I wake up and dream at night. He makes me sick."

Williams, a 23-year-old black freelance cameraman and self-styled talent scout, is charged with murdering Nathaniel Cater, 27, and Jimmy Ray Payne, 21, two of the 28 young blacks whose deaths were investigated by a special police task force.

Geter is one of 10 other slaying victims whom prosecutors are attempting to link to Williams. Judge Clarence Cooper has ruled prosecutors may present evidence on the other killings for the purpose of establishing a pattern that might fit the Cater and Payne slayings.

Williams has denied knowing any of the 28 victims.

Also Tuesday, Gov. George Busbee, Georgia Bureau of Investigation Director Phil Peters and former acting U.S. attorney Dorothy Kirkley said they have been subpoenaed to testify for the defense.

The three said they did not know why they were subpoenaed. ABC news reported Williams' lawyers

want to ask about a meeting at the governor's mansion last June 19, two days before Williams' arrest.

The 15-year-old witness, whose identity was kept secret by agreement of the defense and prosecution, said he was working in a carpet store in south Atlanta the day he saw Geter and Williams get into a "white and black-top automobile."

"I seen Lubie Geter get into the car with him," he said.

The teen-ager said it was between

1 p.m. and 2 p.m. when he saw Williams and Geter. An earlier witness testified she saw the two talking near the carpet store about 3 p.m.

The youth said he recognized Williams as the man who approached him in August 1980 and "asked me if I wanted a job washing cars." The youth said he accepted the offer and got into the man's car.

The witness said the man asked him if he played a musical instrument and if he had any money.

## Gas fumes kill sailors, investigation begun

SAN DIEGO (AP) — Two sailors on security patrol "keeled over" dead and a comrade who tried to help them also was killed when they came into contact with fumes from a Freon leak aboard a guided-missile cruiser, the Navy said.

The Navy sealed off a compartment of the USS Bainbridge, which was docked in San Diego at the time, officials said.

Lt. Cmdr. Mark Baker, a Navy spokesman, said seven others who had tried to revive the stricken sailors with mouth-to-mouth resuscitation and other means spent 20 hours in a hospital receiving treatment for ill-effects of the gas.

The dead were identified as Petty Officer 1st Class Joseph A. Durr, 26, and fireman Stuard L. Fields, 20, both of San Diego, and Petty Officer 1st Class John V. Sullivan, 26, of Columbus, Ohio.

Baker said Durr was on security patrol, training Fields, when they were overcome in the forward air-conditioning plant, one of two aboard the ship.

Sullivan was moonlighting for a private refrigeration company when he saw their problem, went for help,

returned and was also overcome, the spokesman said.

"The compartment where the incident occurred has been sealed," pending results of a formal investigation, Baker said.

Capt. John F. Shaw, commanding officer of the Bainbridge, began a preliminary inquiry.

The survivors' condition was listed as good, and they were sent home yesterday. They had been admitted to San Diego Naval Hospital with "slight dizziness, numbing of fingers, nausea and blurred vision," a hospital spokesman said.

Freon, a trademark for a derivative of ethane or methane, is used as a solvent as well as a refrigerant.

The deaths came a day after another fatal California military accident. Gunfire killed Pvt. Robert G. Solonika, 20, and injured three others during a training exercise Sunday night at Fort Irwin in the Mohave Desert northeast of Barstow. A preliminary report indicated the fatality was caused by "small-arms fire," a civilian spokesman said. Fort Irwin is the Army's new National Training Center.

**Fire-damaged Corby's Tavern** will definitely reopen March 1, Corby's spokesman Harold Rowley, Jr. said yesterday, adding that the reconstruction contract would be awarded today. An early morning fire on Sunday, Jan. 17, caused \$50,000 in material and structural damage to Corby's. Rowley predicted the day after the fire that Corby's would only close for 3-4 weeks in order to repair the interior and the roof. — *The Observer*.

**Two passengers** from a World Airways DC-10 jet that slid off a runway into Boston Harbor over the weekend are missing and feared drowned, officials said yesterday, three days after they said no one had been killed in the accident. Asked if the bodies of the father and son were believed to be in the harbor, Edward Ringo, senior vice president of the airline, said, "It's pretty obvious." Divers immediately returned to the scene to search for bodies. It had been believed that all 196 passengers and 12 crew members escaped serious injury when the plane slid off the runway at Logan International Airport on Saturday night. Three people remained hospitalized yesterday for minor injuries. But Ringo said a computer check of tickets and the discovery of carry-on luggage showed two passengers unaccounted for. — *AP*

**Kremlin ideologist** Mikhail Andreyevich Suslov, powerful member of the Soviet Union's ruling Politburo, has died and left a void in the aging leadership already beset by growing problems at home and abroad. Soviet television reported yesterday that Suslov died the previous afternoon, four days after suffering a stroke. He will be buried in Moscow's Red Square beside other famous Communists, the broadcast said. Suslov was known in the West as a powerful but mysterious man who worked closely with Soviet President Leonid I. Brezhnev, 75. To his countrymen, Suslov was the guiding ideologist of the Soviet Communist Party, which dominates every aspect of Soviet life. "He was the second pillar of the regime," said one Western diplomat. "This must be a major shock for Brezhnev himself." — *AP*

**The nation's Indian tribes**, literally living on top of a quarter of the country's mineral wealth, can tax those who retrieve that wealth, according to the Supreme Court. For the first time, the court on Monday said that Indian tribes may impose severance taxes on natural resources taken from their reservation lands. The ruling is a victory for the tiny Jicarilla Apache tribe and a setback for the large oil companies holding oil and natural gas leases on the tribe's northwestern New Mexico reservation. But the decision also will affect numerous other reservations. "This is an extremely important decision for the maintenance of tribal governments through the raising of revenues," said Albuquerque, N.M., lawyer Robert Nordhouse, who represented the Jicarilla Apache tribe. "Now, aside from collecting royalties, tribes are entitled to receive tax monies for governmental services such as road maintenance and police protection," he said. — *AP*

**Police searching** a home during a drug raid found what may be a human fetus in a wooden box in a freezer, detectives said. Detective Ron Mayoral said Catherine Devine, 33, who lived alone at the house, said the fetus was hers, but declined to discuss it. Sam McIntire, a spokesman for the Denver Coroner's Office, said Monday night because of the state of decomposition, an autopsy would be required to determine if the fetus was human or not. He said Ms. Devine was taken to jail, where she was held for investigation of possessing a controlled substance. Officers confiscated an undisclosed amount of cocaine, quaaludes, handguns and a rifle, when they searched the house on Monday, he said. Mayoral said no charges were filed in connection with the fetus, pending an investigation by the police homicide division. — *AP*

**Kenny Rogers** has won three more American Music Awards, adding to the four he won last year, topping the late John Lennon as the year's best pop-rock male vocalist. In the nationally televised awards Monday night, Rogers also won, in both the pop-rock and country categories, for his album "Greatest Hits." Lennon, who was shot to death outside his New York apartment building 13 months ago, had been nominated as best male vocalist, and his album "Double Fantasy," which he recorded with his wife, Yoko Ono, was a top contender in the pop-rock category. Other winners were the soft-rock group Air Supply from Australia, as best pop-rock group, and Lionel Richie and Diana Ross, who recorded the best pop-rock and soul single record "Endless Love." — *AP*

**Partly cloudy**, windy and cold today with the high in the low to mid 30s. tonight cloudy with a chance of light snow or rain. Near steady temperatures. Tomorrow a chance of light snow or rain with the high in the low to mid 30s. Chance of precipitation is 40 percent tonight. — *AP*

## Bishop, films address same issues

The issues that the Social Concerns film series presents this week serve as an appropriate introduction for Archbishop Raymond Hunthausen, scheduled to lecture here Friday on a Christian response to nuclear arms.

The film series opened yesterday with "The King of Hearts", the story of a soldier sent to disarm a bomb who discovers a forgotten insane asylum and is embraced as its king. This comedy deals with "the triumph of child-like innocence over the violent self-destructiveness of the civilized world".

Hunthausen states that he has been told by some that unilateral disarmament in the face of atheistic communism is insane. He responds to this by noting that he feels nuclear armament by anyone to be "itself atheistic and anything but sane." His call for unilateral nuclear disarmament and suggestion that Christians in the United States should consider withholding half of their federal income tax as a non-violent protest against "nuclear murder and suicide" drew international attention last year.

The next film in the series, "True Confessions", deals with the conflicting loyalties of two brothers drawn together in the aftermath of the murder of a young prostitute. This film was criticized as "inappropriate" for the Social Concerns series by Brother Rodney Struble, Assistant Rector of Stanford hall, who felt that the content was more "Hollywood dramatization" than an accurate presentation of controversial issues.

Hunthausen addresses the loyalty issue regarding the nuclear arms situation, suggesting that there is currently more security put in weaponry than God. He proposes in a speech reiterated in *The Catholic Northwest Progress* that "failure to achieve mutual disarmament leaves us with only one moral position in this tragic situation, the position of unilateral disarmament with trust and reliance on the Lord as our security."

"Dr. Strangelove" is a 'comic nightmare', seeing the United States and Russia cooperating in an effort to save the world from disaster after a madman releases bombers in an attempted nuclear attack.

In the speech "The Calling to Lose our Lives for Peace", Hunthausen calls a nuclear first-strike weapon "the ultimate violation of both God's law and international law." He adds that preparations for a nuclear war of aggression, as seen in our deployment of the Trident submarine, the MX, and the cruise missile, are a direct violation of those Nuremberg Principles which America affirmed and upheld after World War II. He also observes that "our race for nuclear dominance is making us a godless and lawless force in the world." He continues that former Trident missile designer Roone Aldridge calls the coming to Puget Sound of the Trident submarine "an opportunity for all of us to examine our hearts and lives to determine our commitment to

### Kelli Flint Executive News Editor

nonviolence".

The documentary film "Excuse Me, America" raises questions as to whether a non-violent solution to the world's injustice is possible, and whether a violent solution would be a solution at all.

In a speech delivered at Pacific Lutheran University in Tacoma, Washington, Hunthausen quotes Jesuit Father Richard McSorley, who wrote that "the taproot of violence in our society today is our intention to use nuclear weapons." McSorley adds that "once we have agreed to that, all other evil is minor in comparison, noting that any hope of large scale improvement of public morality is doomed to failure."

Hunthausen agrees with McSorley, commenting that "our willingness to destroy life everywhere on this earth, for the sake of our security as Americans, is at the root of many other terrible events in our country."

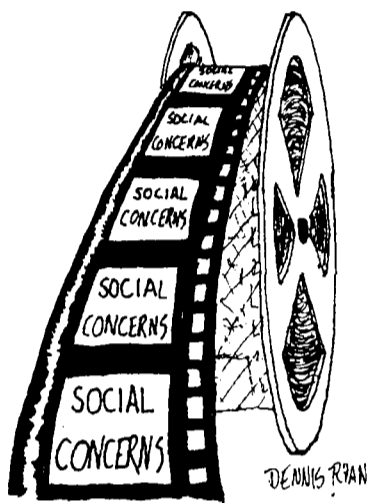

The documentary "Hiroshima" shows some of the drawings by survivors of the atomic bomb which were collected in Japan in 1974 and 1975, offering 'a glimpse of what really happened'.

Hunthausen recalls hearing the news of the atomic bombing of Hiroshima in 1945. "I was deeply shocked," he said, noting that he could not put into words the shock he felt from the news that a city of hundreds of thousands of

people had been devastated by a single bomb.

Hunthausen also notes that he could not believe that there was an instrument of destruction "as awesome as this bomb". "I was caught up in a great turmoil wondering, worrying, praying about this, and I could not grasp that our world had totally changed. Hiroshima changed my faith as a Christian in a way I am only now beginning to understand."

Hunthausen adds that he lived with the reality of Hiroshima and Nagasaki, wondering about the upheaval in the world but not doing anything about it. In 1975, after talking to Jim Douglass of the Pacific Life Community, Hunthausen decided to publicly express his stance on the nuclear issue. He spoke about withholding war taxes as a feasible strategy because "sometimes people need to think about the implications (of nuclear weapons) in their own lives."

After 24 hours

# Reactor crisis under control

ONTARIO, N.Y. (AP) — The emergency caused by a steam tube rupture at the R.E. Ginna nuclear plant was declared at an end yesterday as technicians worked to bring the reactor to a cold shutdown.

The plant, run by Rochester Gas & Electric Corp., had been in emergency stages for 26 hours since the accident Monday morning.

"The emergency is over. The situation is stable. Operators are making preparations for the cleanup of the spilled water," said Jan Strasma, spokesman for the Nuclear Regulatory Commission. "It's the mop-up phase, if you will."

Officials said the reactor was cooling down satisfactorily and a cold shutdown — the process of bringing the reactor's temperature below the boiling point of 212 degrees at normal pressure — was hoped for by late yesterday or this morning.

A site emergency, the second most serious in a four-level classification system — and by NRC definition a situation that poses the potential of health effects for the public — had gone into effect 75 minutes after the 9:28 a.m. Monday burst.

It was downgraded to an alert, the third most serious level, at 7:15 p.m. Monday, and the alert was canceled

at 11:15 a.m. yesterday.

Meanwhile, federal officials voiced concern about the recurrence of steam tube failures. The incident at Ginna, a Westinghouse-designed, pressurized water reactor, was the fifth time in eight years that a steam tube had burst at a nuclear plant, according to the NRC.

"The industry is very concerned about it because it's an operational problem," Strasma said. There also is an industry-wide problem with premature tube degradation.

There are 3,260 steam tubes in each of Ginna's two generators, and they tend to become corroded with caked up crud and mineral deposits. "The only way it can develop into a serious problem is if a number of tubes fail," Strasma said.

Other tube ruptures have occurred at Point Beach in northern Wisconsin on Feb. 26, 1975; Surry Point in Gravel Neck, Va., in September of 1976; Prairie Island in Red Wing, Minn., on Oct. 2, 1979; and the Duke Power Co.'s Oconee Unit in South Carolina in September of 1981.

The biggest part of the Ginna cleanup involved purification of 11,000 gallons of radioactive water in the containment building.

Sump pumps will carry the water to a holding tank in the auxiliary

building. The water will be evaporated and the radioactive material solidified so it can be shipped off for burial, the NRC said.

"The bottom line is the plant is stable. It's going to cold shutdown in an orderly manner. There are no radiation releases from the plant," said John Oberlies, chief spokesman for the utility, which serves one million customers in the Greater Rochester area.

By midday, the temperature in the primary cooling system was 325 degrees and falling.

Radiation monitoring away from the plant, located 16 miles northeast of Rochester, continued to show only normal background levels.

A Rochester Gas and Electric worker checks cars entering and leaving the Ginna Nuclear Power plant Monday following a spill of radioactive water and release into the atmosphere of radioactive gas Monday morning. See story at left. (AP Photo)

## 'Problems In Eating'

# Psych Services continues program

By KATHLEEN DOYLE  
News Staff

The pioneering effort of the "Problems in Eating" (P.I.E.) program will be continued by the Psychological Services Center this semester.

An organizational meeting for old and new P.I.E. members will be held tomorrow, Jan. 28, at 7 pm in the Psychological Services Center located on the third floor of the Student Health Center.

This program, spawned by the increase in anorexia nervosa (self-starvation) and bulimia (binge-eating) victims, and under the guidance of Dr. Daniel Rybicki and Dr. Susan Steibe, began last Oct. The P.I.E. group was both didactic and experiential. It provided information on nutrition and healthy lifestyles while allowing the participants to experience the therapeutic process of group support.

The program focused on the link between eating and emotion. Rybicki and Steibe attempted to approach the problem of eating disorders in a manner different from most. Their approach investigated a multi-faceted etiology. They examined a variety of possible causes rather than simply subscribing to one theoretical cause for the disorder. This method provides for a variety of treatments and will be implemented again this semester.

"We feel good about last semester," Steibe said. "The people who attended the sessions seemed to enjoy them as much as we did."

"The sessions were planned to be informative, but one of the major fringe benefits was the cohesiveness of the group. A real level of disclosure was reached."

The Psychological Services Center also sponsored a workshop on eating disorders for rectors. As a result of this, Rybicki and Steibe feel that consciousness of the problem has been raised. The hall staffs have been an excellent referral service for them.

"Eating disorders are difficult to admit to and change," Rybicki said. "The biggest hurdle in dealing with these problems is admitting to them. Awareness of eating disorders on

campuses has increased. We have, in fact, been asked to speak in dorms. On these campuses it is an important enough problem. The physical effects of anorexia and bulimia are harmful. But just knowing that is not enough to make a person change. Those suffering from eating disorders need help to change and the group members add the support needed."

"We are finding that we are dealing with underlying problems such as body image, intimacy, parents, and self-expectation," Steibe said. "The majority of the time has been spent on these underlying issues and how people use food to cope with these problems."

"This is a woman's issue. There appears to be a conflict between what the media says is feminine and one's own internal standards and values regarding femininity and womanliness."

Rybicki and Steibe will be seen in the near future on the television program "Studio 16." On this show

to be aired on Channel 16 the two will discuss the problem of eating disorders. A member of the P.I.E. group will join them.

The response to P.I.E. has initiated plans for the future. "Plans are forming for next year. We are considering the possibility of starting earlier, perhaps at registration," Rybicki said.

Symptoms of eating impulse disorders include rapid weight loss, binge eating, tendency to be highly active and sports-minded, highly restricted diet, self-starvation, self-induced vomiting, intense fear of becoming overweight, and sensitivity to cold. If you recognize these symptoms in yourself or someone you know, then consider contacting Dr. Rybicki or Dr. Steibe at 9-239-7336. Prospective group members are asked to contact the Center in order to arrange a consultation to determine if the group would meet their needs and expectations. The Center emphasizes the confidentiality of all contacts in the Center.

## Intellectuals protest Polish internments

WARSAW, Poland (AP) — A new protest letter from 27 intellectuals yesterday demanded Poland's martial law authorities end "beating, maltreatment and harassment of people deprived of their liberty."

The letter surfaced after parliament approved military rule and named a military historian to run the universities.

The protest, signed by intellectuals, writers and artists, said interned workers were getting worse treatment than intellectuals and called for publication of a full list of internees and the sites where they are held. Informed sources estimate about 50,000 Poles are held under the martial law decree that suspended the independent union Solidarity Dec. 13 — more than 10 times the number the Communist regime admits. Solidarity leader Lech Walesa is believed held somewhere outside Warsaw.

Knowledgeable sources said Walesa's wife and children visited him last week.

The International Committee of the Red Cross in Geneva said Poland allowed it to visit about 500 internees in two camps Friday and Sun-

day in the first such operation in the Soviet bloc. The Red Cross did not comment on the conditions of the internees or the camps.

The main signature on the protest letter was that of dissident leader Jan Jozef Lipski, who was interned for trial on charges of organizing a strike at the Ursus tractor factory in Warsaw after martial law was declared.

The new letter followed criticism of martial law last week by Poland's Roman Catholic bishops, some 120 intellectuals and a leading Communist liberal, Stefan Bratkowski.

Parliament's vote to ratify the martial law decrees was accompanied by a resolution endorsing the speech Monday by Polish leader Gen. Wojciech Jaruzelski, including his call for an easing of some restrictions.

Secretary of State Alexander M. Haig Jr. and Soviet Foreign Minister Andrei Gromyko met for nearly eight hours in Geneva yesterday, almost twice the time scheduled, but gave no details of their talks. Haig said earlier he wanted to discuss the Soviet role in the Polish crackdown, but G.romyko refused.

## Accountants offer aid

Forty-five seniors from the University of Notre Dame's Department of Accountancy will participate in the eleventh annual Notre Dame Tax Assistance Program.

At several locations in the South-Bend/Mishawaka area, the student volunteers will assist family heads with incomes of \$18,000 or less in preparation of their IRS returns.

For '57 years'

## Lab averages one patent daily

NEWARK, N.J. (AP) — At Bell Laboratories, there's something new every day — quite literally. In its 57 years as the research arm of American Telephone & Telegraph Co., its scientists have produced more than 19,500 patents.

"We like to say we have received an average of one patent per working day since we began in 1925," said spokesman Bob Ford.

Inventions have gone far beyond the telephone: the invention of the transistor, the laser and the electrical digital computer, origination of sound movies and development of radio altimeters.

Seven Bell Labs scientists have shared three Nobel prizes.

When U.S. District Judge Vincent Biunno approved AT&T's plan to settle a long-standing antitrust case, he likened Ma Bell's research arm to the 15th century court of Lorenzo the Magnificent, which included Michelangelo and other Italian Renaissance geniuses.

Bell Labs researchers developed devices to measure human hearing and speech waves, solar batteries, satellites, and countless innovations routinely used in radar, defense systems and computer language.

But those creations were just for starters. With AT&T's divestiture of 22 local operating telephone companies, the antitrust settlement will take the shackles off Bell Labs, allowing Ma Bell for the first time to profit from scientific discoveries in unregulated fields.

Since 1956, AT&T has been under court order not to dabble in fields like computers, information stems and cable television.

Bell Labs scientists liken the antitrust settlement to the unlocking of a door, a chance to broaden research horizons.

"We can follow anything," said Arno Penzias, a Nobel laureate who was promoted last month to vice president of research, where he heads a department that in the past half century has dabbled in virtually

every conceivable field of science and communication.

Penzias shared the 1978 Nobel in physics for the discovery of background radiation left over from the "big bang" explosion thought to

## WEDNESDAY FOCUS

have formed the universe 18 billion years ago.

Bell Labs, created through the merging of the research departments at AT&T and Western Electric Co., today has a budget of \$1.6 billion and almost 25,000 employees (3,325 of whom have doctorate degrees) at major research facilities

in Murray Hill, Whippany and Holmdel, N.J., and Naperville, Ill. In all, it has 17 facilities in nine states.

Under the settlement, AT&T will be allowed to enter lucrative new computer fields, including home information services. But Penzias says it is a "tall order" for scientists to simplify computers so they can be mass-marketed. They must make the computers "smarter," accept voice commands, perform more functions and store more data.

Bell Laboratories took a first step last year in announcing a silicon chip — the size of a thumb nail — packed with 130,000 transistors capable of processing 32 bits of information at once.

The next step will be announced next month: a computer memory device that can store 256,000 bits of information.

## ... State

continued from page 1

Americans than they are today. Inflation, taxes and interest rates would all be higher."

The president proposed putting a cap on benefit programs operating under congressional mandate, and said his plan could save \$63 billion over four years "without affecting Social Security."

In a brief reference to foreign policy, Reagan said that "toward those who would export terrorism and subversion in the Caribbean and elsewhere, especially Cuba and Libya, we will act with firmness."

"When action is called for, we are taking it," he said. "Our sanctions

against the military dictatorship that has attempted to crush human rights in Poland — and against the Soviet regime behind that military dictatorship — clearly demonstrated to the world that America will not conduct 'business as usual' with the forces of oppression."

"If the events in Poland continue to deteriorate, further measures will follow," he said, without further explanation.

He said that his program would continue with two priorities: "a strong national defense ... and a reliable safety net of social programs for those who have contributed and those who are in need."

## Theif returns money, writes victim apology

INDIANAPOLIS (AP) — It was dark when Dorothy Gatlin arrived home. Although she had been mugged on her doorstep a couple of years ago, she wasn't particularly scared.

Her apartment complex at 42nd Street and Post Road is a busy place. As she fumbled with the key to the front door, she could see by the lights that most of her neighbors were awake and watching television.

Before she could get the door open, a man jumped from the shadows and raced toward her. She screamed and tried to hold on to her purse as he grabbed for it.

"He had a hold of the purse strap and was pulling me with it," she said. "I kept hanging on. I suppose I should have given up the purse, but I had an unusually large amount of money in it, and I didn't want to lose it."

"Finally, he pushed me. I fell and hit my head hard on the cement walk. I was stunned, and my head really hurt. That's when he got the purse away from me. I kept screaming, but I guess nobody could hear over their television sets."

"It was kind of funny because when he saw me lying there he seemed upset, and I thought for a moment he might stop and help me. But he didn't. He just ran off."

The man was about 6 feet tall and of stocky build. Dorothy is 64 years old and 5 feet tall.

"A real matchup" is the way she described it.

Dorothy went to the hospital where she was treated for cuts and bruises and given some medication to help the ringing in her head. She was off three days from her job as office manager at a Moose lodge.

Police wrote a report of the crime and did what they could, but all they

had to go on was her description of a stocky white man in his early 20s who was clean shaven and neatly dressed.

The next day, Dorothy received a phone call from a youngster who found her purse, minus the money. It was found in a small stream about a mile from her apartment. Her credit cards and identification were still in it.

Nine days passed, and Dorothy wasn't expecting to see her money again as she arrived home on another dark night. Harboring equally dark thoughts about mankind, she found a long, plain envelope in her mailbox.

Inside the envelope was a carefully printed note that read, "Dorothy, I'm sorry if I hurt you. Here is your money. I'm very sorry."

Next to the note was a money order for \$162.30, the exact amount she had when she was robbed.

"The money order was purchased at a Haag's Drug Store and signed John Doe," she said. "There was no way for police to trace it. Police have different theories about this. Some say maybe I was robbed by a young man who needed money desperately and when he got paid, he paid me back. Others think maybe his parents or wife or someone in the family found the money and made him send it back."

## Application date extended

The deadline for applications for the Washington, D.C. Seminar has been extended until Fri., Jan. 29 at 4 P.M. Applications should be turned into the Center for Experiential Learning

# Club revives, aids poor communities

By MIKE LEPRE  
News Staff

The Circle K-Club of Notre Dame has been reactivated after disbandment two years ago due to lack of interest.

Wes Gainey, a sophomore and the current president of the club, was instrumental in the group's rejuvenation.

A service organization whose goal is to help deprived people of nearby communities through contributions to local charities, the K-Club works in conjunction with the South Bend chapter of the Kiwanis Club.

The Circle K-Club itself is run "almost totally by students," according to the group's Public Relations Chairman Jeff Page. Page also noted that Roland Smith, a professor at Notre Dame and a Kiwanis Club member himself, acts "solely as the group's advisor."

The primary force behind the reinstitution of the club was Wes Gainey, who was a prominent member of a key club while in high school. Gainey explains that as a result of his being an officer in the key club, "the governor of K-Club in the Indiana district contacted me, asking me to try to bring back the club here at Notre Dame."

Gainey, without the aid of the University, got in contact with the South Bend Kiwanis, who agreed to sponsor the organization for Notre Dame students. The Circle-K has built itself a membership of 39 students, and Gainey notes that recently "the University is very enthusiastic in supporting the group."

Termed a "college level key club" by Page, the club is steadily gaining needed publicity. "Many students

are just beginning to realize that a K-Club exists at Notre Dame," cites Page, "and with each new meeting our membership is growing."

Since its reappearance in early November of 1981, the club has aided in the collection of donations to the Salvation Army, and has helped out in the Landon Turner Fund drive. Future activities call for projects such as a twenty-four hour basketball game, a paper drive, a chocolate heart sale during Valentine's Day, participation in snow softball, and possibly selling newspaper subscriptions in cooperation with the South Bend Kiwanis Club.

The Club also forseees participation in a "Christmas in April" program aimed at aiding local homeowners in the upkeep of their property. This project would entail obtaining names of the poorer families in the area and sending out K-Club members to these location to perform odd jobs.

At the present time, the majority of the funds raised by the club's activities are appropriated to charities through the Kiwanis Club of South Bend. While, according to Page, they "are a young club, just trying to get our feet off the ground for now" he feels that with increased manpower "the organization could grow to the point where we would be able to function on our own."

President Gainey feels that for now his group is "concentrating on trying to build a strong foundation so that the club won't collapse again." As for long range goals for the Circle K-Club, Page comments that he would like to see the Club "increase in size in order to become an influential member of the Notre Dame family."

U.S. Secretary of State Alexander Haig meets with Swiss Foreign Minister Pierre Aubert, left, in Geneva Monday. Haig met with Soviet Foreign

Minister Andrei Gromyko yesterday. See story below. (AP Photo)

## Atmosphere poisoned Haig, Gromyko discuss polish crisis

GENEVA, Switzerland (AP) — Secretary of State Alexander M. Haig, Jr. concluded nearly eight hours of intense discussions with Soviet Foreign Minister Andrei A. Gromyko last night and said martial law in Poland had "cast a long and dark shadow" over every aspect of their talks.

He said that Gromyko, while expressing the view that the situation in Poland is a purely internal matter, nonetheless took part with him in a detailed "two-sided" discussion of the Polish crisis.

At a news conference, Haig described the talks as "very sober and extremely detailed," and said he told Gromyko the United States is prepared to begin negotiations on the reduction of strategic nuclear weapons "when conditions permit."

But he made it clear that the Reagan administration believes such negotiations cannot take place in an international atmosphere he said is poisoned by events in Poland.

Haig told reporters that Poland will not be the only factor in deciding when the time is right to begin the talks.

"I am not giving you a litmus test of conditions but merely a broad statement of the influence of the Polish situation on the current environment," Haig said.

He said President Reagan is "anxious" for the talks to begin because he genuinely wants "meaningful reductions in strategic armaments."

Haig said he and Gromyko did not discuss the possibility of a summit meeting between Reagan and Soviet President Leonid I. Brezhnev. Haig and Gromyko did not agree to hold another meeting, but Haig said such meetings could be arranged on short notice.

He said he and the Soviet foreign

minister discussed the status of the talks in Geneva on reducing nuclear missiles in Europe, which Haig called "the major source of nuclear tension here in Europe."

Haig said that they also discussed the situation in Central America, Cuba, Afghanistan, southern Africa and many other issues.

He called the lengthy talks "beneficial from the standpoint of necessary communication... between the Soviet Union and the United States."

The high-level encounter was the first between the super-powers since the military crackdown in Poland on Dec. 13. Haig and Gromyko conferred in late September in New York.

The talks, which Haig had said could be brief if Gromyko refused to discuss martial law in Poland, lasted seven hours and 50 minutes in morning and afternoon sessions. The schedule had called for a pair of two-hour meetings.

Before leaving Washington, the U.S. side had trimmed the time of the encounter from two days to one, in a move to underscore determination not to conduct "business as usual," while martial law persists in Poland.

### 'Booby trap'

## Second pot murder trial opens

LAFAYETTE, Ind. (AP) — Robert Sullivan was killed in a trap that used marijuana plants growing on a porch and a shotgun rigged to fire when a door was touched, Prosecutor John Meyers told a Tipton Circuit Court jury.

The jury of 10 men and two women was seated yesterday for the second trial of Gary Ratcliff, 29, of Romney. He is charged with reckless homicide and involuntary manslaughter for the June 1980 death of Sullivan, 16, of Stockwell.

Ratcliff's first trial ended with a hung jury.

Sullivan was killed by a shotgun blast when he tried to open the storm door of Ratcliff's rural mobile home during an alleged burglary attempt. Ratcliff was not at home.

The defendant testified during his first trial he rigged a shotgun loaded with salt and shot after repeated break-ins at his home. He said he had

fixed the weapon so shot would cause only minor wounds to anyone who attempted to break in.

Judge Warren B. Thompson ruled in a pretrial hearing Monday the prosecution could introduce evidence about marijuana found at Ratcliff's home.

The evidence was suppressed during the first trial which ended last May 15.

The ruling, according to a court official, allows the prosecution to present evidence and to argue that the presence of marijuana provoked the victim into a burglary attempt which resulted in his death.

Tipton County police said that while investigating Sullivan's death they found 65 small marijuana plants outside Ratcliff's home, along with marijuana and items for using it inside the home.

Marijuana charges filed in the case have been put aside by the judge for later court action.

In his opening argument Tuesday, Meyers gave a brief description of

how the shotgun was rigged and said, "Then there was the other part of the trap. There was a planter across the whole width of the porch containing 65 marijuana plants, and another marijuana plant could be seen in the window of the trailer."

He said Sullivan may have attempted an unlawful entry "but the marijuana was a lure, a provocation, an enticement and a part of the trap."

Defense attorney E. Kent Moore said Ratcliff and his wife had chosen to establish a home they believed to be a secure one. Ratcliff's home was burglarized four times before he set the trap.

Moore also referred to Ratcliff's attempt to catch the burglars by staying home from work and a state law that allows a person to use deadly force to protect his home.

Meyers, however, said nothing of value was taken from the home during the burglaries except a stereo microphone, some loose change and marijuana.

### Lance cancels lecture

Peter Lance, an investigative correspondent with the ABC series "20/20," will not speak tonight in Saint Mary's Carroll Hall. He is rescheduled for Feb. 17 at 8 p.m.

He was forced to cancel his appearance due to his work on a "20/20" feature on formaldehyde. The chemical has been bonded with another chemical, urea, for use in spray foam insulation for homes, particle-board for mobile homes and other homes as well, but the mixture sometimes "breaks down and that's what causes the trouble," Lance explained. The story will air Feb. 4.

## Keenan Revue takes stage Friday

The sixth annual Keenan Revue will be held at 8:00 p.m. on Friday, January 29 and Saturday, January 30. An estimated 3,000

### Ray Wise

#### Preview

members of the Notre Dame/Saint Mary's community will attend the performance during its two night run at O'Laughlin auditorium on the Saint Mary's campus.

The Revue is being directed by Hans Hoerdemann and produced by Dave Magana. Director Hoerdemann stated that the Revue will contain its "traditional mix of parody, satire, music, and drama," while aiming to produce "a better Revue than last year." Hoerdemann also hinted at "new technical additions to the Revue that will be put into action."

Fr. Richard Conyers, Rector of Keenan Hall, explained some of the rules that govern the programming of the Revue. Performers may not "crib anything directly," while it is hoped that "skits are in significant taste for a general audience and attempt not to be cruel in their criticism."

According to Fr. Conyers, the Keenan Revue began when hall resi-

dents were "discussing and debating the social life at Notre Dame," a discussion "which was stimulated by growing awareness of alcohol abuses." As a result, "two Keenan Hall RA's decided to put together a stage revue."

The Revue, according to Producer Hans Hoerdemann, has become "a medium to showcase the particular talents that come through in a hall, inculcate unity, and meet more people." He also praised the Revue as "the first activity that really has the possibility for everyone to get involved."

Although the Revue is a unifying experience for the residents of Keenan, Hoerdemann stressed the importance of the artistic aspects of the show. "The administrative and production people must have theater experience and a perspective as to what will be good and entertaining." He also mentioned the emphasis placed on staging, since the entire show is planned "down to the last half-minute." Despite this intricate planning, the show is still "one of those things that amazingly comes together five minutes before 8:00 on Friday," in that "everything you build for helps...although it is hard to pinpoint specific things."

Fr. Conyers, referring to the satire in the review, stated that "through

humor, we hope some significant comments are made, both positively and negatively critical, about life at Notre Dame and Saint Mary's."

However, the show is not just satirical, and the nature of the individual acts depend "upon the talent of any particular year." Fr. Conyers also added that the Revue "ought to demonstrate...that we can do an awful lot to change the stereotyped attitude that the social life leaves a lot to be desired. All it takes is creativity and organization. Certainly an amazing amount of talent is available."

Tickets for the Keenan Revue are available to members of the Notre Dame/Saint Mary's community at no charge since Keenan Hall absorbs all costs associated with the production of the Revue. However, tickets will be available only at the Washington Hall and O'Laughlin auditorium box offices this evening between 6:00 and 7:00 p.m.

Over thirty acts, including a cameo appearance by a popular Notre Dame figure, will appear in the 'Iron Anniversary' edition of the Keenan Revue. The Revue, which Dr. Emil T. Hofman has referred to as "the best entertainment moment of the year," will be held Friday and Saturday nights at 8:00 p.m. in the O'Laughlin auditorium of Saint Mary's College.

## Mewes celebrates 25 years as Holy Cross Brother

On January 26, 1957, I took first vows to be a Brother of Holy Cross. At that time it seemed a long way off before I would ever arrive at such a major milestone as a silver jubilee. Looking back over the same 25 years, they seem to have passed

### Bro. Bill Mewes

#### Personal glimpse

rather quickly. Of course, some of those years went much slower than others, some were rather painful, and others were filled with joy and happiness. The painful years were mainly due to my own inadequacies and self-inflicted problems. As these were solved or somehow dissolved, life became better and better.

The life of a Brother has changed.

The required wearing of the habit became optional over the years. Today, very few brothers wear the religious habit. Although one is to attend Mass daily, most other prayers have become optional. Twenty five years ago, a man received notice of change in job or living quarters by checking a bulletin board. Today, he makes his own arrangements, subject to the approval of the major superior, the provincial.

The world has changed during this time also. Airplane travel has become commonplace; man has landed on the moon. Nevertheless, he is still bogged down with sin, crime, and war. He even plans for the destruction of his own world through a nuclear holocaust. In some ways he has made progress, in other ways he seems to have regressed.

"What is a Brother?" This question comes up again and again, and I

usually feel that my answer is insufficient. An easy, flip answer says that he is a male Sister of male Nun. A more detailed answer describes him as a layman who joins a religious order and takes the vows of poverty, chastity and obedience.

Poverty used to be explained as giving up ownership of things, or at least the use of things without permission. Now the emphasis is more on having things in common. Chastity used to be viewed more in terms of giving up all sex, perhaps even one's own sexuality, but now, is often called the vow of celibacy, or not getting married. One obeyed God through the superior, and God's will was whatever the superior told you, as long as it wasn't sinful. Today this vow is seen as obedience to God though discernment of His will. This is much harder and requires much more work and prayer.

The purpose of vows remains the

same, to follow Christ more perfectly, to follow Him wherever and whenever He calls you. This gives one more freedom to serve and love others and the Church.

Even the reasons for my being a brother have changed. Twenty five years ago I joined "to save my soul" and to follow God's call. Following the call means the same today, but it is more likely to be put in terms of following God's will as derived through discernment.

On the day, 25 years ago, when I made my first vows, I got cold feet and went to see the novice master. When I told him my concerns I was told to get out of his office and to take those vows. After that, I had no trouble taking vows the next 2 years, but when I came to final or perpetual vows good for life, that was another matter. I thought cold feet at first vows must have been what some experience at marriage, but then final vows seemed closer since they were for life. This time I went to see my new superior about my anxieties and was told pretty much the same thing as before. Perpetual vows seemed to take more faith, hope and trust in God.

After final vows I had no questions about the life of a Brother for approximately 10 years, since I've seriously questioned the vocation. "Why am I leading this life and deeping these vows?" Each time the answer was the same: I am a Brother, and chose to remain a Brother, because this is the best way of life that I can love God, myself, and my neighbor. I cannot say this about anyone else, but for me, this is the best way. The call to be a Brother is a very personal call, as is any vocational call, but this one is for me.

In 1955 I entered the Brothers of Holy Cross at Watertown, Wisconsin. Three months later I went to the novitiate (now Le Mans Academy) at Rolling Prairie, Indiana, where a year later I took my first vows and officially became a Brother of Holy Cross. The same day I moved to Dujarie Hall (now Carroll Hall), Notre Dame, and soon entered the University. In 3 and a half years I received

..., BA in education with a major in social studies, especially history. That summer (1960) I started on my masters in theology and made my final vows and in the fall I began my teaching career at Catholic Central High School in Monroe, Michigan.

This is my 4th year as the executive secretary of the Social Justice Commission of the Brothers of Holy Cross, Midwest Province. For the first 3 years, my office was at the Justice and Peace Center in South Bend and I was on the staff there. The office is now located at the Brothers' Center across the highway from ND to SMC. This job has been my best ever.

Coming back to Notre Dame, I found many more student activities here than when I left in 1965. I have enjoyed getting to know many of the student groups such as the World Hunger Coalition, Right To Life, FLOC, Pax Christi and especially CILA. I have also been blessed by participation in the charismatic prayer group in the Log Chapel and have enjoyed the other benefits of campus life, especially the entertainment, including sports. The state park-like setting is also an advantage.

As I look back, I especially want to thank God for His many blessings and for His great love. I also want to thank my Dad who taught me so much about God's love through his own love for me.

My call has led me to Holy Cross and through this call, I have received many blessings. It is in Holy Cross that I intend to stay, till death do us part, so help me God.

## Chartstoppers return to scene

Two very hot acts about three years ago (1979) were the Bee Gees and the Knack. The Gibb brothers were responsible for the

**Tim Neely**

Music

longest string of consecutive number one hits in chart history (six), thanks to a heavy disco beat and high falsetto vocals. Riding on the crest of another 1979 fad, new wave music, the Knack was heavily promoted as "the new Beatles." They had a "number one" 45 and a "number one" LP thanks to great and had a number one 45 and number one LP thanks to that promotion, a lack of competition on the charts, and suggestive lyrics.

Both disappeared for a while — the Bee Gees mired in lawsuits with RSO Records and occupied with various solo projects (like Barry Gibb's work with Barbra Streisand), and the Knack mired in a second LP which sounded like the first one played sideways (a not-uncommon occurrence — remember Boston). But now both are back with new albums after lengthy absences, both having lost the momentum each had. As a result, *Living Eyes* by the Bee Gees and *Round Trip* by the Knack have been almost ignored. But both are better-than-average LPs and are well worth a listen.

Some time ago in an interview, the Gibbs swore they would never again do a disco record, and in *Living Eyes* they keep their word. In fact, they take a few chances. The first single from the LP, "He's a Liar," is such a

departure from its six "number one" predecessors that it is hard to believe it is the same group that did such disco classics as "Stayin' Alive" and "Night Fever." It is somewhat harder-edged and more difficult to listen to than the late-70s disco, a fact shown in its very low chart peak (for the Bee Gees), number 31. It seems to be an intentional departure, as if they are saying, "Hey, there's more to us than disco or sappy strings." The song certainly succeeds in that light.

The title song, released as the second single, did not even crack the top 40, and I am trying to figure out why. Part of the problem may be that the sound is somewhat different from the Bee Gees songs of the recent past. It is the same problem (if one wants to call it that) that Fleetwood Mac encountered with their 1979 *Tusk* LP: because it was so different, it was not immediately successful.

There are two other extremely good songs in a splendid collection: "Crying Every Day," a Robin Gibb vocal which, if the background synthesizer were taken away, would fit in very nicely with the classic Bee Gees period of 1967-69, a period which the brothers have tended to ignore in recent albums; and "Be What You Are," a Barry Gibb composition which could have been a leftover from the Barbra Streisand sessions and is very beautiful.

The Knack have also learned a few lessons from their experience as a pop phenomenon. *Round Trip* comes off as something more than a third rehash of "My Sharona." In fact, one is hard pressed to find too much that sounds identical to the "old" Knack. This is thanks to a large contingent of guest stars and unusual instruments (how often do you hear a sitar in today's music, for example?), and a change in producers from

Mike "Commander" Chapman, who made the Knack what they were, to Jack Douglas, who made Aerosmith what they were (and helped John Lennon come back, too). As a result, the sound becomes very different.

There are some very strange things on this album, more than just "the strangest piano in the world," as the accompaniment is described on one track. None of the strange things, like "Art War" and "Africa," work very well, but at least they try, and for that some congratulations are in order.

The first single from this record, like the first single of the Bee Gees' LP, is a fairly radical departure from the "norm" of the band. "Pay the Devil" is a slow song, and comes off well considering the slowest thing the Knack had ever done before was a "Beast of Burden" soundalike from their second album called "Can't Put a Price on Love." And the lyrics, while not as racy as prior Knack successes, still have their things to say about women. In another of the better songs on the LP, "Boys Go Crazy," the catchall line is "Boys Go Crazy when the girls say 'NO'."

To sum up these two releases, the lyrics from "We Are Waiting," a song from *Round Trip*, perhaps sums up the feelings of both bands:

*Oh we are waiting to show  
You a different view...  
Please let us into your home  
It's the least you can do...  
We'll book you  
We'll haunt you  
We're willing  
We're waiting.*

In the case of both the Bee Gees' *Living Eyes* and the Knack's *Round Trip*, not as many people as in the past have taken that advice. But both are listenable and very good while taking a few chances along the way. It would be only right if they did not have to wait any longer.

## Was football game really that 'Super?'

After the contest had ended and the dust had cleared on Sunday evening, the scoreboard delivered the final verdict: San Francisco 26, Cincinnati 21.

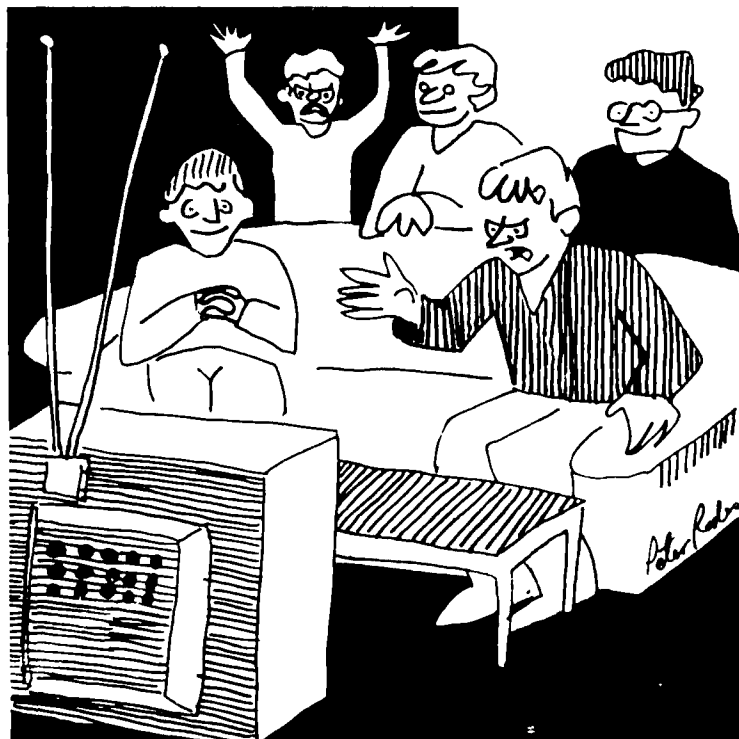

Ten of us were crowded into a small, single room watching the game as Super Bowl Commentator Pat Summerall reported that the attendance at the game exceeded the Silverdome's seating capacity. Later, when Joe Montana was being interviewed in the victorious 49ers' locker room, most of the remaining TV viewers were San Francisco fans. Only two Bengal supporters were left, one of them the inhabitant of the room and the owner of the television. The disappointed Cincinnati fans were finding much to complain about, starting with the turnovers that led to the Bengals' downfall.

"Darn Cincinnati," they'd say. "Always managing to screw up somehow. You'd think that a team that led the league in fewest turnovers would be able to hold onto the ball in the Super Bowl."

Strange how there's always something to complain about. Like Rosanne Rosannadanna used to say, it's always something; if it's not one thing, it's another. Either the Bengals had too many turnovers or their helmets are too ugly.

But if you want to get nit-picky about it, maybe there was a lot to complain about in that Super Bowl.

Take the quarterbacks, for instance. Sure, they had good games, but look at Ken Anderson. He didn't even go to Notre Dame. Wasn't he supposed to be the top-rated passer in the NFL? The pass he completed to a San Francisco defensive back certainly didn't evidence that. And what about Joe Montana? Doesn't he look like Barry Manilow? As I watched him in the post-game celebration, I thought I'd die if he suddenly broke out singing "Looks Like We Made It."

Or take each team as a whole. When will San Francisco get a real team name? When will Cincinnati get real helmets? The sight of the helmets of the Bengals and the 49ers was the worst color clash I'd ever seen since my cat mistook one of my high school term papers for his litterbox. There was only one team this season that beat both of these teams, and that was Cleveland. Can you believe the two best teams in the NFL both lost to Cleveland? And all those penalties! Don't these two teams know how to play fair?

Speaking of penalties, how about those officials? Some of them looked old enough to retire, and they always get in the way. They always seem to make the worst calls against your team. Didn't the head official have a Cincinnati accent? And that line judge! I'll bet he's from San Francisco. I could have sworn I saw him throw a pink flag instead of a yellow one.

Where did CBS get the ridiculous notion that all of America wanted to see balding Terry Bradshaw and boy scout Roger Staubach at halftime? Where was Jayne Kennedy? John Madden isn't nearly as nice looking as she is. Neither is Phyllis George. Coverage could have been much better. I felt like I would be sick if I saw just one more Subaru commercial.

Then there's the fans. Rainbow-haired, painted like the Bengals helmets, half-drunk and screaming at the tops of their lungs. Are these the characteristics of intelligent fans? Is this the type of Sunday afternoon football game that you would take your children to?

What about the coaches, and the waterboys, and the city the game was played in? How about those cheerleaders, and Archie Griffin's fumble, and the media?

What about us fans watching the game? Aren't we too fat, or too skinny? Do we study as much as we should? Do we go out of our way to help others when we ought to? Don't we complain a little bit too much?

As I write this, I have just returned from Notre Dame's dramatic overtime win over Idaho. And guess what? No one is complaining.

But, when things aren't going well, it is usually easier to criticize mistakes than to praise accomplishments. If this philosophy is applied to things such as the Super Bowl it is probably harmless, but if it becomes a part of our nature, then it's time to wonder about ourselves and the way we live. Perhaps we should start devoting more attention to all of the extra points in our lives and in ourselves, instead of dwelling upon our ugly helmets.

## Trivia Quiz XIII

I guess there are some people who know their Broadway out there, because several people remarked on the relative ease with which they answered last week's

**Tim Neely**

quiz. For those who did not feel the same, here are the answers, the song followed by the play:

1. "Standing on the Corner" — "The Most Happy Fella"
2. "People" — "Funny Girl"
3. "Send In the Clowns" — "A Little Night Music"
4. "Good Morning Starshine" — "Hair"
5. "Day by Day" — "Godspell"
6. "On the Street Where You Live" — "My Fair Lady"
7. "Mack the Knife" — "The Threepenny Opera"
8. "Corner of the Sky" — "Pippin"
9. "Tonight" — "West Side Story"
10. "I'll Never Fall in Love Again" — "Promises, Promises"

Now on to this week's quiz. Here are a few lists of items, groups, etc. What do the elements of each have in common?

1. Bill Haley and His Comets, The Bee Gees, Daryl Hall and John Oates (hint: it has something to do with the *Billboard* charts)
2. "Fire," "The Fever," "If I Were the Priest"
3. The Archies, The Cuff Links, Barry Manilow

**Notre Dame's ticket office** asks that students who own an "A" package of basketball tickets but do not plan to attend tonight's game against Maine, please give their coupon to their hall ticket office representative or turn them in at the ticket office by 3 p.m. today. These tickets will be used by the special students at Logan Center. In other ticket office news, tickets are available for the March 7 Notre Dame basketball game against Michigan at the Pontiac Silverdome. Tickets are priced at \$4, \$6 and \$8, and are available at the second floor box office of the ACC. Tickets also are available for the basketball game against Seton Hall to be played at the Brendan Byrne Arena in the Meadowlands, New Jersey, on Feb. 18. Finally, students are reminded that they are entitled to a \$1 discount on Notre Dame hockey tickets. Tickets regularly priced at \$4 and \$5 are only \$3 and \$4 with a Notre Dame or Saint Mary's ID. — *The Observer*

**Former world driving champion** and Indianapolis 500 winner Mario Andretti will race the entire 1982 Indy-car season for STP corp., the company announced yesterday. Andretti, who split his 1981 season between Indy-car races and Formula 1, will drive a new STP-Patrick Wildcat. He will rejoin teammate Gordon Johncock, another former Indy 500 winner, giving STP what company president John T. Boone called "the most competitive team in all of racing." "By devoting all our efforts to our Indy-car program instead of splitting commitments like we did last season, I'm sure we'll be extremely competitive," said Andretti. The 15-race schedule for Indy-type cars begins March 28 with the Kraco 150 at Phoenix. — *AP*

**The Fellowship** of Christian Athletes have postponed tonight's meeting because of the basketball game. The meeting is rescheduled for next Wednesday, Feb. 3, in the Howard Hall social space at 9:00 p.m. — *The Observer*

**The Irish women's swimming team** hosts the team from Valparaiso tonight at 7 p.m. at the Rock Memorial Pool. The women will be out to snap a two-meet losing streak, the second defeat coming this past Saturday at Illinois State. Despite the loss to the Redbirds, the 200-yard medley relay team of Lee Ann Nrislawn, Teri Schindler, Kathy Latino and Jean Murtagh qualified for national competition with their time of 1:53.44. The women's record stands at 2-2. — *The Observer*

## Tuned out

## Television gives sports static

By MIKE HARRIS  
Associated Press

Television is blamed for nearly destroying the sport of boxing in the 1950s.

The tube has been accused at one time or another of overkilling golf, baseball and football.

Hockey is a sport that various critics say does not lend itself to being on television.

Auto racing always has been a vast wasteland for the TV networks, except for the random Indianapolis 500, Daytona 500 or drag race.

The time has come, however, when the television industry, like a shy suitor, is making a nervous approach to auto racing. The speed sport appears ready to open its arms wide to the lenses.

In 1982, the Indy and Daytona 500s again will be broadcast by ABC and CBS, respectively, with the all the hype that goes with the telecasting of major sports events in the United States. But that's not news.

What is news is the fact that virtually every race run by Championship Auto Racing Teams, the major sanctioning body of Indy-type racing, will be televised, as will nearly half of the 30-race NASCAR grand national stock car schedule.

Beyond that, many of those broadcasts will be live.

NBC, which jumped into auto racing with a big thrust in 1981 by becoming the first network ever to broadcast a 500-mile Indy car race live start-to-finish, again will show

the Norton Michigan 500 in July, as well as the Las Vegas Grand Prix Formula One race in September. That network also reportedly is negotiating for several other CART races.

ESPN, the Entertainment and Sports Programming Network, also is a latecomer to the auto racing wars, but has seriously escalated its involvement for 1982.

The cable network announced recently that it will broadcast at least seven NASCAR races live, including several at the less-glamorous short tracks, where the cars are slower and the cash payoff smaller for the competitors, but the fender-banging action often is the best.

Atlanta sports entrepreneur Ted Turner is getting into the act now with a new show on his cable Superstation WTBS and its affiliated cable stations.

Starting this Saturday at 5:35 p.m., host Dave DeSpain and a team of field reporters will offer both motorsports enthusiasts and casual racing fans a 30-minute television magazine, tentatively called "Motorweek," that will include live and taped reports from racing venues around the world.

The first show will feature the announcement of the 1981 Auto Racing All-American team and its Driver of the Year, chosen by the Auto Racing Writers and Broadcasters Association, as well as a tape feature on last weekend's South African Grand Prix and a live report on the Daytona 24-hour Pepsi Challenge sports car race, which will be

in progress.

DeSpain also is a color analyst for CBS and on the syndicated radio productions of Motor Racing Network. Among the regular contributors to the show will be former Grand National champion Ned Jarrett, also a member of the CBS-TV and MRN racing crews; Steve Evans, an NBC-TV drag racing commentator and co-host of the syndicated TV show "Car Care Central," and Larry Nuber, a regular commentator on ESPN's auto racing broadcasts.

The show, which will be available to 196 cable systems reaching more than 20 million homes in the United States, is the result of the creativity and efforts of executive producers Ken Squier and Fred Rheinstein.

The indications are that the 1980s will see auto racing's presence on the small screen grow and blossom.

## ...Win

continued from page 12

Last Saturday, the Irish won the team championship at the Chris Taylor Memorial Tournament at Southwestern Michigan. Curt Rood, a 134-lb. pounder, placed first and was voted most outstanding wrestler. Joe Andretti and Brian Erard also claimed individual crowns. Joe Agostino and Shawn Moloney placed second. This weekend, the Irish hit the road to participate in the National Catholic Tournament.

continued from page 12

in the second half. Upon coming out of the lockerroom before the game, Idaho warmed up at the east end of the arena, thus assuring mistakenly that they would go toward the student section in the second half of the game.

Since the opposing bench is at the west end of the court, nearer the student section, many coaches on their first visit to the ACC will choose to play toward the west end in the second half, so the coach can be closer to his team on offense.

Other teams which have played in the ACC before, like Villanova, UCLA and Maryland, would rather go away from the students in the second half.

**OAKLAND CHIEFS...or...KANSAS CITY RAIDERS** — Now that Joe Montana will be wearing a Super Bowl ring, he is the first Notre Dame quarterback to guide his team to the NFL title. Daryle Lamonica of *Oakland* (I won't even explain last week) was the only other Irish alumnus to lead an NFL squad in the Super Bowl. Lamonica's Raiders lost 33-14 to Green Bay in Super Bowl II.

**TWO CAN PLAY** — Many of you have probably read or had a column sent to you which was written by Bill Granger in the January 17 *Chicago Tribune*. The general gist of the article was that Granger took great satisfaction in the fact that Notre Dame is experiencing both losing football and basketball seasons.

To quote Granger: "Few moments in life are as satisfying as those that come when the television camera pans a sea of glum faces in a Notre Dame stand."

## ...Bears

continued from page 12

The Black Bears are unquestionably led by 6-10 center Jeff Cross, the tallest player in the school's history. Still a freshman, Cross is learning how to play the aggressive style of play that is demanded of him in major college ball. He rises to the occasion as well, as was evidenced by his performance against Terry Cummings and DePaul, when Cross had the best game of his career.

Another first-year Maine player is a major contributor. Clay Pickering transferred to the Orono campus after playing at Daytona Community College in Florida. The 6-5 forward offers a lot of muscle under the basket, and gives Cross the help he needs on the offensive and defensive boards. The two big men have led the team in scoring in all but a handful of games this season.

The other players to watch include the team captain and only returning starter, Gunn. The 6-6 senior led the ECAC/North in rebounding last season, hauling in over eight per game. Surprisingly, however, Gunn's greatest asset may be his passing ability. He's second on the squad in assists.

The assist leader, as well as one of the team's top scorers, and the one who runs Maine's offense is Jeff Sturgeon. The only starter who's also a Maine native, the sophomore has taken on much of the leadership responsibility abandoned by Carlisle and Godbolt.

For Notre Dame's part, the spectre of a letdown hangs over this game. After the stirring wins over Maryland and Idaho, the Irish must maintain the intensity that has allowed them to break out of the slump that plagued them through the first half of the season.

"We've got to have students out there to help us again tonight," says Phelps. "We can't let down a little. Maine is tough, and we know it. But we can't let ourselves become complacent."

"If you like sports at all, you have to be heartened to see so many sports bullies and boors lose out..."

"But Notre Dame students. Whatever else they learn in their four years at South Bend, they never quite grasp the concept of sportsmanship or the obscure ideas of graciousness in victory and dignity in defeat.

"When they win, the students dance about like Hottentots celebrating around a boiling kettle full of human delicacies. And when they lose, they first cry like babies and then demand the death sentence be carried out on the coach. Frankly, I always thought it was punishment enough for a coach to actually have to spend large portions of his time in South Bend, but the Notre Dame group is a bloodthirsty lot.

"The generally thuglike behavior a Notre Dame student learns stays with him through life and reaches full flowering as a Notre Dame alumnus."

No comment — why stoop?

Last night, Notre Dame rebounded from its loss to Bowling Green to take a triangular match from Eastern Michigan (24-20) and DePauw (54-

6). See Brian Reimer's story on page 12. (Photo by Cheryl Ertelt)

# Get a new slant on math.

"The Texas Instruments new TI-40 and TI-55-II calculators have angled displays for easy-to-see-answers."

The slanted display makes these calculators easier to use at arm's length—and that's just the beginning. The economical TI-40, with built-in functions like trig, stat, logs, roots, reciprocals and more, will help you through math and science courses—especially since it comes with the informative book, *Understanding Calculator Math*.

The book explains how to use the TI-40 to work through, and understand, common problems.

If you're an advanced math or science major, you'll be

more interested in the TI-55-II, which comes with the **Calculator Decision-Making Sourcebook**. The TI-55-II features 56-step programmability, multiple memories, scientific and statistical operations, conversion factors and much more—a total of 112 functions.

An extremely powerful calculator, at an excellent price. Both calculators have LCD displays, long battery life and fit right in your pocket.

TI-40 and TI-55-II calculators. Two new slants on math from Texas Instruments.

Look for them wherever calculators are sold.

## Schueth refuses superstar tag

By DAVE DZIEDZIC  
Sports Writer

It was almost a year ago to the day that Notre Dame women's assistant basketball coach Patrick Knapp traveled down to Indianapolis to watch Mary Beth Schueth in action at Perry Meridian High School.

Knapp liked what he saw. "I told Mary (DiStanislao, Irish head coach) that we couldn't miss with this kid," Knapp recalls. "She scored 35 points that night. But more importantly, she displayed the boundless energy and leadership qualities that we were looking for. I knew we had to have her."

DiStanislao recalls her first meeting with Schueth (pronounced "Sheeth"). "She walked into our office in October of 1980, inquiring about our program. We had not heard much about her, but we were impressed with her attitude, and her excellent academic record. (She graduated third in her high school class of 532.) We decided to stay in touch."

DiStanislao and staff did keep in touch with Schueth. After Knapp's visit to Indianapolis, Schueth was offered a Notre Dame basketball scholarship. Schueth signed her letter of intent on Feb. 28, 1981.

But Schueth says she almost didn't end up under the Golden Dome.

"I was always somewhat interested in Notre Dame because I'm from Indiana," she explains. "I've always heard a lot about Notre Dame's academics and athletics. But I had received a scholarship offer from Miami of Ohio, and I was almost committed to them. But then Coach Knapp came to one of my high school games, and he invited me to visit the campus. When I made my visit, I realized all that Notre Dame had to offer me. It was a tough decision, but I think I made the right one."

One reason Schueth's decision may have been tough was the fact that the Notre Dame women's basketball program had not been well-known. In their first year of Division I play last year, the Irish struggled through a 10-18 season. That was also DiStanislao's first year at the helm, and the first year that Notre Dame offered athletic scholarships to women.

"I didn't come here just to play basketball," Schueth says. "The combination of academics and athletics here is very important to me. I won't

be playing basketball the rest of my life.

"I consider it an honor to be offered a scholarship here," she continues. "Coach DiStanislao is a terrific coach and she is establishing an excellent program. I'm glad to be a part of it."

Schueth is definitely an integral part of the 11-3 Irish. The freshman has started 13 of Notre Dame's 14 contests. She is the team's leading rebounder, averaging 9.2 a contest. Schueth has pulled down 129 boards, 32 more than second-leading rebounder Carrie Bates. Schueth is the team's second-leading scorer, averaging 11.4 points a game.

Schueth, however, would be valuable to the Irish even without

*"Mary Beth gets the key rebounds and makes the key shots."*

the impressive statistics. "She's very attentive to what we have to tell her," says DiStanislao. "She really wants to learn."

"Mary Beth is a very smart player," Knapp echoes. "She is very strong fundamentally. She gets the key rebounds and makes the key shots."

"Mary Beth didn't have All-American tags like some other kids. She just does her job consistently. Best of all, she's always looking to improve. I love working with her."

Schueth credits her father and family for helping her along athletically. "Dad played basketball in college," she says. "We had a basket in our backyard. We all used to go out in the back and shoot around. My dad and my brothers taught me the fundamentals."

Even though she has been around basketball for a long time, Schueth had never had great formal coaching before coming to Notre Dame. "I didn't begin playing competitive basketball until eighth grade," she explains. "At that time I was a 5-4 guard. Before my freshman year of high school, I had grown to 5-9. I had difficulty adjusting to the height difference, and I had to learn a lot on my own."

In the summer following my freshman year, I went to some basketball camps. But I was never able

to dedicate all of my time to basketball. Track and volleyball took up a lot of my time."

Schueth earned four varsity track and basketball letters, and two varsity volleyball letters. She accumulated numerous awards, including Marion County High School Athlete of the Year in 1981. She was named first team all-state, and participated in the Indiana-Kentucky all-star game.

Because of her basketball talent, Schueth was able to do a lot of traveling. It was during one of her trips that she first met Irish teammate Carrie Bates.

"I was playing in the AAU tournament in Kansas City in my junior year," she explains. "They had a one-on-one tournament, and I played Carrie in the finals."

After a bit of coaxing, Schueth finally admits, "I won — but it was really close."

Schueth has not had much difficulty adjusting to the demands on her time here at Notre Dame. "I spend a total of about three hours a day on basketball," she says. "A lot of people think there's not enough time to seriously study and play sports, but I disagree. Being busy disciplines me. I've learned to budget my time."

"In fact," she adds, "because I'm only playing one sport now, I think I have more free time than ever. In high school, I never had an off-season."

Schueth says that she already has learned a lot about basketball during her first season. "I'm learning how to play very good defense," she says. "Coach DiStanislao stresses unity through team defense."

Team unity is important to Schueth. "We have girls from all over the country on this team," she says. "We all have different personalities and habits. But we're learning to work together. Most importantly, we have to have fun together. If we don't have fun, it's not worth doing it."

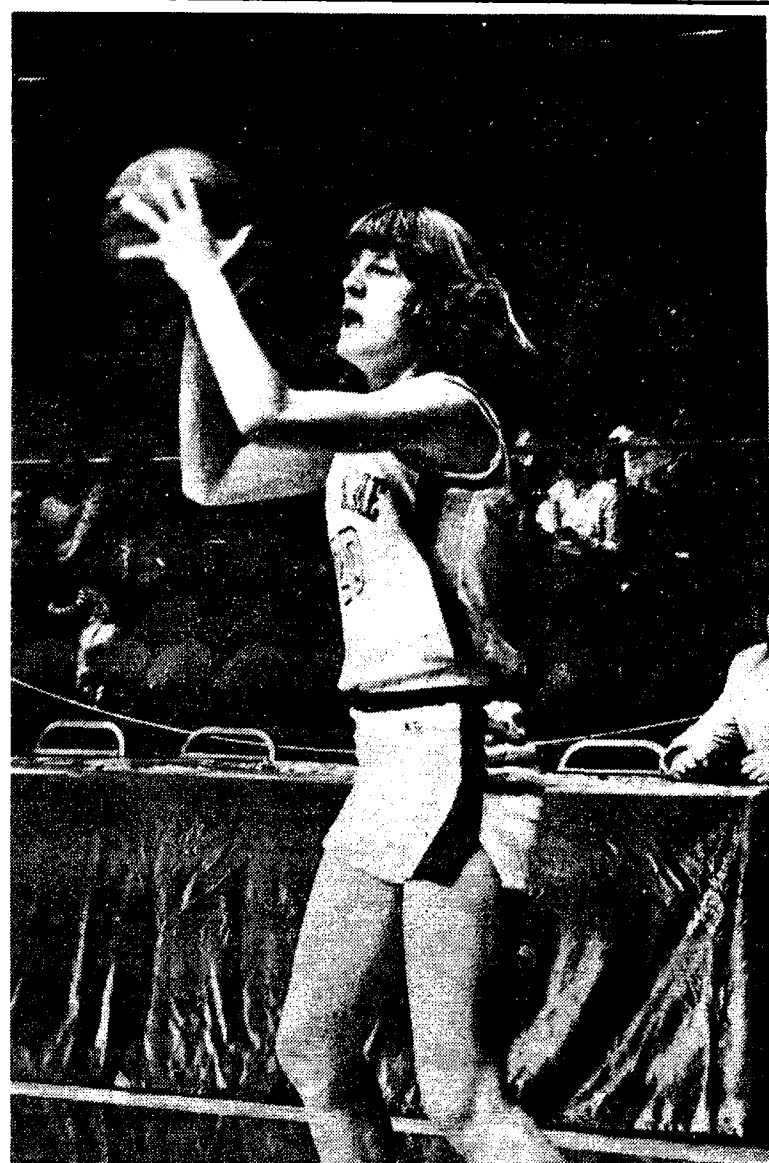

As far as goals are concerned, Schueth hasn't thought about them much. "I'm not sure what I want to do when I graduate," she says. "I'm thinking about majoring in either business or pre-med."

How about goals for this basketball season, Mary Beth?

"Our team goal is to make the NCAA tournament," she says. "We definitely have the potential to make it. We just have to keep listening to the coaches and playing consistently. Individually, I have to improve my free throw shooting. (At 40 percent, Schueth has the lowest percentage of the five starters.) But I'm working on that."

It's easy to tell that Mary Beth Schueth is a very intelligent girl who has her priorities straight. She is a credit to her coaches and her family when she says, "Please don't make me out to be a superstar. There are no superstars on this team. We all do the job together."

And as long as Mary Beth Schueth is a part of the team, the team will continue to do the job.

Mary Beth Schueth is leading the team in rebounds, and symbolizes the team with her spirit, determination, and level-headedness. See Dave Dziedzic's story on this page. (Photo by John Macor)

## Smith, Kitchel lead Big Ten scoring, stats

CHICAGO (AP) - Kevin Smith of Michigan State and Ted Kitchel of Indiana are running one-two in the Big Ten basketball scoring race.

Smith leads the race with a 21.1 average with 127 points in six games while Kitchel has a 20.8 average with 125 points in six games.

Keith Edmonson of Purdue is third with an 18.0 average followed by Clark Kellogg, Ohio State, 15.8; Randy Breuer, Minnesota, 15.7; Thad Garner, Michigan, 15.2; Jim Stack, Northwestern, 14.8; Perry Range, Illinois, 13.5; Trent Tucker, Minnesota, 13.5; and James Griffin, Illinois, 13.0.

Kellogg leads the league in rebounding with a 12.3 average per game. Brad Sellers of Wisconsin is second at 9.0 followed by Garner at 7.3 and Breuer at 7.2. Tied at 7.0 are Ike Person of Michigan, Russell Cross of Purdue and Bob Grady of Northwestern.

Derek Harper of Illinois and Kevin Stallings of Purdue are the assists leaders, averaging 5.0 per game. They are followed by Eric Turner of Michigan at 4.5, Smith at 4.2 and Dan Pelekoudas of Michigan and Steve Carfino of Iowa at 4.0.

Sellers has 19 blocked shots, Cross 15, Granville Waiters of Ohio

State 12 and Breuer 10.

Harper and Randy Wittman of Indiana are tied for the lead in steals with 13 each followed by Sam Vincent of Michigan State with 11.

Cross leads in field goal percentage with 25 of 38 for a .658 percentage. Kenny Arnold of Iowa is second with 26 of 41 for .634 followed by Person with 31 of 54 for .570, Range with 29 of 51 and 569 and Kitchel with 36 of 69 for .565.

Kitchel is the free throw leader with 47 of 52 for a .904 percentage. Larry Huggins of Ohio State is second with 15 of 17 for .882, followed by Jim Thomas of Indiana with 17 of 21 for .810. Breuer with 24 of 30 for .800 and Craig Tucker of Illinois with 20 of 25 for .800.

Indiana leads in four of six team categories. The Hoosiers are tops in field goal percentage at .509 followed by Minnesota at .502, Iowa .479, Purdue .473 and Illinois .461.

Indiana is tops in free throw percentage at .743 followed by Ohio State at .742, Michigan .721, Michigan State .720 and Purdue .713.

Northwestern leads in opponents' field goal percentage. Teams are shooting .404 against the Wildcats. Purdue is second at .420 followed by Iowa at .423, Indiana .426 and Ohio State .435.

Indiana is tops in rebound margin with a plus 3.9 average. Michigan State and Iowa are tied for second with a plus 3.5, followed by Northwestern at plus 1.6 and Minnesota at plus 0.2.

Today in History

In 1973, accords were signed in Paris ending the Vietnam War.

On this date:

In 1606, the trial of Guy Fawkes and his fellow conspirators opened in England.

In 1943, U.S. bombers staged the first all-U.S. air raid on Germany in World War II.

In 1944, the Soviet city of Leningrad was completely liberated from the Nazis in World War II.

In 1967, Apollo astronauts Virgil Grisson, Edward White and Roger Chaffee died in a flash fire aboard their space capsule.

Ten years ago, North Vietnamese negotiators at the Paris Peace Talks said there could be no Vietnam War settlement until the U.S. set a date for withdrawal of its troops and ousted the Thieu regime in Saigon.

Five years ago, states of emergency were declared in New York and New Jersey as a two-week-old natural gas crisis combined with bitter cold weather to cause thousands of layoffs in a dozen states.

## Tickets available Black Bears pawing Irish

By SKIP DESJARDIN  
Sports Editor

Last January, they billed it as "David vs. Goliath in Bangor." The University of Maine had broken into the world of big-time basketball, and were playing host to the nation's No. 1 team — DePaul.

With 1:30 to go in the ballgame, DePaul led 78-77, but the Black Bears had the ball. Guard Rick Carlisle found Clay Gunn all alone under the basket for an easy lay-up that would put Maine ahead.

It was the high point of Maine's struggle to reach a level of competitiveness in NCAA Division I basketball. That journey began in 1977, when Black Bear coach Skip Chapelle decided to develop a basketball team to rival the school's successful hockey program.

That first season, Maine began playing teams outside New England on a regular basis for the first time in over two decades. Chapelle told

Bear fans that, though the early going would be rough, the best way to build a winner was to play against winners.

In that first year, Chapelle scheduled games with Valparaiso, South Florida and Farleigh Dickinson. The next season he caught the attention of the entire state when the Bears took Marquette to overtime in Portland. The following season his squad beat South Carolina in the biggest win for the team in 20 years.

But Maine's climb stalled temporarily at the precise moment that Gunn took the pass from Carlisle in the game against DePaul.

He passed up the easy basket, the Blue Demons stole the ball, and pulled away to an 85-77 win.

When the season was over, Carlisle transferred to Virginia, and Champ Godbolt, the Bears' second-best player departed for Holy Cross. The team was embarrassed in Kentucky's Rupp Arena before the largest crowd ever to see a Maine team play, 100-54. Things, in general, fell apart at the seams.

"Throughout this season, we've had to face adversity," says Chapelle, who led Maine to its glory years as a player in the late '50s and early '60s. "The turnover we've had on this squad, and the schedule we've faced has made this season the biggest challenge of my coaching career."

Highlights of that schedule have included a third straight meeting with DePaul. Maine led the Demons through much of the first half, but could not keep up with the strong DePaul attack in the second stanza and lost 90-67.

Another ranked team visited Maine and found out how tough it is to play before the fans there. Alabama trailed as late as midway through the second half before Bobby Lee Hurt and Company pulled away to a 16-point win.

## Double win Notre Dame wins triangular

By BRIAN REIMER  
Sports Writer

What a difference a week makes! Last Thursday, the Notre Dame wrestling team fell to Bowling Green by a 44-2 count. Last night, the Irish won a triangular over Eastern Michigan and DePaul in a dramatic style. DePaul was no match for Notre Dame, as the Irish ran away with a 54-6 victory, but the win over Eastern Michigan was a 24-20 classic.

Shawn Moloney, a 190-pounder, 126-pounder Joe Andreotti, 150-pounder Joe Agostino, 142-pounder Don Heintzleman and heavyweight Larry Kissner recorded pins against DePaul. The Irish won three other matches by forfeit, but had to surrender a forfeit at 118-pounds to ruin hopes of a shutout.

Doug Skinner had to withdraw from the line-up in the afternoon

due to an injury, but his loss was balanced by the long-awaited return of 167-pounder Phil Baty. Coach Brother Joseph Bruno took advantage of the situation to juggle the Irish line-up against Eastern Michigan.

After the usual Notre Dame forfeit at 118-pounds, Craig Petoskey won a regular decision over Don Heintzleman in an exciting match to put Eastern up by a 9-0 count. The Irish drew to within three on a pin at 167-pounds, but the deficit returned to nine after Larry Kissner was pinned by Joe Showerman at heavyweight to close the first session.

Curt Rood won a superior decision at 134-pounds to close the margin to four and 158-pounder Brian Erard knotted things up with a major decision victory. The score remained tied at the close of the second session when 190-pounder

Shawn Moloney tied Eastern's Shawn Thacker. Joe Andreotti lost at 126-pounds to put the Irish down by three, but Joe Agostino gave Notre Dame its first lead with a major decision at 150-pounds. Phil Baty then celebrated his return to the line-up with a dramatic win at 177-pounds to seal the victory and give The Irish a 9-2 record.

## Ron, Irish 'Rowan' toward soggy Maine

Bill Marquard  
Sports Writer

Irish Items

**WITHOUT MIRRORS** — The Irish head into tonight's Maine game riding their first two-game winning streak of the year. But they also seem to be riding an intangible high which started against San Francisco two weeks and five games ago.

Over those last five games, the Irish own a respectable 3-2 record, with their only two losses being to Top 20 teams San Francisco (57-55) and Villanova (48-46). The Irish had a chance to win both of those contests, and only lost each of them by two points.

At the same time, Digger's squad has held its opponents to 57 points or less in those five games, holding three foes under 50. In so doing, the Irish dropped their points-allowed average 5.5 points from 66.1 to 60.5 per game. The Irish have also outscored their opponents by better than 3 points-per-contest during the span.

Maybe as a sign of experience or more aggressive play inside, the Irish have drawn the same number of fouls — 57 — as they have committed over the two-week stretch, while outrebounding their opponents by eight caroms, 122 to 114. Offensively, Notre Dame has out field goaled (apologies to the English Department) their foes 109-107 and has out free thrown them 47-35 in only six extra attempts.

**TRIAL AND ERROR** — Although Phelps has employed six different starting lineups this season, the same fivesome of John Paxson, Mike Mitchell, Tim Andree, Bary Spencer and Bill Varner have started the past four games. The only difference in the lineup at San Francisco was Tom Sluby, who started instead of Barry Spencer in lineup variation number 5.

**THE BEAVER FALLS CONNECTION** — One of the keys to Notre Dame's recent success has undoubtedly been Ron Rowan. The freshman from Beaver Falls, Pa. (the same hometown as Frank LaGrotta, but don't hold that against Ron), has led the Irish in scoring in three of the last four games, netting 13 against Davidson, 14 vs. Maryland and a career-high 17 against Idaho on Monday. During the same four games, Rowan has shot 16 of 23 (.696) from the floor and hit on 12 of 17 (.706) free throws, adding 11 rebounds and five assists.

His statistical performance is even more remarkable when one considers that, prior to the Davidson game, the 6-5 guard had only hit on 3 of 20 field goal attempts (.150) and 1 of 3 free throws (.333). Thus, he has scored 44 of his season-total 51 points in the last four games alone.

His cool performance at the free throw line as a freshman reminds one of two other recent Notre Dame backcourt standouts. Rich Branning, who graduated from Notre Dame in 1980, went home to California and sunk the crucial free throws in Notre Dame's 66-63 upset of UCLA on December 11, 1976. It was The Bruins' first non-conference loss in Pauley Pavilion, and snapped a 115-game non-conference home winning streak.

Another freshman named John Paxson sank four free throws in the final five seconds to hand UCLA a 77-74 loss on December 11, 1979 in the ACC.

**HOME, SWEET, HOME** — The Irish are 2-1 during their current seven-game, 17-day, mid-season homestand. All of Notre Dame's victories this season have come in the friendly confines of the ACC, and the Irish own a 5-4 mark at home this year.

This is the eighth year that Phelps has scheduled an extended string of home games like this right after Christmas break. Usually there are between seven and ten straight games, either all at home or with one intervening weekend road trip. Remarkably, the Irish have never lost more than one game during this annual home string, losing a single homestand contest each year since 1974-75, with the exception of a perfect 8-0 mark during the 1978-79 campaign.

Of course, the last time the Irish lost more than three games at home (they were 10-3 in 1972-73) was Phelps' first year, when the Irish managed a 3-9 record in the ACC. Notre Dame's 14-year record in the facility stands at 169-32 (.841), while Phelps is 135-26 (.839) before the watchful eyes of the Notre Dame community.

**SUDDEN LIFE** — Monday's victory over Idaho was Notre Dame's eighth overtime victory in the ACC against two losses. The Irish have won two straight and five of the last six overtime affairs at home, their only two extra-half losses at home coming at the hands of DePaul (69-68, February 12, 1978) and Ohio State (81-75, December 4, 1972).

**CALL YOUR NEAREST TRAVEL AGENT** — Prior to Monday's game, Idaho experienced a traveling odyssey that would have rivaled the best "economy" tour package any discount travel agent could have concocted.

Following their Saturday night game against Montana in Missoula (sounds like...), the Vandals faced weather for which Dick Addis' weather word would have been unprintable. The Vandals drove for four hours in rented cars to Spokane, Wash., mostly through a mountain pass which was supposed to be closed. After napping at the Spokane airport, the team caught a plane for Minneapolis, connected to Chicago, and bussed into South Bend, arriving at 3:30 a.m. Monday morning.

They then practiced in the ACC at noon.

**BEGINNER'S LUCK** — One could tell on Monday that Idaho had not done quite enough research about Notre Dame before the game. When the visiting team comes out to practice before the game, they practice on whichever end of the court they want to go toward in the first half, understanding that they will go the opposite direction
