SLC sets Appeals Board Soph cars also discussed

By Don Ruane

In a meeting last night the Student Life Council unanimously approved the recommendation of the Appeals Board Nominating Committee that Law School Dean William B. Lawless, Sociology professor John Koval and Junior Greg Potts be appointed to the Appeals Board provided for in the judicial code enacted on May twenty-seventh.

The board will hear any appeals to decisions handed down by the University Board. It has the power to uphold University Board decisions or send cases back to the board if it feels the evidence presented does not justify the verdict.

Lawless, Koval and Potts represent the administration, faculty and students respectively. Alternates for each area were also appointed at the meeting. They are Administrators: Freshman year dean William Burke, Asst. Dean of Business Administration Vincent Raymond and Asst. Dean of Arts and Letters Robert Waddick; Faculty: Mechanical Engineering Professor Albert E. Miller and Electric

cal Engineering Professor Arthur J. Quigley; Students: Juniors Peter Boid, and Tim Kuntz and Sophomore Steven Jeselnick.

The alternates will serve when an appointed board member cannot serve on any given case. The board members and alternates were nominated by a three man committee composed of Professor Paul F. Conway, student Mark Zimmerman and University Vice-President and General Counsel Philip J. Faccenda.

In the only other business brought to the floor at the meeting, the issue of Sophomore cars on campus was assigned to a committee until all related problems could be considered and the committee can present one proposal regarding the feasibility of the issue to the entire SLC. It is hoped that the proposal will be made before the end of the semester.

The committee will consult with University Provost Rev. James T. Burtchell regarding academic considerations and with Vice President of Business Affairs Rev. Jerome J. Wilson to consider the costs of keeping a

car on campus. The costs include security patrols, preventive lighting and maintenance of the parking lots.

Discussion of the issue was opened by Dean of Students Rev. James L. Riehle who presented arguments against the proposal. "I honestly just don't believe we have space for an additional three or four hundred cars," said Riehle. He said this year's freshmen class is the largest yet and that percentage wise, there will be more cars by the time the present sophomores are seniors than at present.

Personally, Riehle said he sees "nothing incompatible" about

The SLC

anyone having a car on campus but the parking facilities cannot accommodate that many automobiles.

Sophomore Class Executive Coordinator Gary Caruso responded to Fr. Riehle's presentation. He proposed that the rear

of the C2 lot (an off-campus lot located north of the aero-space building) be surfaced with gravel and be designated D3 for on-campus parking. The off-campus students would park in the lot

Clarke prophesies of 2001

By Art Ferranti

Arthur C. Clarke, inventor of the first communications satellite in 1945 and co-author of the novel and movie *2001, A Space Odyssey*, spoke last night on life in the year 2001 to a capacity audience in Washington Hall.

Following introductions by Prof. Emil Hoffman and Dean Waldmen, Clarke first set the audience at ease with a few anecdotes concerning the motto of the Mystery Writers of America ("Crime does not pay - enough") and that of the Science Fiction Writers of America ("The future is not what it used to be"). This "modern Jules Verne" said this was the first time in history man has begun to look seriously toward his future. He said that it

Arthur C. Clarke

was an impossibility to actually predict the future but he did outline possible future technologies.

He pointed out that in the past new inventions were doubted and that their far reaching effect on the role of man was not foreseen. He predicted two definite events of the future, though: (1) contacts with extraterrestrials and (2) the Rise of the Ultra-intelligent machines. When that happens, he quipped, "all bets are off."

The year 2001, said Clarke, is as far off as 1890 because 1890 was the beginning of a new era

of technological advances beginning with piped water, indoor plumbing, gas heating and cooking, the telephone, and the electric light. Once family units were very self-contained but even now that is changing immensely. The only home preparation now left is the meals, said Clarke, and that will soon be in the past due to dehydrated foods (approximately 90% of all food is water). One hundred pounds of food per family per month would be all that is necessary to sustain life. All one would have to do is add water and cook for 10 minutes.

Natural reproduction of animals may possibly be outlawed due to the slowness of this process compared to the need of the people. Clarke said, "For every man to eat a pound of meat, ten men must starve." The answer is to turn to new food sources such as the hippopotamus and the sea.

Clarke pursued the latter point in detail pointing out that man is still a primitive hunter and that his new domain will be the sea. We will go to the sea for new farming techniques and man may possibly herd whales. This brought up the moral question man having the right to slaughter mammals with nearly the same intelligence as man such as the whale and dolphin. Clarke jibed that we had better not start killing dolphins since they are one of the few animals left which seem to get along with man.

Inevitably, though, the main bulk of the food production of the future will come from inorganic materials, said Clarke. Already in England beef is being synthesized to the point that the protein one would eat would look, smell, and taste like beef and only sell for 15 cents a pound. Three percent of all the petroleum if converted to protein can feed all of mankind. This would phase out agriculture, Clarke said, and o-

pen up a tremendous amount of land which Clarke hoped would be left for wilderness which man needs both physically and mentally.

It will cost billions to make the machinery necessary for his food conversion, Clarke said, but that once this is made the cost will be relatively small.

We will go back to the village as a way of life in the future, Clarke claimed. We will learn how to store electricity and have completely mobile homes. There will be no shortage of space.

According to Clarke, we are now on the verge of the greatest communication revolution in history. Two advances of modern science have put us at that point, said Clarke. They are the coming of solid stage electronics initiated by the invention of the transistor and the communications satellites. At the end of the century, Clarke proposed, there will be enough communication satellites in orbit "for the whole human race to pair off and talk to itself."

Instead of telephones in our homes we would have a device with a television screen audio devices, and a small computer. This, said Clarke, would mean the end of newspapers because all one would have to do is look on this TV screen and zoom in what he wishes to read. One could also read any piece of literature ever written by dialing into a universal library and letting the selection appear on the screen providing of course, that we do not mis-dial the needed 30 digit number.

The most important use of this system in the opinion of Clarke is direct broadcasting from space. This will not appear in this country for another ten years but plans are already being laid down in India for such a system. For each receiving unit it would only cost the government a few thousand dollars

(Continued on page 4)

Meagher speaks of women

By Ann Therese Darin

Robert Meagher, Notre Dame theology professor, added a new dimension to the women's liberation movement last night by claiming that although women should not be denied their rights, they should evaluate the worth of those rights to see if they are worth fighting for.

Sympathizing with woman and "her apparently sterile life and home amounting to a cyclical accomplishment of nothing," Meagher championed the cause of women's equality by reading some remarks which he intends to publish in an article for the *St. Anthony's Messenger*.

"We can't deny people the right to feed at the trough," he explained. Although he supports woman in her freedom drive, he termed the values that she is striving for as worthless.

He cited education as one example of lost significance. It has degenerated, he revealed, "into a massive four-year version of a summer camp in which the imagination is progressively deadened for what society calls a job."

Reminder

There are still 500 football tickets needed for all the children invited to see the Georgia Tech game this Saturday. *The Observer* urges you to donate your ticket at the ACC ticket office before five o'clock today. Your generosity will be appreciated for years to come by an underprivileged child.

He also attacked the present concepts of marriage and maturity. "We need to seriously give children meaningful rituals so that when they come of age, we don't give them the car keys and a can of beer or a military uniform and we won't marry them in a carnival atmosphere that quickly collapses," he continued.

In their place, he, repulsed in the same way as Miss Jane Fonda by the great stress being placed on materialism, would reinstitute the basic function of human life instead of concentrating on political activities as Miss Fonda has advocated. He would reconstruct the human situation with a greater emphasis on personal human experiences - opposed to the purely mechanical value of production.

Specifically, he suggested the expansion of the nuclear family unit to a more communal way of living. He also encouraged a more complete experience of and reverence for the significant events of human life such as, birth, death, coming of age, and coming to know by placing them back into the home.

To illustrate the dilemma of today's values, he quoted a Shoshone Indian chief, "You ask me to cut the grass and make hay and sell it, and to be rich like the white man. But how dare I cut my mother's hair? Shall I take a knife, the plow and cut my mother's breasts? My young men will never work. Men who work cannot dream and wisdom comes in dreams."

We are adoptive parents. Our children were given the gift of life by men and women other than ourselves. Our children live now because these women and men chose life instead of death. We can never comprehend the suffering they endured. But we shall always be thankful for their courage and generosity. Their gift of life shall flourish.

Peter Grace back in news

A rumor leaked by an administrative source that University Trustee J. Peter Grace had refused to make any financial contributions to the University this year because of an incident last spring was termed "unfounded and false" by Grace yesterday afternoon from his executive office in New York City.

Grace, who is President of the W.R. Grace Company based in New York said he has not been asked to contribute this year and that he is still completing payments on a pledge from last year.

Last May Grace was asked to defend his company's interests in Latin America. In town for a Board of Trustees meeting, Grace met with a number of students in the Library Auditorium. At the meeting Grace read statis-

tics indicating that the W.R. Grace Company was interested in the people of the area and not just profits.

Several students challenged the figures and questioned Grace's integrity, claiming the facts were fabricated. One student acknowledged by Grace to present a question climbed on

Soph car privileges discussed

(Continued from Page 1)

south of the stadium.

Caruso said the new off-campus lot would be empty after class hours except for those who are studying in the library and would be empty overnight and on home football weekends and ACC events. The new D3 lot would satisfy the sophomore requests for this year and

stage and began reading from a pamphlet that American corporations are interested solely in profits and not the people who work for the corporations

Grace said the response was generally favorable but some individual responses were "unsatisfactory." He described these individuals as "a few bad apples."

possibly for the next few years.

Fr. Reihle replied that the new D3 lot would not satisfy sophomore needs because the lot is now used by a large number of faculty members and this usage will increase when the new biology building is opened. As for putting a gravel surface behind the present C2 lot, Reihle said this would amount to putting a gravel surface in the outfield of the baseball diamond.

He explained that even if there were areas that could be surfaced with gravel it is too late to begin the project because the worst months for weather are beginning to arrive. There would be problems with mud and snow because the gravel would not be well packed and is difficult to plow when covered with snow.

After further discussion student representative Tom Schoaf asked the committee to produce one proposal, hopefully before the semester's end, as to the feasibility of sophomore car privileges. The proposal was amended to include consultation with Fr. Burtchael and Fr. Wilson.

Correction

There were a couple of errors in yesterday's lead story regarding the Sunday Night Senate meeting.

First, the budget the Afro-American Society presented to the Senate requested \$3810, not \$6310 as reported.

Second, Chuck Ryan, Sorin Senator was not the person who spoke against the idea of making allocations in order to be considered "a good guy."

These errors were not made maliciously or deliberately. The Observer wishes to apologize for any inconveniences caused by these errors.

You know him, but have you ever been to his house?

Sure, you got through Shakespeare in class. You can even quote lines from his plays.

But have you ever walked down the streets where he walked? Like Henley Street where he was born. Or visited Hall's Croft, the home of his daughter Susanna? Or some of the other homes he held dear? Because only then can you truly understand the man and his times.

There's so much more you can learn about history simply by being where it happened.

Texas' close call tightens poll race

(UPI) — Stanford has its bowl of roses but Texas' drive toward the Cotton Bowl and a national title met near disaster.

The No. 5 Stanford Indians clinched their first trip to the Rose Bowl with a 29-22 victory over Washington Saturday that featured Jim Plunkett's four touchdown passes.

Texas ranked No. 1, is seeking a double slam as collegiate champion and the Southwest Conference Cotton Bowl representative this season.

Third ranked Ohio State moved closer to a Rose Bowl bid by creaming Wisconsin 24-7 and No. 2 Notre Dame took a giant step toward a Cotton or Orange Bowl invitation with a 46-14 demolition job on Pittsburgh.

Fourth ranked Nebraska, the Big Eight Conference's potential Orange Bowl entry, mauled Iowa State 54-29.

Only one of the top 10 ranked teams met defeat Saturday — seventh rated AirForce, losing to Oregon 46-35. Sixth

ranked Michigan beat Illinois 42-0. No. 8 Arkansas trampled Rice 38-14. No. 9 Auburn swamped Mississippi State 56-0 and tenth rated Tennessee edged South Carolina 20-18.

Individual performances counting toward the Heisman Trophy were in evidence among the nation's All-America candidates, but Mississippi's bowl dreams and Archie Manning's trophy ambitions were both chilled when the Ole Miss quarterback broke his left forearm during a 24-13 win over Houston. Manning threw two scoring strikes before his injury.

Plunkett established his right to individual honors with the touchdown pass barrage for Stanford. The fourth TD toss overcame Washington's 22-21 lead in the final period and brought Stanford the Pacific Eight Conference title and the first trip to Pasadena in 19 years.

Notre Dame quarterback Joe Theismann guided the Fighting Irish to their seventh straight win as he threw three TD passes

and ran up 381 yards in total offense. Theismann's performance gave him a varsity career total of 4,853 yards, a school record that surpassed the marks of Terry Hanratty and the legendary George Gipp.

Texas compressed its scoring into three second period touchdowns against Baylor with fullback Steve Worster going over

from the one twice and quarterback Eddie Phillips scoring on a five yard keeper.

Fullback John Brockington scored all three Ohio State touchdowns on runs of 11, 4 and 1 yard and Fred Schram booted a 23 yard field goal for Ohio State as the Buckeyes remained unbeaten and untied through seven games. State has

an easy opponent in Purdue this Saturday and then meets tough Michigan in its Big Ten finale.

In other top games Arizona State beat San Jose State 46-10; LSU topped Alabama 14-9; San Diego State nipped Pacific 14-13; Dartmouth drubbed Columbia 55-0; and Toledo beat Northern Illinois 45-7. Tampa, the small college leader, defeated Southwest Louisiana 59-38.

Ruggers raise record

by J.W. Findling
Observer Sportswriter

The Notre Dame Rugby Club added another victory to its fine fall season by pasting John Carroll 20-11 on Saturday morning behind Stepan Center. It was a see-saw battle, and the Irish ruggers, who now have a 5-1 season record, did not pull away until the second half.

John Carroll, who were 6-1 coming into the game, opened quickly with a try and a conversion to secure a 5-0 lead. But Notre Dame wiped out the Blue Streak lead with two tries—one a blazing 40-yard dash by Herb Giorgio, the other a powerful run by Charley Blum. Both Irish conversions were missed, and a penalty kick by John Carroll gave the Blue Streaks an

apparent 8-6 halftime lead. Then little Bill Berry, who is certainly one of the finest halfbacks in the Midwest, exploded on a brilliant 30-yard run into the end zone. It was Berry's first score of the season, and after Charley Blum's conversion, the Irish led at halftime 11-8.

In the second half John Carroll tied the game early with another penalty kick. The winning Irish points came after a high kick by Blum. Tom Herlihy caught it and lateraled it to Berry. Berry tossed the ball to Giorgio who ran in for the try. Pete Hartney and Mark Rubinelli both added tries later in the half to complete the scoring.

Once again the game was highlighted by the fine defense and kicking of Jim Hagenbarth. Phil Krause and John Zukaitis did a

fine job of controlling the line-outs for the Irish.

The Notre Dame "B" team suffered their second loss in a real heartbreaker 8-6. The Blue Streaks scored a try just before the game ended for the victory. The "B" team is now 4-2.

The Irish ruggers play their last home game next Saturday morning behind Stepan against the Chicago Lyons Rugby Club. The Lyons team is considered as one of the three best in the Midwest (along with the Irish). "B" game starts at 9:00 am followed by the "A" game. It should be a great game. So, if you're giving up your ticket to the Georgia Tech game and you still want to see some good hitting on Saturday, the rugby game will substitute nicely. It won't be on TV.

Jim Donaldson

Sports Shorts

And now it's a two-man race for the Heisman Trophy. A race between Jim Plunkett, who fills the air with footballs at Stanford, and that wee lad, Joe Theismann, who quarterbacks the Fighting Irish.

Early season contenders Jimmy Jones of USC, Rex Kern of Ohio State, and Archie Manning of Mississippi have fallen by the wayside. Jones' Trojan club has lost three games and tied another and he is, for this season, a forgotten man. Kern's Buckeyes are unbeaten but Rex isn't performing as well as had been expected. Manning, who received such a great pre-season buildup, largely lived up to his reputation but his broken arm, suffered last Saturday, will hamper his chances of receiving college football's top individual award.

That leaves Plunkett and little Joe.

Plunkett is probably the best passer in the college ranks this season. He has accounted for more total offensive yards than any other player in major college history. He should be the first quarterback selected in the professional football draft. Those are just a few of his most impressive credentials.

But I'd like to do a little tub-thumping for Theismann.

The Irish have had some great quarterbacks through the years. Paul Hornung, John Lujack, Angelo Bertelli, Ralph Guglielmi, John Huarte, and Terry Hanratty have starred at QB for Notre Dame. All were first team All-Americans at least once and four, Hornung, Lujack, Bertelli, and Huarte, won the Heisman Trophy. And Theismann is better than all of them. At least the record book says so.

Last Saturday against Pitt the South River Roadrunner displaced Hanratty as the all-time Notre Dame leader in total offensive yards and moved ahead of the immortal George Gipp in total performance yards. If Theismann can maintain his current season and career completion percentages he will set records in those categories.

His three touchdowns tossed against the Panthers boosted Joe's career total to 29, more than any other passer in Notre Dame history. Theismann needs but three more TD passes this season to set a single season record for touchdown passes.

In addition to his outstanding statistics, Theismann has earned praises for his proficiency as a quarterback from the coaches of Notre Dame and the seven clubs he and the Fighting Irish have demolished this season.

Carl DePasqua of Pitt said, "He's the best I've seen in a long, long time and that takes in 17 years of coaching."

Rick Forzano of Navy — "Any great team like Notre Dame has to have one super player that makes it go. It's obvious that... Theismann is the man that does this."

Mizzou coach Dan Devine claimed Theismann was "the best quarterback I've seen in a long time. He can throw from any position and he is a good leader."

And Joe is a winner. Since taking over the quarterbacking chores from Hanratty in the next-to-last game of the '68 season Theismann has directed the Irish to a 16-2-2 record.

At a luncheon in Chicago the week after Notre Dame's victory over the Missouri Tigers Theismann was quoted as saying, "It's a nice dream and what kid wouldn't want to win the Heisman Trophy? But right now I just want to win five more games for Notre Dame."

He and his mates have won two of those five games and, now that they are ranked No. 1 in the country the pressure will really be on them to win their last three games. But Theismann thrives on pressure and, at season's end, Moose Krause could very well add two trophies to the glittering collection in the Convo — the national championship trophy courtesy of Ara's Fighting Irish, and the Heisman Trophy, courtesy of Joe Theismann.

Booters top West. Illinois

The Notre Dame soccer club turned in one of their best performances this season last Saturday as they handed a highly touted Western Illinois team a 5-3 setback behind the Stepan Center.

The Irish booters built up a 4-0 lead early in the third quarter of play but Western Illinois struck back for three tallies in the third stanza to keep the pressure on. The Irish did not fall apart, however, and Rick Coleman put the game out of reach of West. Illinois by heading in a 15 foot shot in the fourth quarter for Notre Dame's final goal.

Hugh Schoemaker notched the game's first marker, left-footing a short shot into the lower right-hand corner of the net midway through the first quarter.

Jack Goldkamp chipped a 25 yard shot into the net in the second quarter, kicking the ball just under the crossbar and over

the goalie's out-stretched hands, to send the Irish off the field at halftime with a 2-0 advantage.

The Notre Dame booters appeared to have the game wrapped up when they added two quick scores early in the third stanza and built up a 4-0 lead. Chris Hanlon took a pass from Mike Macken, who had a free kick, and drilled the ball into the net from short range for Notre Dame's third tally and Gary Troy netted a short shot

for the fourth marker.

Western Illinois suddenly came alive, however, striking back for three goals before the end of the third quarter to cut the Irish lead to 4-3.

Coleman's fourth quarter goal provided the clincher for Notre Dame however.

The Irish booters now boast a 5-4-2 record this year. They are in action again this weekend, traveling to Washington U. in St. Louis for a Sunday encounter.

Archie is hospitalized

MEMPHIS, Tenn. (UPI) — Mississippi quarterback Archie Manning was admitted to the Campbell Clinic section of Baptist Hospital Sunday in preparation for surgery on his broken left arm which apparently has ended his collegiate football career.

Manning, accompanied by his mother and fiancée, was checked quietly into the hospital and placed in an eighth floor room to await surgery planned for this morning.

Manning said doctors had assured him his injured arm would be as "good as new" after surgery.

Obviously downhearted he said he would help Ole Miss in any way he could from the sidelines for the rest of the season.

The red-haired senior broke the arm in the third period of the Houston-Mississippi game Saturday as he was trying to pass. Earlier, he had thrown two touchdown passes to start the Rebels on a 24-13 victory over the Cougars.

"Archie said 'Coach I've hurt my arm. I can't stay in'" interim Coach Frank Kinard said.

Two hours later X-rays at Lafayette County Hospital showed a fracture of the radius, the large bone in the left forearm just above the wrist.

It was an abrupt halt to a spectacular three year college football career that many believed would culminate this season in a Southeastern Conference championship for the Rebels, a 14th consecutive major bowl appearance, and the Heisman Trophy for Manning.

Dillon, Keenan reach playoffs

Interhall football playoffs will begin Sunday with Keenan meeting Breen-Phillips at 1:30 for the North Quad championship, and Dillon facing Morrissey at 2:45 for South Quad honors.

Dillon eked out an 8-6 victory over Alumni Sunday to win their division title. Alumni was stopped on the one yard line on the final play of the game, following a pass interference play that began on the Dillon eight yard line. The ball was placed on the one, but Dillon held and preserved their victory. Dillon had scored on a three yard run and made a two point conversion on a broken play. Alumni scored on a 10 yard pass that was dipped by a Dillon defender.

In a rugged defensive battle, Keenan edged Grace 6-0 and won their conference title.

UPI Poll

The results of Yesterdays poll of football coaches were a little close to say the least. Texas the defending champion and on-rushing Notre Dame have tied for the Number One position. Each posted 13 first place votes and a combined 310 points.

1. Notre Dame (13) 7-0 310
2. Texas (13) 7-0 . . . 310
3. Ohio State (7) 7-0 . . . 281
4. Nebraska (2) 8-0-1 . . . 243
5. Michigan 8-0 . . . 218
6. Stanford 8-1 . . . 176
7. Auburn 7-1 . . . 108
8. Arkansas 7-1 . . . 85
9. Louisiana St. 6-1 . . . 69
10. Tennessee 7-1 . . . 52
11. Arizona St. 7-0 . . . 41
12. Air Force 8-1 . . . 14
13. Mississippi 6-1 . . . 12
14. Dartmouth 7-0 . . . 7

19. Toledo 9-0 . . . 1

Clarke talks of man's future

(Continued from Page 1)

compared to the billions spent on the land communications systems of today.

Clarke pointed out that this was a practical use of space exploration to solve a social problem. "One TV set in a village could start a revolution," said Clarke. They would be used for educational purposes and

The impact of communications on the future will be "overwhelming" said Clarke. Just as the railroad and the telegraph made possible the United States of the past, so now will the jet plane and communication satellites make ready the future.

This universal communication system may bring about the use of only one language. Clarke made the analogy of the communication satellites with the ill-fated tower of Babel of biblical times. Of course this system would bring about many problems of time, said Clarke, but we would have to synchronize our watches the world over so everyone would get up and go to work at the same time. Since some people would get the raw end of the deal two possibilities were hypothesized by Clarke. They were: (1) to abolish

sleep—which is highly unlikely, or to (2) make the days four minutes shorter which would allow all the people to work in six months of daylight hours and six months of night hours.

Another major point of importance with this machine, said Clarke, is that man would never have to leave home to go to work. Variations of this device could permit even a brain surgeon perform an operation at home on a patient somewhere across the nation with accurate remote control arms, said Clarke.

Another effect would be the death of the city. To be sure, said Clarke, by the year 2001 we will have larger cities but like the dinosaur of prehistoric times they will cease to exist and all that will remain are the steel and brick skeletons of a past era.

Clarke said that it would take

a long time to reach stability once these changes are enacted. We will have robots for slaves and they will operate in ways as diverse as washing machines or miniature H.A.L. computers of 2001 fame. We will eliminate 99% of all human activity and will have universal leisure with no un-employment.

The greatest industry in the world will be education, said Clarke, and second to that will be entertainment. "Only the educated will survive because the uneducated will die of boredom," concluded Clark.

With the conclusion of his speech, Clarke left Washington Hall and spoke with students and faculty in the Rathskellar of the LaFortune Student Center. This was the first in a series of lectures sponsored by the Arthur J. Schmit Foundation of Chicago.

Thefts and assaults reported

By Pat Gooley

A large number of violations were reported to campus security this weekend. None were very serious, but many fell into the increasingly recurrent pattern of weekend vandalism.

There were smaller thefts — a jacket and a car license plate; vending machine vandalism — a cigarette machine in St. Ed's and

a candy machine in the engineering building; and larger thefts — a sofa from the second floor of the South Dining Hall and five wallets stolen from members of a visiting soccer team. Two groups of ND students were apprehended for stealing barricades and signs from nearby campuses and apartments. Three false fire alarms occurred on Saturday: in Holy Cross, O'Shaughnessy and Flanner Halls.

There were also incidents of a malicious nature. A security force car was sprayed with material from a fire extinguisher out of Morrissey Hall or one of its neighbors, and acid reactions caused some damage to the paint job. Black paint was found sprayed on sidewalks near the

Grotto, as well as on the main altar and statue there. A screen leading to the Sacred Heart crypt was torn off when someone tried to enter the building.

In addition, there was another incidence of personal assault reported to the security office. Two students were attacked near Alumni Hall Saturday night. The two assailants fled when other students came to the aid of the victims.

Reports of a bombing at the ROTC building proved false. Campus Security Chief Arthur Pears declared definitely, "There was no bombing attempt at the ROTC." Enquiries at ROTC headquarters brought a similar response.

Mary Chris —
Hope your footsie gets better real soon.
Love,
The Staff

A Phonograph is no Better Than Its' Pickup Cartridge

True high fidelity sound re-creation begins at the source of sound. Just as a camera is no better than its lens, a phonograph system is no better than its cartridge. This breathtakingly precise miniaturized electric generator (that's what it really is) must carry the full burden of translating the stereo record groove into usable electrical impulses — and should do this without adding or subtracting from what is on the recording. Knowing this, Shure quality standards are rigidly maintained at the highest levels.

V-15 SHURE
Type II (Improved) \$67.50
Phono Cartridge

The overwhelming choice of critics

RMS Audio also features the Shure M91E cartridge — second only to the incomparable V15-II. This very popular cartridge has a list price of \$49.95, but sells at RMS for only \$25.00.

15,800,000 COLLEGE STUDENTS CAN'T BE WRONG

By conservative estimate more than fifteen million college students have used Cliff's Notes since we became America's first literary study aid. This preference continues to build — for two big reasons:

1 / QUALITY — The easy-to-understand commentary and explanation you get from Cliff's Notes result from painstaking work by our board of authors. Predominantly Ph.D.'s, these scholars are specially selected for their knowledge of particular works and for their ability to make these works meaningful to you.

2 / AVAILABILITY — Cliff's Notes concentrate on giving you all the plays and novels most frequently assigned in college. If your dealer is temporarily out of the title you need, ask him to call us on his special "Hot Line."

Buy Cliff's Notes today — they're a bargain in understanding college literature assignments.

Lost in the direction of Saturday's sunset, probably as a tag-along companion to children: a nine-months old, brown and white, male cocker spaniel answering to the name of DARBY O'GILL

Chiefly notable as the love object of the Rector and maids of Keenan. Principally addicted to carmel corn, the girls of Regina, animals to scamper on the lawns with, and a privately-owned, red rubber boot.

If found, please contact the Kennel Master, 120 Keenan Hall tel. 283-7011.
