Documentation

Errors and Omissions

The following errors in the *Index for Notre Dame Report* vol. 30 were reported:

Janice M. Poorman, associate dean and associate professional specialist in the Graduate School, and concurrent associate professor of theology, was inadvertently listed under **Rev. Mark Poorman, C.S.C.**

The listing for **John A. Weber**, associate professor of marketing, was inadvertently divided into two listings.

FACULTY BOARD ON ATHLETICS

Meeting of May 10, 2001

Members present: Prof. Fernand Dutille (chair); Prof. Matthew Barrett; Prof. JoAnn DellaNeva; Prof. Joseph Guiltinan; Dr. Kate Halischak; Prof. Blake Leyerle; (Rev.) Mark Poorman, C.S.C.; Prof. James McAdams; Prof. Clark Power; and Prof. Kerry Thomas

Members absent: Prof. William Berry; Prof. John Borkowski; Mr. Lou Nanni; Ms. Laura Patterson; and Dr. Kevin White

Observers present: Ms. Missy Conboy (associate athletics director) and Ms. Mary Hendriksen (recorder)

1. **Call to order and prayer:** The chair called the meeting to order at 4:20 p.m. Father Poorman led the group in prayer.

2. **Minutes:** The chair reported Prof. Thomas' wish that the minutes of the April 26, 2001, meeting reflect the point he made concerning off-campus housing: Statistics concerning the academic performance of students moving off-campus may not be as helpful as they seem. We should, Prof. Thomas noted, pay close attention to those involved in the issue, for example the director of athletics. Subject to this revision, Prof. Leyerle's motion to approve the minutes, seconded by Father Poorman, passed unanimously.

3. **Announcements:** The chair congratulated Prof. DellaNeva and Prof. McAdams

for receiving Kaneb Teaching Awards. Prof. Leyerle and Fr. Poorman have been similarly honored in the past.

The chair congratulated Prof. Barrett on his re-election as law-school representative to the Board for a three-year term.

The chair noted for the record that he had, on behalf of the Board, presented four Byron V. Kanaley awards at the All-Sports Banquet on April 30. The honorees: Matthew Hedden (men's swimming); Connor LaRose (men's soccer); Michael Naumann (baseball); and Ruth Riley (women's basketball).

The chair announced that on the Board's behalf he had approved the 2001 schedule for Volleyball, which fell fully within Board guidelines.

The chair reminded the group of the upcoming special meeting of the Board on May 15, a meeting made necessary by unfinished business.

4. **Fifth-Year Updates:** The Board next considered the petitions for a fifth-year of eligibility presented by Bryan Dierckman and Justin Smith. Both students had brought before the Board additional information on their academic proposals. During this discussion, Board members made several observations. Father Poorman indicated his concern that the scheduling of science labs might preclude student-athletes from becoming science majors; how often is that an issue? Dr. Halischak stated that, in Olympic sports, coaches normally work around class and lab schedules. The office of academic services for student-athletes works with coaches to coordinate labs. For football, basketball, and lacrosse, however, lab schedules do become an issue due to the difficulty of practicing without the whole team present. Science does offer more labs in the morning now than had been the case, Dr. Halischak added. Prof. Thomas noted that Saturday or evening labs are sometimes offered. Fr. Poorman wondered if a culture among athletes precluded choice of sciences as majors. Dr. Halischak noted that finance, followed by preprofessional studies, presents the most popular major for student-athletes.

To the suggestion that these applications should be deferred pending Board consideration of the proposed fifth-year guidelines currently before it, Prof. Leyerle stressed that these applications belong to the previous dispensation; the Board had indicated it would approve petitions calling for the requisite number of courses and should live up to that commitment.

The fifth-year petitions of Mr. Dierckman and Mr. Smith were unanimously approved.

5. Proposals regarding the fifth year of eligibility: On behalf of the subcommittee on academic integrity, Prof. Guiltinan led a discussion of that subcommittee's proposals to amend current procedures for the approval of a fifth year of eligibility. After setting out the efforts of the subcommittee to explore the issue—including meeting with coaches and the Provost—he invited the Board's attention to proposal one, dealing with the procedure for initiating and completing an application. The proposal would, among other things, move the center of preparation of such proposals to the office of academic services for student-athletes. In response to a question, Dr. Halischak stated that she was comfortable with the added responsibility; she committed to monitoring each application and to working with the deans regarding those applications. Fr. Poorman asked whether the proposal presumed that no applications could go forward until the DART process began; does signing off on courses mean the student can gain access or will gain access? Dr. Halischak pointed out that registering for the appropriate courses presents a problem only for unclassified graduate students; for "fifth-years" who have not yet graduated or who are in a graduate degree program, registration presents no difficulty since such students receive preferential registration. Prof. DellaNeva stressed that unclassified students present serious problems; nothing is at stake for them, since no consequences attend failure. The chair stated that the "2.0 rule" provides some disincentive to academic lethargy. Prof. Leyerle noted that proposal number three addresses access to courses; she suggested changing "eligible for" to "eligible for and qualified to take." Prof. Barrett suggested the need to ensure

that courses do not conflict with practice times. At this point, the Board voted its approval of the following proposal:

The director of academic services for student-athletes coordinates the process of petitioning for a fifth year of eligibility. The section of the current form calling for comments from the student's counselor in the office of academic services for student-athletes is eliminated. The proposed academic plan must be approved:

—for students completing undergraduate degrees, by the appropriate assistant or associate dean of the student's college and of any other college in which the student plans to take courses;

—for students enrolled in graduate programs, by the appropriate graduate-program advisor or associate dean;

—for unclassified students, by the director of academic services for student athletes.

As used here, "approved" means a determination that the student is eligible for and qualified to take the courses indicated in the plan.

A board member raised a concern regarding the application process: The petition form calls for the coach to state how the student-athlete's fifth year would present a competitive advantage for the team. The failure to do so continues to be a "disconnect," this member urged. Ms. Conboy responded that the inquiry merely seeks to ascertain that the coach supports the application. "Walk-ons" do not present a direct competitive advantage, but may bring another element to the team. She mentioned the example of one student-athlete who, though not in the regular team line up, served as a team captain.

Prof. Guiltinan then invited the Board's attention to proposal two, dealing with the timing of a petition for a fifth year of eligibility. Prof. Leyerle noted that perhaps a filing date, rather than an initiating date, makes more sense in terms of providing the Board appropriate time to address the petition. The discussion

addressed a dilemma: If the filing date is too early, student-athletes will not be aware of the courses to be offered during their fifth year; if the filing date is too late, student athletes will be squeezed out of popular courses. Upon a motion by Prof. Guiltinan, seconded by Fr. Poorman, the Board approved the following proposal:

Absent extraordinary circumstances, a student-athlete seeking a fifth year of eligibility must file with the Chair of the Faculty Board on Athletics a completed application no later than March 31, or for a student-athlete in a spring sport May 1, of the student-athlete's fourth year at Notre Dame.

Prof. Guiltinan then moved the discussion to a consideration of the proposal dealing with possible grants of a fifth year of eligibility to student-athletes earlier than their fourth year. The proposal, Prof. Barrett urged, should include academic reasons as well as reasons of injury. Fr. Poorman stressed the possibility that such arrangements might allow student-athletes to spread out their education, thus slowing down the pace. Would that be, he asked, an academic reason? Ms. Conboy noted her concern about moving away from our traditional four-year concept, a big selling point to parents of student-athletes. She worried that Notre Dame might become a five-year program. She added that 50 percent of football players will stay on for a fifth year. She worried too that the proposal might reduce Notre Dame's graduation rate, a particular concern of the University's Board of Trustees. Ultimately, the Faculty Board approved the following proposal:

A coach and student-athlete may petition for a fifth year of eligibility at a time earlier than the fourth year of the student-applicant's enrollment at Notre Dame if the student-athlete meets NCAA guidelines for an additional year of eligibility because of injury or demonstrates compelling academic reasons. Coaches making such petitions must expect to provide fifth-year scholarship funding for that student-athlete at least at the level received during the missed year of competition.

The chair adjourned the meeting at 6:10 p.m.

FACULTY BOARD ON ATHLETICS

Meeting of May 15, 2001

Members present: Prof. Fernand Dutile (chair); Prof. Matthew Barrett; Prof. William Berry; Prof. John Borkowski; Prof. JoAnn DellaNeva; Prof. Joseph Guiltinan; Dr. Kate Halischak; Prof. Blake Leyerle; (Rev.) Mark Poorman, C.S.C.; and Prof. Kerry Thomas.

Members absent: Prof. James McAdams; Mr. Lou Nanni; Ms. Laura Patterson; Prof. Clark Power; and Dr. Kevin White

Observers present: Mr. Bernard Muir (associate athletics director); and Ms. Mary Hendriksen (recorder).

The chair called the meeting to order at 3:05 p.m. Father Poorman opened the meeting with a prayer.

1. Announcements: The chair announced that Prof. Borkowski (Department of Psychology) had been re-elected as an at-large member of the Faculty Board on Athletics and that Prof. Harvey Bender (Department of Biological Sciences) had been elected as the second at-large member of the Board. The chair added that Father Malloy would appoint a faculty member to a three-year term, and a student representative to a one-year term, thus rounding out next year's Board roster.

The chair informed the Board of the recent death of the father of Ms. Sandy Barbour, associate athletics director. The chair stated that he would, on behalf of the Board, send an expression of sympathy to Ms. Barbour.

2. Proposals regarding the fifth year of eligibility: The chair asked Prof. Guiltinan to continue his presentation with regard to the proposals, put forth by the subcommittee on academic integrity, regarding the fifth year of eligibility. Prof. Guiltinan called the Board's attention to proposal number three, dealing with advanced-course enrollment for fifth-year student-athletes who have graduated, but do not seek an advanced degree. That

proposal: Fifth-year students should have access to pre-registration through the DART system on the same priority as seniors to enhance their chances of implementing the program they have designed with the help of various advisors. The chair and Prof. Guiltinan reminded the Board of their meeting with the Provost and their conversations with the registrar's office regarding access to preregistration. Prof. Guiltinan briefly discussed the obstacles to early enrollment of fifth-year student-athletes. Father Poorman analogized the situation to his experience in obtaining exemptions for "M.Div." candidates in theology and philosophy. He suggested that a comparable exemption might provide a solution for fifth-year student-athletes as well.

The Board recommended that Dr. Halischak draft, for the Provost's signature, a letter supporting the intent of proposal number three and including the language supporting the use of exemptions and overrides. Such a letter would assist Dr. Halischak and the student-athletes who need to add courses next year. In light of this development, Prof. Guiltinan withdrew proposal number three.

Prof. Guiltinan then moved proposal number four: If a student is not enrolled in a degree program during the fifth year, the student's plan should provide the rationale for the set of courses selected. The plan could spell out, for example, how the courses fit a student's career interests, prepare the student for future graduate-level study, complement the student's undergraduate major, or otherwise satisfy some particular educational objective. The proposal passed unanimously.

Prof. Guiltinan then moved proposal number five: All fifth-year students are expected to enroll in the minimum number of credit hours required to meet NCAA standards, but in no case should the number of credit hours be lower than nine. Mr. Muir, on behalf of Dr. White, asked the Board to postpone voting on this proposal in order that a study might be done regarding credit-hour policies for Notre Dame non-student-athletes completing their degrees and regarding the credit-hour policies for fifth-year student-athletes at peer institutions who have completed their degrees. The chair

stressed the desirability of deferring to the request for more time put forth by the director of athletics; after all, this was his first-ever such request. Professors Borkowski, Leyerle, and DellaNeva argued for moving ahead, citing a possible reconsideration following completion of such a study. Prof. Borkowski suggested that the Board specify a deadline for the presentation of the findings developed in the proposed study. Dr. Halischak asked that the Board attach a rationale to proposal number five so that student-athletes and future Board members might understand the reasoning underlying the proposal. Father Poorman suggested that he and Prof. Barrett craft such a statement. After considerable discussion, the Board agreed to the following revision of proposal number five: Fifth-year students who are enrolled in a graduate program or who are unclassified graduate students must complete at least nine graduate-level credits or any combination of 12 graduate-level and undergraduate-level credits per semester. Fifth-year students who are completing an undergraduate degree must complete a minimum of nine credit hours in their final semester. Absent extraordinary circumstances, a student-athlete may use no more than three credits of directed readings or independent-study courses to meet the minima set out in this section. [This proposal will be reviewed by the Faculty Board on Athletics by November 15, 2001.]

Prof. Guiltinan then moved proposal number six: Students who are completing their undergraduate degree during their fifth year are not subject to the "2.0 grade-point-average rule" for continuing participation and postseason play, but are expected to meet the academic performance standards for participation established for all student-athletes by the Office of Academic Services for student-athletes. Prof. Barrett expressed his opposition to the proposal, stating that student-athletes could skirt the intent by taking failing grades in courses not required for graduation. Fifth-year student-athletes, he continued, should be team leaders in both athletics and academics. Father Poorman supported Prof. Barrett's position. Prof. Leyerle and Prof. Borkowski spoke in favor of the proposal.

The Board voted its approval for proposal number six.

The chair thanked Prof. Guiltinan and the other members of the subcommittee on academic integrity (Prof. Thomas and Prof. McAdams) for their excellent work in bringing these proposals before the Board. Noting the complexity of the issues presented, the chair commended the subcommittee for its perseverance.

3. Proposed Statement of Principles for Intercollegiate Athletics: Having circulated copies of the proposed Statement of Principles for Intercollegiate Athletics prior to the meeting, Prof. Barrett advised the Board that, following its discussion, he would revise the language of the Statement to reflect the substantive wishes of the Board and also edit the Statement to tighten and otherwise improve its prose. At that point, he would circulate to the Board for its approval that revised edition.

Prof. Barrett noted that the Statement did not specifically address performance-enhancement drugs or gambling, which Fr. Malloy had discussed in his comments to the Board at the opening meeting. The subcommittee on communication, Prof. Barrett observed, felt that the Statement's allusion to the *Student-Athlete Handbook*, binding all student-athletes, sufficiently dealt with these matters.

Prof. Borkowski, a member of the subcommittee, invited the Board's attention to Principle 5 under "Administration of the Department of Athletics:"

The University will strive to affiliate in conferences with institutions sharing educational philosophies and goals, as well as a similar commitment to integrity in their intercollegiate athletics programs.

Prof. Borkowski found the principle inconsistent with current practice. He cited the University's decision against joining the Big Ten Conference and the continued scheduling of opponents from institutions quite unlike Notre Dame. Father Poorman and Prof. Leyerle saw the principle as an important statement about the goals of the University and distinguished between affiliation with like

schools in conferences, on the one hand, and the scheduling of competition. Prof. Thomas expressed concern that economic demands may overshadow the principle. Prof. DellaNeva then proposed a revision of the principle in order to balance these views:

In considering conference affiliations, the University will assess the extent to which the other institutions involved share Notre Dame's educational philosophies and goals, as well as its commitment to integrity in intercollegiate athletics.

The Board approved the revision.

The Board then turned its attention to Principle 2 under "Academics." Prof. Guiltinan suggested revising this statement, which deals with academic counsel and support, to indicate the primacy of the Provost's Office in the effort. The Board agreed to the following revision:

Even for individuals manifestly well suited for Notre Dame, the adjustments to the rigors of academic and athletic life in a highly competitive university present difficulties. The University recognizes its responsibility to provide appropriate assistance to enable student-athletes to meet the demands of both academic and athletic competition. To this end, the University affords its student-athletes suitable academic counsel and support, primarily under the auspices of the Provost's Office. Other sources of support, both academic and personal, include the faculty, academic advisors, the residence-hall staff, coaches, athletics administrators and the Student Development Program.

Fr. Poorman then suggested a revision of Principle 2 under "Student Life." After discussion of the proposed revision and some minor changes, the Board approved the following language:

The University strives to integrate student-athletes into the student body so that all students may take full advantage of the educational and other opportunities afforded by campus and hall life. Given the centrality of residential life to the University's mission, student-athletes normally live in

residence halls; exceptions to this policy remain subject to the approval of the Faculty Board on Athletics. Moreover, Notre Dame provides no separate residence halls or sections of residence halls for student-athletes.

Prof. Leyerle then invited the Board's attention to Principle 3 under "Academics:"

The University strives to schedule practices and competitions so as to minimize conflicts with class periods and other academic assignments of student-athletes. In this regard, the rhythm of the academic year and the particular importance of final examinations warrant special attention. All playing schedules remain subject to the approval of the Faculty Board on Athletics.

She lauded the principle as a goal, but believed it inaccurate in describing the current situation. The chair suggested that the principle be approved *qua* principle, but that the Board take up this fall the issue of implementation raised by Prof. Leyerle. The Board agreed with that approach.

Prof. Barrett then moved adoption of the entire proposed Statement of Principles for Intercollegiate Athletics, as revised. The Board voted its approval.

The chair thanked Prof. Barrett and the other members of the subcommittee on communications (Prof. Power and Prof. Borkowski) for their excellent work in drafting the new Statement and in shepherding its discussion and revision.

4. Captaincy: The Board unanimously approved Steve Ratay as captain of the 2001-02 men's golf team.

5. Petition for a Fifth Year of Eligibility: The Board unanimously approved the petition of Shawn Zanderson for a fifth-year of eligibility in cross-country and indoor track.

6. Proposed study-day game for women's lacrosse team: The chair brought before the Board a scheduling issue presented by a proposal that the women's lacrosse team compete at home

against Vanderbilt on May 3, 2002, a "study day." The current Board guideline governing study day competition states:

Competition necessary due to conference schedules and/or NCAA championships is permitted. Limited non-conference competition is permitted. Requests for non-conference competition must be discussed with the sports administrator prior to scheduling.

The chair noted his view that the request fell within the guideline, since "limited competition" must mean one home game—or nothing at all. Prof. Borkowski recalled that last year the Board had disapproved a similar proposal with regard to baseball, asking rather that the game be rescheduled. He felt that teams should compete on study days only when the University had no control over the schedule, for example in conference championships. The chair submitted that, however desirable the current policy, that policy did permit the proposed competition; moreover, to reject the proposal would send a message of inconsistency regarding Board policies and practices. Following discussion, the Board approved the proposed competition, but agreed to re-examine the policy at a later time.

7. Off-campus residence of grant-in-aid student-athletes during the summer: Mr. Muir asked the Board for clarification regarding its off-campus housing policy for grant-in-aid student athletes. Specifically, may student-athletes live in their parents' home during the summer session? After discussion, the Board concluded that grant-in-aid student-athletes may live in their parents' permanent residence during the summer session.

8. Summer arrangements: As customary at the Board's last meeting of the academic year, the chair asked the Board for authority to act on the Board's behalf during the summer. The chair emphasized that he would seek e-mail votes of the Board to the extent possible and ratification of action taken otherwise. The Board approved the proposal.

9. Miscellaneous: The chair expressed his thanks to both Prof. DellaNeve and Prof. McAdams, neither of whom sought an additional term on the Board, for their

dedicated service to the Board's work. The chair also acknowledged the contributions of Ms. Patterson, the student representative, who remains eligible for reappointment.

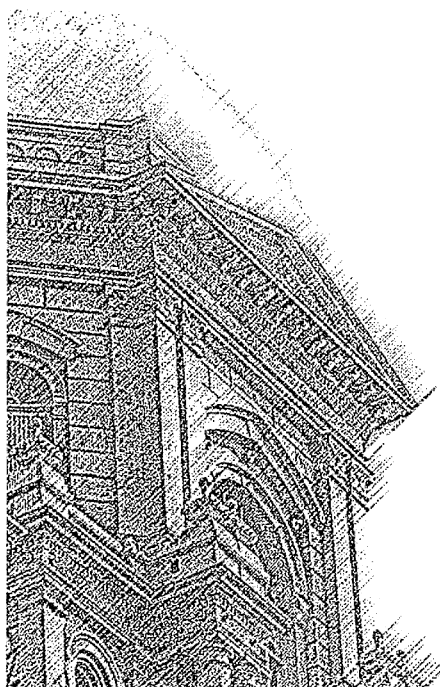

Fr. Poorman moved a resolution of thanks and commendation with regard to the chair's leadership of the Board during its transitional year. The Board approved the resolution by acclamation.

10. Adjournment: The meeting adjourned at 5:55 p.m.
