LaFollette comments on genetics

Douglas LaFollette visited Notre Dame last week to talk to students about genetic engineering and why he is against continued research in the field. Earlier, he discussed the topic with *Observer* staff reporter Mike Mader.

Q: What are your basic feelings about the test-tube baby controversy?

A: What I personally believe is that the test-tube baby, as a symbol of the whole genetic engineering concept, is a very worrisome thing. It's very easy to argue the benefits of some genetic engineering concepts. It can help women have babies who can't and that's a very positive thing. Sounds good. You can help eliminate certain diseases possibly, by getting into your chromosomes and your eggs and sperm and fixing them ahead of time, before you conceive a child. That sounds good. But what we're worried about and why I've taken a position opposing the expansion of genetic engineering into society is that someone has to make each of these decisions. Someone has to play God.

Q: What advancements do you see in the near future for genetic engineering?

A: The thing about it that is worrisome for someone like myself, who sees the potential negative implications for society, is that it's going very rapidly. Research and so-called breakthroughs are happening exponentially. When this book, *Who Should Play God?*, was written just three years ago the authors said that there would be a test-tube baby sometime soon. Everybody

Saturday's game was cause for celebration, as this fan amply demonstrates. See pages 8, 10 and 12 for details [photo by John Macor]

Early Saturday morning blaze blackens Grotto

by Ann Hesburgh
Staff Reporter

The Grotto, one of the most frequented sights on campus, fell victim to flames that blackened its hallow and singed its surrounding ivy early Saturday morning. "It didn't click that the grotto was on fire," said Mary Rice a resident of Lyons Hall. Upon return from her early morning run she commented, "My first reaction was that someone was setting fires on campus again. I was surprised by the fire because I didn't think that there was anything at the Grotto that could burn."

"The damage done to the Grotto was not extensive," said Paul Bognar of the Notre Dame Fire Department. What actually

**'Hot wax dripping down on the extra supply
could have been the cause of the fire..'**

burned were the extra boxes of candles that had been placed at the Grotto. Due to the expected increase in demand for candles for the Michigan game weekend, extra boxes of candles were placed very close to one another under the racks. "Hot wax dripping down on the extra supply could have been the cause of the fire," said Bognar.

Patrolman Richardson of Notre Dame Security said that perhaps a lit candle that had been placed under one of the racks could have caused the blaze. "The heat from a candle could have melted the plastic casing of one of the candles above allowing hot wax to drip on the boxes below. Yet before anything can be determined, we must first talk with the person in charge of setting out the candles," said Richardson. "It's hard to determine what caused the fire." The Notre Dame Security Report of the fire stated that it began at 6:29 and was distinguished by 6:53 Saturday morning. One engine and four firemen, Mike Jackson, Matthew Feeny, Schaefer O'Neill and Paul Bognar assisted in extinguishing the flames.

Reagan, Anderson debate; blast absent Carter

BALTIMORE (AP)--Republican Ronald Reagan and independent John B. Anderson staged two-thirds of a "Great Debate" last night, at odds on tax cuts, abortion and defense spending, but united in their criticism of President Carter--"the man who isn't here tonight."

Reagan said he's for a tax cut, Anderson said he's against it, and both said Carter should have joined them to debate the subject.

Reagan said anyone who thought it unfair for them to assail the absent Democratic president should remember that "it would have been much more unfair" for the independent Anderson to have been denied his debate seat.

It was Anderson's inclusion that led Carter to shun the debate.

That left the debate stage to the Republican presidential nom-

inee and the independent Anderson, a Republican congressman himself.

Anderson said the debate showed that Carter is wrong in insisting the American people have only two choices for the White House, the Republican or the Democrat. He said he offers a real alternative, "the kind of coalition government that we need in 1980..."

He told voters that "if you really think that I am a spoiler,"

look at unemployment, the decline of U.S. military forces, the waning participation of Americans in their own political system.

He said he could cope with such problems, and better then either major party candidate.

At intervals, the debating candidates took slaps at Carter for rejecting the League of Women Voters invitation to confront them. They spent the rest of their hour on stage--and

national television --disagreeing with each other.

"Gov. Reagan and I have agreed on exactly one thing, we are against the reimposition of a peacetime draft," Anderson said, calling that evidence that he can offer a real alternative in the Nov. 4 election.

Reagan told a post-debate rally that the cheers he heard there convinced him he'd been

Conflict intensifies

Iranian, Iraqi forces battle it out

By The Associated Press

Iranian and Iraqi forces battled with gunboats, rockets and artillery yesterday along a disputed waterway at the northern tip of the Persian Gulf and each side claimed it inflicted heavy damage in the spreading border conflict.

Tehran radio claimed Iranian fire sank an Iraqi vessel and drove four others aground in heavy fighting that raged at the 60-mile-long Shatt al-Arab river. Iran said it lost a police boat and a number of crewmen were injured during a sea battle and that artillery, tanks, missiles and other "heavy machinery" took part in the fighting.

Baghdad radio claimed that Iraqi forces destroyed five Iranian gunboats and the Iranian naval base at Khosrowabad, 20 miles south of the giant Abadan

oil refinery.

Amid the conflicting reports on the border conflict, Tehran radio said Prime Minister Mohammad Ali Rajai would present five more members of his government to the Iranian Parliament tomorrow "God willing." The Tuesday session of the parliament was also expected to resume discussion of the fate of 52 American hostages now in their 323rd day of captivity.

Rajai's reported intention to present five more members of his government to the Parliament was the latest step in a struggle with President Abolhassan Bani/Sadr over the makeup of the new government. Bani/Sadr had rejected seven of the prime minister's first 21 nominees, calling them representatives of a "despotic"

minority--a reference to the hardline Islamic Republican Party that dominated Parliament.

The radio said Rajai would not name the new nominees because the matter had not been made final.

In the U.S., Secretary of Defense Harold Brown said the combat between Iran and Iraq has gone beyond skirmishes, but it "is not a major war." Speaking on CBS/TV's program Face the Nation, Brown said, "I think it is very dangerous to all countries in the region and its potentially dangerous to the peace of the world."

The Baghdad radio version of fighting in Shatt al-Arab said Iraqi forces destroyed five Iranian gunboats and "destroyed the installations of the base" at Khosr

A gymnastic display was presented on South Quad Saturday. See page 7 for another shot. [photo by Chris Salvino]

A Los Angeles attorney has sued author Joseph Wambaugh for \$1 million and claims the writer defamed him in the book, "The Onion Field." Irving A. Kanarek claims in his suit that a movie made from the book portrays him as "incompetent, a buffoon and as a defense counsel who deliberately attempts to obstruct the administration of justice without legal, professional or ethical cause or excuse." Kanarek filed the Superior Court suit on Friday. He was defense counsel for Jimmy Lee Smith, one of the defendants portrayed in *The Onion Field*, the story of the murder of a Los Angeles policeman in 1963. Both Smith and his companion were sentenced to life imprisonment for the killing.

Omar Nelson Bradley, the nation's only living five-star general, marks a special 30th anniversary today, one that no other American has ever celebrated. It was on Sept. 22, 1950, that Bradley was elevated to five-star rank, joining Dwight D. Eisenhower, Douglas MacArthur, George Marshall, and Henry H. "Hap" Arnold. Aides said no special celebration was planned to mark the occasion, because that's the way the 87-year-old general wanted it.

Pope John Paul II, in his sharpest attack on abortion to date, yesterday condemned abortion as "a great assault on the conscience, a great disgrace, a great pain." In a clear rejection of demands by some Italian politicians that he stop calling for the repeal of Italy's liberal abortion law, the pontiff told a crowd of 50,000 gathered at St. Peter's Square for his noon blessing: "the (Roman Catholic) Church does not want to judge anybody, but it must present evidence of the truth. The Church knows that every attempt against the child's life in the womb of the mother, is a great assault on the conscience, a great disgrace, a great pain. And so the church wants to help, to serve."

President Carter will be questioned about his brothers' dealings with the Libyan government by the special Senate subcommittee probing the matter, its chairman said yesterday. Sen. Birch Bayh, D-Ind., said the questioning will probably be Wednesday morning at the White House. "We think we may have to ask a few questions of the President to fill in some of the gaps," Bayh said. "We won't call him as a public witness. We may go down to the White House, some of us, and ask him the questions. And then I am anxious to get this behind us." "We'll consolidate all the facts and enunciate all the questions that have been raised and then basically let that be public," Bayh said.

Members of the Spiritual Walk for World Peace and the Preservation of Mother Earth hit a roadblock in their march from California to Washington, D.C., Saturday when Indiana state police told them walking along interstates was illegal. A group made up largely of American Indians continued their cross-country trek yesterday along U.S. 40 rather than Interstate 70 after state police agreed to provide the marchers with an escort to the Indiana/Ohio border. Some 125 persons, including representatives of 80 North American Indian tribes, are participating in the walk, which began in Sacramento, Calif., on June 1, said Perry Seely, 27, Davis, Calif., a spokesman for the group. A member of the Wyott tribe, Seely said the group is walking across the country to protest a list of issues ranging from nuclear waste disposal and uranium mining on Indian lands to the military draft and arms spending.

One of every four girls born in the United States will be raped or molested by the time she is 18 years old, according to one of the speakers at a conference on violence against women. Furthermore, 1.8 million American women have been beaten by their husbands and probably "many more" cases go unreported, another speaker said. Those were some of the statistics presented to the 700 women from 30 states and several foreign countries who attended the four-day National Conference on Violence Against Women that ended here yesterday. The women, including participants from Israel, West Germany and Canada, crowded into workshops to listen to victims describe how they were attacked by men. Workshop leader Deborah Flick, an instructor at the University of Colorado, contended that all women are victims of violence, whether they are raped or simply afraid to walk alone at night.

Celebrated folk singers of the 1960s - Odetta, Tom Paxton and Peter Yarrow - performed at Carnegie Hall on behalf of a cause of the 1980s - the elimination of unnecessary blindness for an estimated 30 million people in developing countries. The concert Saturday night "Hootenanny" - also featured singers Bob Gibson, John Herald, Peter Rowan and John Sebastian. The performance benefited the Society for Epidemiology and Voluntary Assistance, a foundation based in Chelsea, Mich. The foundation is working in Nepal to eliminate preventable blindness.

Warm and windy today with a 50 percent chance of thunderstorms. Highs in the upper 70s to low 80s. Showers ending and turning much cooler tonight with lows in the low to mid 50s. Partly cloudy and comfortable Tuesday with highs in the upper 60s.

Inside Monday

A Walk with an Alumnus

Margie
Brassil

Why do they come back? For three years now, every autumn, I have looked incredulously at the alumni, thinking they were crazy, and wondering why? Aren't they happy with who they are and where they're at that they have to constantly relive memories of a time long gone?

As students here at ND and SMC, it's hard to understand what it is they find so important to come back here for. We're constantly disappointed by the bureaucratic management of the administrations that never seem to care about what we want. And we always want changes that don't come fast enough. The rules frustrate us: pareitals, forbidden kegs and parties, visitation hours, etc., etc. And when something major occurs, like the recent off-campus crime wave, or overcrowding, we blame the administrations for not being effective. From our perspective all they seem to want from us is more money and control of four years of our lives. So, who wants to come back and relive that?

Last summer, my self-appointed "big brother," Joe - an alumnus of two years - told me to relish my senior year, to enjoy and cherish the time I have left here. And I laughed saying, "Joe, I can't wait to get out of this place." He just smiled wisely at me.

Joe came back this weekend. Knowing Joe, it wasn't so much for the game that he came back for, but the chance to "be back" again and see some of his friends. Now, one month into my senior year, I had begun to rethink my statement about leaving this place, except, I still wasn't quite sure why. We walked for an hour around the campus to some of the places few alumni ever get back to, but Joe needed to walk there, and I went with. The warm early autumn wind blew gently through the trees as we walked down Saint Mary's Avenue. Soon that road will be colored gold as the trees begin to change, but right now, there was only a stray shade lightening the green. We walked around Saint Joe's Lake, listening to the music which came down from Holy Cross Hall.

It was a lazy afternoon. The kind on which most students close their books, unable to study, and go out to the quads and greens for frisbee and football. As we walked, Joe and I talked about what it is like to leave here when you graduate from ND or SMC. "What you leave is those quiet moments lighting a candle at the grotto. These kind of lazy afternoons and the people you stay up with until four in the morning making popcorn," Joe explained.

"ND and SMC are like a four year retreat," he said, as we stood by the cross at the end of Calvary. "He can touch you here. And you grow inwardly. But it's hard to take that with you when you leave. It's all too big on the outside, and there are no rules or rectors to guide you. It's hard to stop and remember Him. But here, His presence is all around you!"

I began to understand. What you learn in the textbooks, stays or goes as you need it. The buildings and landscape never change. But, the time here, spent with the friends you shared four years of growing and becoming with, is gone. But, when you come back, there is still that feeling of peace and tranquility that was never gained from a textbook. Its preserved here in all the dreams that everyone who has walked down the avenue and has lighted a candle here, has dreamed.

As Joe and I walked by the cemetery, we turned in and walked to the site where Father Sorin is buried. "He had a dream," Joe explained to me, "and he built this place to fulfill that dream." The French sisters who built Saint Mary's had a similar dream. Who carries on that dream? The people who come here to learn and dream. The people who come back to make sure that that dream. This place will always continue to be that retreat. A place to be and feel His presence and recall and remember the ideals and dreams shared with friends in their youth. And each time they come back, as Joe did this weekend, they take away into their lives those dreams and ideals, again, to keep them a part of their lives.

Crime continues

Assault, robbery mar weekend

by Mary Fran Callahan
Senior Staff Reporter

Another assault and robbery occurred yesterday morning, this time at 902 Notre Dame Avenue, while house occupants slept, according to a resident who reported the theft, by a "lone youth," of a portable TV radio and a 35mm camera to the *Observer*.

When a guest who was sleeping rolled over, he frightened the intruder, who then hit him on the head with a stereo turntable he was carrying. The guest sustained what the resident, who did not wish to be identified, called "quite a gash." The cut, however, did not require stitches.

The guest then attempted to tackle the assailant, but the

youth fled out the front door and ran north on Notre Dame, according to the resident.

Eight people were staying in the house at the time; and were awakened when they heard the struggle ensuing in the living room. A resident promptly contacted the police.

"They were cooperative, but they wanted positive identification which we could not give since it was dark and we were groggy," the resident said.

In the process of trying to sever stereo cords, the youth borrowed a kitchen knife. When he fled from the house, he dropped the knife. Police, consequently, have been able to obtain fingerprints from its handle.

An occupant who was staying upstairs got up to go the bathroom and noticed "one or

two youths," according to the resident, outside a window. The next thing the occupant heard was "a thud" — the impact of the turntable on the sleeping guest's head.

The resident expressed his concern over the crime.

"It's alarming the number of people that have gotten away; that bothers me. I don't see how there can be such a quantity of successful robberies in the area," he said.

All of the house's doors were locked, but the assailant entered through an open window. The resident and his housemates are now going to seek additional protection.

"I'm considering getting in touch with the landlord for some protection," he concluded.

A view of the dome as you have never seen it before...hopefully.

Safety rule violations

Journalist indicts Japan's nukes

by Minoru Inaba
associated Press Writer

Japan's nuclear power plants are mostly maintained by ill-trained day laborers who violate safety rules and under-report their exposure to radiation, says a Japanese journalist who worked in the plants.

Freelance journalist Kunio Horie also claims the utility companies that own the plants ignore or tolerate safety violations and use day laborers to avoid paying benefits or higher wages.

Horie worked for seven months in three different plants as a manual laborer, one of thousands who drift from plant to plant under sub-contracts. He has written a book about his experiences, "Nuclear Gypsies".

The title comes from the name given to job-hungry day laborers who work at one plant one day and another the next.

Horie said he and his colleagues at one nuclear power plant in the state of Fukui were ordered to use a towel to wipe radioactive water off reactor parts.

"It's an anachronism for a supposedly ultra-modern nuclear facility, isn't it?" Horie asked in an Associated Press interview.

In a plant in Fukushima state, Horie wrote, he told one of his colleagues that a monitoring device showed he had higher than allowed radioactive contamination on his boots.

The worker casually suggested Horie try a different monitoring device, a "generous" one that showed a lower level.

As Horie passed the second monitor "safely," the man smiled and said, "now you know better."

In another incident described in the book, plant officials in charge of safety operations said nothing when a worker complained of the heat and tore off his protective headgear.

Many of the "nuclear gypsies" falsify the level of radiation they've received to please their employers and stay on payroll, Horie wrote.

Japanese government statis-

tics say 34,155 people were subcontracted to nuclear power plants in 1978. Utilities kept only 782—mostly engineers and managers—on the regular payroll.

More than 111,000 day laborers have been used since the first plant was built in 1966. The statistics say an average subcontracted worker received radiation twice as high as those on the regular payroll.

Officials of Tokyo Electric Power Co. and the Ministry of International Trade and Industry said it was uneconomical to hire all full-time employees.

Focus

They said nuclear plant workers absorbed on the average only 0.39 rems of radiation in 1978, far lower than the officially set limits of 5 rems for a year.

A rem is the unit of measure for absorbed radiation in living tissue. A normal chest X-ray produces between 0.02 and 0.03 rems. Scientists say the average American absorbs approximately 0.15 rems a year from natural and man-made sources.

Toyozo Terashima, chief researcher and vice director of the National Institute of Radiological Sciences, said, "practically nothing is known about the effect of low-level radiation in humans, but we have enough theoretical studies and animal tests to say that it's negligible."

Terashima conceded there were no worthwhile medical studies of Japan's nuclear plant workers, but said, "There are no radiation victims among them."

The Labor Ministry has a compensation fund for the victims of nuclear radiation. No money has ever gone to nuclear plant workers.

Kazuyuki Iwasa, 57, a former Osaka City plumber, is the only citizen to have complained officially that he became sick because of working at a nuclear power plant.

He told the AP that he received radiation burns on the skin inside his right knee while at work in 1971 at a Fukui plant

run by the Japan Atomic Power Co.

Iwasa said he was employed by a subcontractor at the bottom of a pyramid of companies headed by Japan Atomic and was assured by officials that his job was radiation-free.

He said his present ailments include leukemia, high blood pressure and hearing and speaking difficulties, but that no doctors except for a dermatologist agree they were radiation-caused. The power company argues that Iwasa was exposed to only 0.001 rems of radiation.

The dermatologist, Dr. Minoru Tashiro of Osaka University, said there was no doubt that Iwasa's skin burns were caused by nuclear radiation.

"I've seen many skin burn patients who were exposed to excessive X-

rays," he said. The doctor said Iwasa wore a pocket monitoring device able to pick up gamma radiation. Skin burns are caused by beta rays, Tashiro said, adding that later tests showed there were strong beta rays where the man worked.

Iwasa sued for damages in 1974, but his suit is still pending.

Stud. Affairs meeting tonight

Student Government will be sponsoring an organizational meeting tonite for anyone interested in getting involved in Student Affairs. The meeting will be held in the Engineering Auditorium at 7:30 p.m. Cabinet leaders will give explanations of what the positions will involve. There will be sign-ups for interviews for the many positions available. "At the very least the meeting will be an informative session of student life at Notre Dame" said Paul Riehle, student body president.

SMC Sponsors Career Days

by Susan King

"Women, Work and the Liberal Arts", is the theme of College to Career Days, sponsored by Saint Mary's Student Government, the Career Counsel Center and the Alumna Club. The program will begin today and run through Wednesday in Stapelton Lounge, LeMans Hall, Saint Mary's.

On Wednesday, Sept. 24 at 7 p.m. in Carroll Hall, there will be a panel discussion involving four women with four different lifestyles. These women will discuss their careers, why they choose their professions and will answer any questions. The panel includes Director of Residence Life Sr. Karol Jakowski, Dean of Student Affairs Kathleen Rice, Director of Counseling

and Career Development Mary Elizabeth DePauw and a fulltime homemaker and mother who has a B.A. in secondary education and a M.A. in guidance and counseling, Nancy Foldesi.

Vice-president of Academic Affairs, Joan McCarthy, is chairman of the program this year. McCarthy began organizing the program last year when faculty and student government were asked to make recommendations for the speakers. There have been past career days, but each year more preparation goes into the program to make it even more successful than the previous year. McCarthy specially scheduled the lecture times this year so they would not interfere with classes, a prob-

lem they have had in the past. This has made it more convenient for students to come.

There will be three talks given at the same time on three separate career subjects. The speakers will talk on their careers, what college courses are beneficial and they will give an inside view of the profession. The lectures will be informal gatherings in which students are encouraged to ask questions. The speakers are all women, except for one man, David Noor, a well-known financial analyst. All the fields are very well represented, every speaker has a Liberal Arts education and many are SMC graduates.

Last night the activities began with a keynote address given by Paula Lawton Bevington at Carroll Hall. Bevington, a SMC graduate, received a J.D. degree from Yale Law School, has been involved in numerous volunteer organizations such as the Peace Corps, and is now married, the vice-president of an energy management company and the mother of eight children. Bevington was described as "the total Saint Mary's Woman".

All interested students are encouraged and welcomed to come to College to Career Days at SMC. Pamphlets on the program are available in the dining hall.

See "Career Days" schedule at bottom of page.

This youngster was spotted at a tailgater before Saturday's game. Unlike many others he probably didn't care where the bookstore was, and preferred Gerbers' to Pabst. [photo by John Macor]

Accidents abound at SMC during hectic Friday night

by Anne Jane Dregalla

Two accidents occurred within the space of twenty minutes Friday night on the roadway between LeMans and Moreau Hall.

At about 10 p.m. a Volkswagen bug, driven by two off-campus Saint Mary's students caught fire. Dana Jeffers, the driver, and Sarah Johnson were pulled from the car by ND students Sean Dempsey and John Flood. Despite the fact that many students were standing in the area at the time, "Everyone froze. Everyone yelled, but no one acted," remarked Dempsey.

When they noticed the smoke coming from the rear of the car, Dempsey, Flood, and a third friend pulled the two girls from the car. There was a delay in putting out the fire when no one could find the fire extinguisher, according to Jeffers.

Saint Mary's security, and the Notre Dame and South Bend Fire Departments arrived after the fire had finally been put out by an unidentified student. The fire was attributed to either a break in the gas line or an electrical short in the engine.

About twenty minutes later a car speeding through the parking lot at approximately 60 m.p.h. collided with a car driven by Kathleen Engler and then sped on. A security patrol car, chasing the speeding car, stopped pursuit to check on the students. Maryann Moore, and Colleen Healy, who were in the car with Engler were all right. Engler was taken to the hospital to be checked, but was not seriously injured.

Career Days Schedule

All lectures will be delivered in Stapleton Lounge at LeMans Hall.

laughed and said, 'Oh, that's thirty years away.' The people said it would be possible to splice together the genes from two different species, essentially to mend a gene, to repair a gene. They said 'Oh, that's impossible. That's fifty years away.' Both have now been done.

I think that the breakthroughs, which I see to be very negative in their implications, are going to be happening faster and faster, particularly now that the Supreme Court has ruled just recently, in June, that companies can now patent life forms. They can own life. That means there's big money in this now. The stockbrokers and people who sell stock in companies are very excited about the newest growth industry. You can make a lot of money by designing new life forms and patenting them and selling them. So with that incentive in making money, I would guess that Dow Chemical and DuPont and G.E. and I.T.T. and Exxon are going to be in this business with a lot of research money and a lot happening very quickly.

Q: What do you think can be done to

stop or slow this process down?

A: It's very difficult, when the society has a world view that problems are solved by technology. The only way it will happen is if enough people think about this, analyze it and say no. It's so counter to the things we believe in morally and to the principles of life on earth that we are going to put it on the shelf and say no. Am I optimistic about that? No, not really.

Q: What precedents did Louise Joy Brown (the first test-tube baby) set?

A: The precedent that sets is that we as a society are going to accept tampering with the reproductive system. For years in our society, hundreds of years, the production of life, human life, was tied directly, culturally, philosophically, religiously to the sexual mating of a man and a woman. The birth of the first test-tube baby is the first step going away from that.

Q: Do you think we should eliminate research in genetic engineering altogether, or just perhaps keep it out of company control, out of the marketplace?

A: Certainly a first good step would be to take it out of the marketplace. If you give companies the right to own it, to patent it, that's going to be a fantastic incentive to abuse what already has a lot of potential for abuse. But I think, ideally, we should reject the whole technology.

Q: What about possibilities in what we can learn, like what causes cancer? Once we learn what causes it, we can take it out of the engineering aspect and work from there.

A: I think that's an area where I'm not as informed as I should be. I am not a geneticist, nor am I a genetic engineer. However, there is a whole area of re-

[continued on page 7]

... Debate

[continued from page 1]

successful in the debate.

I'll sure sleep well tonight," Reagan said. As he left the convention center, he said that asking a debater how he did is "like asking an actor on opening night to criticize the play."

Anderson met his supporters

and said he felt "pretty good" about his showing. As to the question of whether he emerged a winner, the independent said, "I will leave that to the judgment of the great viewing audience."

At the White House, Stuart Eizenstat, Carter's domestic affairs adviser, said Reagan had taken "extraordinarily conservative" positions.

He also said there is no change in Carter's insistence that he wants to debate Reagan one-to-one "and not initially with Mr. Anderson."

Much of the debate revolved around economics. And Carter.

"Gov. Reagan is not responsible for what has happened over the past four years, nor am I," said Anderson, warning that inflation could surge again.

"The man who should be here tonight to respond to those charges chose not to attend."

Reagan said his proposed 10 percent federal income tax cut "has been my opponent, by the man who isn't here tonight."

In a debate-day campaign commercial, Reagan suggested Carter didn't show up because he didn't want to answer for high inflation and high unemployment.

Anderson accused Reagan and Carter of trying to outbid each other on tax cuts. He said Reagan wants a tax cut now, Carter proposes a \$27.5 billion cut next year, and he opposes both. "This is no time for a tax cut in view of the incipient signs of renewed inflation," he said.

In fact, he called for new taxes, proposing excise taxes on tobacco and alcohol to be put into a trust fund for urban programs and plugging anew for a 50-cent a gallon excise tax on gasoline, saying it would curb consumption of imported oil and provide revenues to cut Social Security taxes by half.

In addition, Anderson said federal spending should be cut by \$11.3 billion to curb inflation.

Reagan said that made no sense to him. "Why take it in the first place if you're going to give it back?" he said.

He said the same thing about the three-year, 30 percent tax cut he proposes. Reagan said Carter calls that inflationary. The Republican nominee said he doesn't see why it is inflationary to cut taxes and leave the money in the hands of the people, rather than have the government collect and spend the same money.

SCIENCE AND ENGINEERING MAJORS: TAKE OUT INSURANCE NOW

How about an "insurance" policy that your science or engineering degree will really be used? It would be nice. Especially considering the work you put into such a degree.

The Air Force will use your talents. We have openings for young men and women majoring in selected science and engineering academic fields...like Aeronautical, Aerospace, General and Electrical Engineering, Mathematics, Physics and Computer Technology, and many more.

One way to get into these jobs is through Air Force ROTC. Our AFROTC scholarship can help you financially so you can concentrate on getting your degree. AFROTC is a great opportunity to help yourself through college, and the Air Force is a great opportunity to really use what you learn.

Look into the Air Force ROTC program at your campus. It's good insurance.

Contact Capt. Gottrich at 283-6634
for additional information.

search, which is one area of genetic research, where you try to find out what causes diseases. If you can discover that exposure to benzene, as a chemical, causes chromosome damage, (and to do that, you've got to analyze people's chromosomes) that research, I think, is legitimate. Then what do you do about it? That's the trick. If you eliminate benzene from people's environment, so they don't breathe benzene, that's a good solution. If you decide to go into people's bodies and fix their genes so they can breathe the benzene and not get sick, then that is what I'd be opposed to.

Q: Can you describe the two books you are promoting?

A: In relation to the talks I've been giving, one that's very obvious is *Who Should Play God?*, a book about genetic engineering that's been around about three years. It's probably the leading book on that subject and it's a very good book I recommend highly. The other book is a new book, that's just on the bookshelf this month. It's called *Entropy* and it's an analysis about how we got to where we are today in terms of a world view. It's going back and analyzing from Francis Bacon and Newton and Descartes and up through today. The last four hundred years. How we got where we are and why it's not working. Why everyday you read in the newspaper about new problems and new crises. Most people are beginning to think the system is not working. You've got an energy crisis, unemployment crisis. We have a drug crisis. We have a health crisis. The basic technological structures we live our world in are not working. Something is going wrong somewhere. And I claim that

what's wrong is we have the wrong world view. The whole way of looking at the world and the way it is put together is wrong. We're based on a Newtonian mechanistic world view. What we have to base it on is what I call a *entropic* world view. This book explains a lot about that. It gives some thoughts for the future as to how we can build a more humane, a more caring, a more energy sensible society. I think it's a great book. I hope the library gets some copies of it and the students here read it.

Molinelli's works to be published

Juniper Press, the student-owned and operated publishing house at Notre Dame, announced this morning that it will publish a book of Michael Molinelli's "Molarity" comic strips. The book, which will be released for sale sometime this fall, was chosen from nine submitted manuscripts as this semester's publication.

The book will consist of strips from Molinelli's first two years at Notre Dame. The "Molarity" strips have appeared daily in *The Observer* for over three years. The strips are primarily known for their satire on the life of the Notre Dame student.

Molinelli is a fourth-year architecture major from Briarcliff, N.Y.

This will be Juniper Press' fifth book. The previously published books are: *Quick as a Dodo*, by Ralph McInerney (1977); *Cleats*, by George Berry, John Gelson, and Ken MacAfee (1978); *Virgins and Martyrs*, by Dolore Frese (1978); and *ABeCedary: An Antic Alphabet*, by McInerney (1979).

Where's the warhead?

Explosion cleanup begins

DAMASCUS* Ark. (AP)--Heavy trucks, a bulldozer, a helicopter and a crane were moved into the debris-strewn pastureland where a Titan II missile exploded and apparently hurled an unarmed nuclear warhead several hundred feet from its underground silo.

The Air Force, which never admits the presence of nuclear weapons in accidents involving strategic material, would not confirm the trucks were there to recover the warhead and move it to another site.

But Lt. Col. Richard Stevenson a spokesman for the Strategic Air Command, said it was an "accurate assumption" that a nuclear warhead would be moved from the site to Little Rock Air Force Base, if such a warhead was at the site.

At least one state official said he was convinced that a nuclear warhead was hurled from the silo. But Sam Tatom, director of the State Department of Public Safety, said he did not believe it was still at the missile silo site.

"I believe that there was one there, but that it is not there now," he said. "I don't have any evidence that they moved anything. They're (Air Force officials, more relaxed.)"

"I am convinced that there was a warhead, and if it is still there it's intact," he said. Tatom said he and Gov. Bill Clinton will tour the site Monday.

Work at the site yesterday afternoon was concealed from spectators behind a tarpaulin.

Military radio transmissions monitored shortly after the predawn blast Friday indicated rescue workers had to hunt for the warhead among the other huge chunks of missile wreckage scattered over the site in rural north-central Arkansas.

Brown, questioned on the CBS/TV program "Face the Nation," did say, however, "there was no destruction of a nuclear warhead."

"There was never a time when a warhead was outside the security control of the Air Force," he said, adding that the nation's nuclear warheads cannot be detonated by accident "no matter what happens."

During a two-hour span yesterday morning, a helicopter arrived and 23 vehicles, including two flatbed trucks and a large boom, rolled into the area. Military guards toting M16 rifles blocked the entrance to the missile compounds while Arkansas State Police cars blocked secondary entrances.

Military vehicles were thoroughly searched before they were allowed inside the area.

Capt. Donald Schaefer, spokesman at Little Rock Air Force Base, declined to comment on why the equipment was moved to the silo site.

"They're moving equipment in there, but what the purpose is, I can't say," Schaefer said. "I think they are just moving things around."

Asked whether the purpose was to recover a nuclear warhead, Schaefer said, "I can't confirm or deny the presence of any nuclear warheads, so I can't comment on that."

Lt. Gen Lloyd R. Leavitt Jr. of the Strategic Air Command at a news conference Saturday repeatedly refused to confirm that a nuclear warhead existed at the site. The Washington Post

quoted a Pentagon source as saying the Air Force planned to transport the warhead by convoy from the Damascus site to Little Rock Air Force Base, and then to another site for study.

In the past, the Air Force has contacted state law enforcement officials to assist in the transportation of nuclear weapons, according to Jack Dubose of the state Office of Emergency Services.

But Dubose said yesterday morning that his office had not been notified of any planned movement.

"It's normal procedure than when they form a convoy to move one of those warheads, that they notify the highway patrol to assist," Dubose said.

Personal and Business Microcomputer Systems At Affordable Prices

America's most popular microcomputer system—the TRS-80—now at popular prices. Save on Model I 16K Level II BASIC system! Ode to Harry O.

by Louie Somogyi
and Michael Ortman

Outlined against a warm, blue September sky,
At the place they call Notre Dame,
Was a young man on the sidelines,
Needing to regain some fame.

But the situation was dismal,
As the Irish lost their lead,
And with only four seconds left to play,
They needed an extraordinary deed.

Miracles have been numerous here,
Routine as A, B, C,
Perhaps made most famous,
By a quarterback who wore number three.

Now this young man on the sidelines,
Also wore number three,
But this guy was thought to be anything,
Except a hero to be.

You see, he was the kicker,
Only five-feet, eleven high,
Upon whose shoulders the game would rest,
With a 51-yard try.

Some fans were mighty sceptical,
A few were filled with rage,
When this little Harry Oliver,
Marched on to center stage.

"You fools, you fools," some people thought,
"What can you expect?
From this little man, who just today,
Lost most of our respect."

For just 15 minutes earlier,
In this very game, you see,
Little Harry Oliver
botched a crucial P.A.T.

He didn't even kickoff,
For he had no powerful toe.
So 50 yards into the wind?
Who are the coaches? Curly, Larry & Moe?

But oh ye men of little faith,
Shan't you ever concede,
That when everything else seems lost,
Notre Dame becomes a special breed?

Houston and South Carolina,
Just to name but two,
Are recent cardiac trophies,
For this 'never-say-die' crew

And so with all of this in mind,
The crowd rose dramatically,
As a nervous Harry Oliver,
Placed down his kicking tee.

And over the great partisan crowd,
There fell a haunting hush,
Slowly, anxiously waiting,
For the game's finishing touch.

The ball came off of Harry's foot,
With a mighty burst of speed.
The only thing that could be heard,
Was a clicking Rosary bead.

The ball headed slowly,
Towards the goal post bar.
"Good Lord," the fans whispered,
"It's going pretty far."

The ball passed between the uprights,
And over the crossbar too.
"Good God, I don't believe it," screamed one,
"Harry Oliver's kick fell through."

Throughout the wild multitude,
There rose a joyous cry,
As the referees and players as well,
Raised their arms up high.

Remember always,
The odds, great or small,
Notre Dame men,
Can win over all.

So therefore we give,
This small tribute,
To little Harry Oliver,
And his mighty boot.

[continued from page 12]

the way in the first place. He was encouraging me. When you've got the whole team backing you, you just can't do any wrong."

And Courey, who completed 6 of 13 attempts for a total of 62 yards with a touchdown and a pair of interceptions by Wolverine Marion Body, understood the switch to Kiel.

"If I were coaching, I'd have done the same thing," said the senior signal-caller. "At that point in the game, we needed a stronger arm than mine."

"Hey, I'm just happy we won."

Phil Carter, the Irish running back who had grounded-out nearly every rushing play, played Moses in the victory, racing through the parted blue (Red) sea. The feisty 5-10, 193-pound sophomore had his second game in a row over the century mark, gaining 103 yards on 30 carries along with hauling in an all-important pass from Kiel in the closing seconds for a nine yard pickup.

The Irish defense suffered through some mental lags in the contest, finding it difficult to contain the Michigan scoring squad.

Bo Schembechler, the crafty Michigan mentor, played the quarterbackswitch late in the second quarter — a move that sparked the Big Ten power. Sophomore Rich Hewlett, the relatively ineffective starting quarterback for the Wolverines, was pulled in favor of senior John Wangler.

In less than five minutes Wangler, a Royal Oak, Mich. native, directed the Wolverines to 14 points a tie ballgame going into halftime. Wangler, utilizing wide receiver Anthony Carter, tailbacks Stan Edwards and Lawrence Ricks, marched the Blue to touchdown number-one.

Following an interception by Marion Bone, Wangler and his squad got a second shot at the goal. Things looked dim for the Michigan club with less than a minute remaining in the half with fourth down and four to

go, but the clever Wolverine mentor went for the fake field goal with Hewlett, holder for Haji-Sheikh, passing the pigskin to Edwards for 12 yards and a first down. Tight end Norm Betts plunged over to score just seconds later.

Michigan hit the down Irish early in the third quarter for a third TD, taking the lead 21-14 after a crucial Haji-Sheikh conversion.

Things looked dim for the trailing Irish until John Krimm stepped in front of Carter and intercepted an errant Wangler pass. Krimm, the Irish cornerback from Columbus, Ohio, ran the ball all the way for a score, edging the Irish within one.

Oliver, the soon to be hero for the Irish, missed the point-after-attempt with Koegel holding — staging the scene for the Moeller pair to reinstate themselves in Irish hearts nearly a quarter of play later.

The final quarter saw the Blue and Green exchange scores with at least one unexpected play for the Irish.

Pete Holohan, the Irish flanker who demonstrated his throwing ability last season against South Carolina, was on the receiving end of a 31-yard pass from none-other than wide receiver Tony Hunter. The Hunter to Holohan combination was the first play in a series of 11 needed for the Irish to score their final touchdown and bumb ahead of Michigan 26-21 with a two-point conversion failing.

Michigan regained its lead with just 0:41 left to play after some fancy running by Butch Woolfolk and a pass from Wangler deflected into the hands of Craig Dunaway.

With fans filtering out of Notre Dame Stadium Blair Kiel took charge of the Irish offense and eventually left Harry Oliver in the potential-hero role at the 34 yard line.

And, of course, Harry came through.

"This could only happen here," said an estatic Pat Kramer, defensive tackle for the Irish, after the game.

Harry Oliver's 51-yard field goal with Tim Koegel holding lifted the Irish to a 29-27 win over Michigan.(photo by John Macor)

Homecoming Activities Recapped

Homecoming was termed "a moderate success" by Dale Ann Robinson, Chairperson of Homecoming '80. Button distribution at the dining halls, the "Find the Blue" Observer contest, the banner contest, and the dance at Century Center were the highlights of the past week's activities, besides the excitement caused by the Notre Dame-Michigan game Saturday afternoon.

This week's activities began Wednesday in the dining halls with the "Blue is Thru!" button distribution. Thursday, the judging for the banner contest was completed. Linda Shanahan announced two third place winners with first place going to the "Angels" of Villa Angela.

Scott Howell of Stanford Hall found the blue clue, which had been placed with cheerleader Nancy Dawson. Dawson, who had carried the hidden envelope with her all week, was described as living in the domain of beautiful companions (B-P Beautiful People), being a cheerleader (Cheer, cheer for old Notre Dame), and having fair hair (of the three ND cheerleaders living in B-P, she had the fairest). Howell was the happy recipient of a Homecoming packet.

The excitement of the game spoke for itself. Freshman Blair Kiel booted the ball 51 yards for the 29-27 Irish victory over the Wolverines. Later that evening, Century Center was the scene of "An Evening of Dance," the Homecoming formal. John Bates, dance chairman, was pleased with the attendance and noted that "it was our biggest crowd ever."

Some activities flopped, however. The car parade and car decorating contest did not draw any interest. The committee decided that to get ND students psyched about Homecoming, minimum active participation should be encouraged, at least during the week.

Krimm's interception, tackle: big defensive plays in Irish win

Mike Olenik
Sports Writer

In a day and a setting that will be recollected for many years to come, one performance beamed brightly in the wake of another great team effort. Junior cornerback John Krimm found himself making the the most pivotal of the many game-breaking plays evident in Saturday's epic contest when he bolted for 49 yards and a touchdown after intercepting John Wangler's pass late in the third quarter.

The touchdown did more than signify a potential tie game. It was the igniting spark in what was a momentum-less third quarter for Notre Dame — it revived a stalled offense and a tiring defense.

In holding the ball for almost 11 minutes in the third quarter,

Michigan had removed much of the wind from the Irish sails by taking a 21-14 lead. Just when it seemed absolutely necessary for Notre Dame to stop the varied Wolverine offense, Krimm stepped up in front of a pass intended for Anthony Carter and considerably brightened the Irish picture. Taking an escort of Notre Dame blockers led by Bob Crable, the Columbus, Ohio native weaved down the right sideline for probably the most important six points of his career.

"They were running a curl pattern and I had deep coverage. Tom DeSiato was supposed to turn Anthony Carter in towards me so it was basically double coverage," said Krimm. "I was just in the right place to make the play. As soon as I looked downfield I saw the opening and took off."

By sending the crowd into their more characteristic frenzy, Krimm's touchdown swung the all-important momentum back to the partisan Irish faithful. Heading into the fourth quarter with the crowd displaying their regained enthusiasm, the Irish defense shut down the next two Michigan drives while the offense drove for a score of their own to take the lead 26-21.

With 2:53 remaining in the game, Michigan received the ball for what would be their final possession. In the subsequent drive, Krimm once again came up with a key play when he broke up a second and ten yard pass to the ever-present Carter with a vicious hit on about the Notre Dame 25-yard line.

The collision left both players face down momentarily, but as Krimm stated afterwards, "I was just dazed for a couple of seconds. Once I caught my breath I was fine."

Although Krimm's performance was an outstanding individual effort, he will be the first to tell you that Saturday's win belonged to the team as a whole.

His first career interception was Notre Dame's first forced turnover of the young season, and it was the first interception returned for a touchdown since Dave Waymer did it twice in last year's Miami finale in Yokyo.

To attribute this weekend's win to one or two performances would be misguided, especially after witnessing the post-game lockerroom scene. The emotional atmosphere affected all that were present, with John Krimm summing up the incredible day as well as anyone.

"It's still so hard to believe. Once we come back down, we'll be able to look back on what actually happened. It was just a great team effort."

A great team effort aside, it is still the individual efforts of such players like Harry Oliver and John Krimm that will stand in the memories of those who were lucky enough to see that classic game.

It was something of a frustrating day Saturday for quarterback Mike Courcy. (photo by John Macor)

Notre Dame sweeps ICC 5-4, 5-1 at home

by Dave Irwin
Sports Writer

The Notre Dame baseball team upped its record to 4-0 with a sweep of Illinois Chicago-Circle, 5-4 and 5-1, Sunday at Kline Field.

Junior Tim Prister pulled the Harry Oliver heroics for the Irish in the first game, singling home senior Mike Jamieson for the winning run with two out in the sixth.

"It feels good to get that first hit, especially in that situation," Prister said. "It takes the pressure off."

Prister, a transfer from Indiana Central, was 0-3 in his first start for the Irish and made the team's only error in a doubleheader against Indiana State on Sept. 14.

Besides his game-winning hit, Prister doubled home a run in the second game.

Senior catcher Jim Montano also enjoyed an excellent day — a single, three doubles and three runs batted in.

The Irish, however, did have their moments of sloppy play. The winners made three errors and committed three base-running blunders costing themselves at least one run and prob-

ably a couple more.

"We played well enough to win," head coach Larry Gallo said. "It's been a hectic weekend and we were sluggish, plus we've been going at it every day. Tomorrow is a day off."

Illinois Chicago-Circle scored first in the opener on two hits and an error in the first inning. The Irish evened it up in the bottom of the inning on a Montano double.

The visitors took a 3-1 lead into the bottom of the fourth, but a bloop single by junior Chuck Tasch scored senior George Iams and junior Dan Szajko's sacrifice fly scored sophomore Rick Chyrst to notch the score.

The losers added another run in the fifth and it almost held up. But junior Joe Barrows led off the sixth with a triple and scored on a sacrifice fly by Tasch. With two outs, Jamieson drew a walk and Montano followed with a double down the right field line, sending Jamieson to third. Henry Valenzuela was intentionally walked to pave the way for Prister's single up the middle for the victory.

Senior Joe Wozniak, who is in his first season with the baseball squad after playing football previously, was the winning pitcher. Wozniak pitched two innings of no-run, no-hit ball before experiencing pain in his elbow. Junior Tom Conroy relieved Wozniak and picked up the save with an inning of perfect relief.

The Irish grabbed a 3-0 lead in the first inning of the second game and were never really challenged. Senior Bob Bartlett was in complete control, surrendering one run on three hits while striking out five in four innings.

Junior Brian Smith relieved Bartlett and pitched two innings of perfect relief.

Sophomore Jim Cameron led off with an infield single and Szajko followed with a single. Both runners moved up on a wild pitch before Montano delivered a two-run double. Prister doubled in Montano.

In the bottom of the sixth, Barrows doubled and junior Scott Siler followed with a misplayed triple to center. Szajko's infield hit scored Barrows.

The Irish play Spring Harbor College Saturday and Lewis University Sunday at Kline Field. Both matchups are doubleheaders starting at 1 p.m.

...Oliver

[continued from page 12]

tion, Oliver approached the ball and let it fly. At that point, Irish coach Dan Devine, as he admitted later, used the coaching sign he's used for a long time. "It's goes, 'In the name of the Father, and of the Son...'"

Harry made it. Pandemonium broke loose. Irish fullback Pete Buchanan said later, "I was on the bottom of that mob. I really thought I was going to die. All I could think about was those people at 'The Who' concert in Cincinnati. But then maybe that wouldn't have been so bad. At least I'd have died happy."

Once in the locker room, Oliver's teammates hoisted him high. He was in an hysterical state, tears streaming down his face.

"I've been talking to coach about game balls," announced captain Crable. "And Harry, this is yours. This is the ball you kicked to beat Michigan."

Minutes later, he broke free enough from the bedlam for a tearful embrace with his father and brother (Mom was waiting outside). Dad had a little apology to make.

You see, after Michigan scored the go ahead touchdown with less than a minute to play, the Oliver's left the stadium. They were just too nervous about what might lie ahead.

The media corp then mobbed the little guy.

"I prayed," he cried. "If you put this in the paper, make sure you say I thanked God and Our Lady."

One reporter told Oliver that he had just come from the loser's locker room, and that Michigan tailback Butch Woolfolk had made the comment that Harry would have "all the ladies he wanted tonight." Oliver's response was sincere. "The only lady I've got is Our Lady."

His affection for God and the Blessed Mother is not a facade, but very sincere. Around his neck has always been, and always will be his treasured scapular (a Catholic token of devotion). Next to his bed in his Grace Hall residence is not only a bible, but another book for his nightly reading, *Our Lady of Fatima*.

After things had calmed somewhat, Oliver didn't go out and party with his teammates or return to his dorm for a triumphant welcome. Instead he

spent the evening with his parents at their hotel in Plymouth, Ind. (about 25 miles south of South Bend).

"Can't the football players get rooms for their parents closer to campus?" you might ask. "Nope," smiled one of his suitmates, "but that may change now."

When Oliver returned from Plymouth Sunday morning, his roommates had their own tales from the aftermath of the blessed event.

"The phone was ringing all night," they said. "Of course, his friends were calling to congratulate him, but you wouldn't believe the number of total strangers who were calling just to say 'Thanks.'"

"Some total drunk called and woke us up at 9:00 this morning (Sunday). He asked for Harry, and we told him that he wasn't here. 'Well go get him. I wanna tell him how great he is.' He finally hung up."

Harry Oliver's history at Notre Dame is an interesting one. He said after Saturday's game that his kick was the greatest moment of his life. "And getting a scholarship to Notre Dame is a close second."

After kicking on Moeller's varsity for just one year, Oliver had a dream come true when Notre Dame expressed an interest in him. "I naively thought at the time that I would be able to walk right in here and play," he admitted. "But there were better kickers ahead of me (Joe Unis and Chuck Male). I knew that I was going to have to work hard if I was ever going to get a chance to play."

"When Mike Johnston beat me out last spring, I was really disappointed. I wasn't going to call it quits though. I worked all summer, hoping to redeem myself."

Two weeks ago, the Irish placekicking picture looked like this: Oliver would handle the extra points and short field goal chores and Steve Cichy would take care of the kickoffs and long field goals. Johnston was penciled in as Cichy's backup. But Oliver gradually worked his way into Johnston's position. With Cichy on the sidelines with a chipped vertebrae suffered in the Purdue game, the job was all Harry's.

"I think I first caught the coaches attention in practice on Tuesday," he said yesterday. "I was hitting from over 50 yards with consistency."

Many observers noticed during Saturday's pre-game warm-ups that Oliver was booming the ball through the uprights from 50 yards out. Little did they know he would be doing that three hours later.

"That missed extra point haunted me for most of the fourth quarter," Oliver said. "When we scored to go ahead, I started to breath a little easier. But after Michigan scored, I remember looking down our sideline and seeing a bunch of physically and emotionally drained people."

"My teammates were so worn out from such a tough struggle. I just wanted to do something to help them. I love them all so much."

They love Harry, too. In what many consider to be the finest game ever played in Notre Dame Stadium, he helped them alright.

"...and of the Holy Spirit. Amen."

Several clerics got wrapped up in the spirit of the miracle finish. One priest, sitting in section 2, turned to those behind him and jokingly announced "We have gone through a greatly religious experience. You are all excused from mass tomorrow."

Before 12:15 mass at Sacred Heart Church yesterday, Fr. Bill Toohey submitted that Oliver's kick had a little help. "All the fans in the south stands inhaled at the same time and sucked it through the uprights."

Fans at the north end, on the other hand, claim that they blew it through.

Volleyball to organize tonight

There will be an organizational meeting for the men's volleyball club tomorrow night in the ACC Fieldhouse at 7:30 p.m. No volleyball will be played at the organizational meeting, however those interested should plan on staying until 9 p.m.

...Soccer

[continued from page 12]

on the right side, O'Malley placed a perfect header past the sprawled X.U. keeper for the victory at 88:54.

"We go to the far post on all our free kicks," said O'Malley, who now has four goals to go with one assist this season. "And I was just standing there. That's what should happen."

Thankfully, O'Malley's goal prevented an overtime session, as the continuing story of bad blood between the Musketeers and Irish (20 and 16 fouls respectively) threatened to turn the match into a cheap shot session. The elbows, pushing and shoving yesterday on Cartier were a continuance of the bloodletting seen last year in Cincinnati during the Musketeers 2-0 win.

"You can see the difference Stein makes," Hunter said, declining to expound on his feelings about the circumstances surrounding the Lockport, N.Y. native's latest injury. "When he's in there, we're very tough and when he left we just fell apart for about ten minutes."

When it came down to the last ten or twelve minutes, though, we just had more than them and it worked out that way against Ohio State too."

Against the Buckeyes, the Irish played well at both ends of the field, but could not seem to finish a play, when with only 3:39 to play, Kahale followed in an attempted shot by Joe Ciuni from close range for a 1-0 lead. Kahale, who has been all over the field of late, then put away the game with a hooking shot from the left side over goalie Rob McNeil's head two minutes later. O'Malley closed out the scoring with 44 seconds left on a 20-yard rocket just below the crossbar.

CORNER KICKS- Stein's injury has been diagnosed as a broken fibula. Kahale leads the team in scoring with six goals and two assists for eight points...O'Malley is second...Holterman's assist was the first point of a career that promises to be a great one. Milligan's shutout over the Buckeyes was his third of the year and twelfth of his career.

Oliver boots Michigan out of Promised Land

Notre Dame 29, Michigan 27

by Beth Huffman
Sports Editor

Welcome to the Promised Land, the land of milk, honey and a miracle-worker named Harry Oliver.

Welcome to Notre Dame, Ind., home of the Fighting Irish, who, miraculously defeated Michigan 29-27 on Saturday.

Notre Dame's savior, a 5-11, 165-pound placekicker named Harry Oliver, stood before the gathered multitude with just 0:04 reading on the game clock ready to attempt his first miracle. Like water to fine wine, Oliver changed Notre Dame's fate by booting the football through the uprights, also converting a potentially bitter loss into a sweet victory.

Someone in the crowd must have had a vision, like the prophets of old, as the pre-game masses attempted to tear down the goal posts. But, who could have guessed the game would end the way it did?

"I have to thank God, God had to be with me," said the elated Oliver. "My teammates are the greatest, they supported me, and I love every one of them."

"This is by far the greatest moment of my life," added the Cincinnati Moeller graduate after receiving the game ball from his teammates. "Getting a scholarship to Notre Dame was a close second."

With nearly 60,000 pairs of eyes keyed to Oliver and his magic leg, at least one Irish man prayed ironically for "devine" intervention.

"I knew right away that it was true and he kicked it good. Then I used a famous sign that I've used for a long time," said Notre Dame's Dan Devine. "It's called 'In the name of the Father and of the Son. . . I've never seen Oliver kick one that far, but it went through today

and that's all I care about. He's a heck of a nice kid—he was even before he kicked it."

And, appropriately, after the game a special person visited the celebrating Irish in their locker room to lead the team in giving thanks.

"I told you in practice that you are part of an on going Notre Dame tradition," said University president Theodore Hesburgh. "but today you added a whole new chapter to that tradition by not giving up. You did what everybody said was impossible."

If Harry Oliver was the Irish savior, then freshman Blair Kiel was something of a prophet, perhaps David facing the Goliath Michigan defense, preparing the world for what was to come.

Kiel and the Irish shotgun offense, fashioned especially for the Columbus, Ind., native that doubles as Notre Dame's punter, entered the game with less than a minute to play and the task of getting the ball within Oliver's range.

"I made a lot of quick decisions out there today," said Devine, "not all of them right. But I felt that was the way to win the game. We had worked on that formation all week with Blair."

Kiel himself was not sure whether he'd be called on to lead the Irish from the depths of despair.

"I did not know if he (Devine) was going to bring me in or not," said Kiel, who averaged 43.5 yards punting on the day with six attempts and a long of 69 yards. "At the very last minute when they (Michigan) were getting ready to score, that is when they told me I was going in."

"Mike Courey is fantastic. He's the one that led them all

Touchdown!

Sophomore Phil Carter enjoyed a brilliant day against Michigan, rushing for 103 yards on 30 carries. The Tacoma, Wash. native accounted for two of Notre Dame's four touchdowns versus the Wolverines. (photos by Phillip Johnson)

Oliver's Story

by Michael Ortman
Associate Sports Editor

It was Saturday, September 20, 1980; 4:31 p.m. EST. Thousands of Notre Dame football fans were thumbing through their programs, looking to find out who that No. 3 in green was. "I know he blew that extra point earlier, but what's his name again?"

Two minutes later, Harry Oliver was a household name.

"Harry O, Harry O," they chanted after the diminutive left-footed soccer-style kicker had made good on the second-longest field goal in Notre Dame history—51 yards—and by far, the longest of his life (his previous best was 38 yards in an Irish junior varsity game).

Was it just irony that the band's halftime theme was Gospel?

Perhaps, but there was something magic, something heavenly about the final moment.

Just before that never-to-be-forgotten three-pointer, one of Oliver's high school teammates, Irish linebacker Bob Crable, patted his little buddy on the tail and told him to "kick the s— out of the ball. And kick it straight."

Then another fellow-Cincinnati Moeller graduate knelt before Oliver for the hold, or was it in prayer?

Oliver's holder probably turned to the "Field Goal Jesus" with this plea:

"Hey God, this is Tim Koegel. We need a big favor, quick. Could you hold that strong wind for just a second. I think Harry might need the help."

With that, like the parting of the Red Sea, the 15-mile-an-hour breeze ceased.

The epitome of concentra-

In soccer

ND stops Bucks, Musketeers

by Gary Grassey
Sports Writer

Harry Oliver wasn't the only last minute hero to make his mark on the Notre Dame sporting scene this weekend.

The Fighting Irish soccer team had two of their own, beginning with Friday night's emotional 3-0 win over Ohio State and winding up yesterday afternoon on the same Cartier Field with a 2-1 Notre Dame decision against rugged Xavier University. The weekend sweep lifted the Irish record to 6-1 and provided a much needed shot of confidence following last Sunday's crushing defeat in St. Louis.

"These are the teams (Ohio State and Xavier) we can and should beat," said Notre Dame coach Rich Hunter. "We didn't win many games like this last year, so you can see we've made

some progress."

Much of that progress, however, must be attributed to the presence of senior halfback Bill Murphy and junior fullback Jim Stein in the Irish lineup for the first time this season. Until Friday's match, Murphy had been recovering from a foot injury and Stein from a separated shoulder. Their skills were sorely missed.

The Notre Dame defense, for the entire Ohio St. game and most of the Xavier contest, was impenetrable. Stein spearheaded the fullback corps with his aggressive, reckless abandon style of play and goalkeeper John Milligan was rarely tested.

With 23:07 remaining to play against Xavier, the Irish clung to a 1-0 lead, courtesy of sophomore halfback Steve Berry's goal at 25:44 of the first half on a Sami Kahale assist. Stein suddenly dropped to the turf in

agony as a result of a kick to his ankle. After he was removed from the field, the Notre Dame defense seemed to wilt.

The Musketeers put on the pressure for the next few minutes and at the 75:41 mark, forward Nicky Calixte put home a blast into the right corner that keeper Milligan could not handle.

With the score even at 1-1, Notre Dame rebounded and took control of the play. Freshman Ken Harkenrider placed a dangerous cross in front of Xavier goalie Ted Kuechly's net that was stopped with 3:52 left to play. 30 seconds later, forward Ed O'Malley unloaded a blast from the left side that Kuechly batted away. And finally, on a free kick by Irish freshman fullback Joe Holterman from 35 yards out

[continued on page 11]

Players of the Game

Phil Carter

John Krimm

by The Observer

Offensive Player of the Game
Phil Carter rushed for 103 yards on 30 attempts and made two touchdowns. **Honorable Mention** Blair Kiel, Tony Hunter and Pete Holohan

Defensive Player of the Game
John Krimm, cornerback for the Irish who ran back an interception for a 49-yard touchdown. **Honorable Mention** Bob Crable
