## REPORT PROGRESS TOWARD NOTRE DAME-SAINTE MARY'S UNIFICATION

The Boards of Trustees of Notre Dame and Saint Mary's College, meeting separately on May 14th, will consider the unification of the two schools, as recommended by their respective executive committees. Meantime, the board of the College's Parents Council endorsed the proposed unification at an April 17th meeting. The Notre Dame and St. Mary's chapters of the American Association of University Professors met jointly on April 21st to hear the AAUP's associate general secretary speak on the implications of unification for faculty members. Coeducation will be the subject of the opening session of Notre Dame's Alumni Board and Senate meeting on April 29th at 3 p.m. Discussions pointing toward unification are underway involving corresponding academic departments at the two institutions. The trustees' unification recommendation calls for a single student body of men and women, one faculty, one president, one administration and one board of trustees, all to be accomplished not later than the 1974-1975 school year.

Editorial Projects for Education, Inc., an organization associated with The American Alumni Council, has issued a special report, "Are Americans Losing Faith in Their Colleges?" According to the report, the public's loss of confidence in the colleges and universities threatens not only their financial welfare, but their freedom as well. It quotes McGeorge Bundy, president of The Ford Foundation and former Harvard dean:

"To the degree that violence subsides and the university community as such is kept separate from political conflict, the danger of attack upon the freedom of the university from the outside will be reduced. No institution which depends upon society for its resources will be allowed -- as an institution -- to choose sides in the general contests of the democratic process, and violence by the privileged is an uncommonly unpopular phenomenon. If it be true, as I believe, that both politics and violence must be restrained in the academic world for reasons that are intrinsic to the nature of the university, it is also true that when violence spreads and the university is politicized, society as a whole turns hostile -- and in a prolong contest with society as a whole, the university is not a likely winner."
