TO MEMBERS OF THE COMMISSION

From Clark Kerr

Here is the manuscript for Toward A Learning Society, which will be discussed at our meeting in Princeton. Although it is very large you have seen much of it before. We call particular attention to Part One, which contains the major themes and recommendations of the report. In Part Two, section 6 contains much new information. Section 8 contains a lot of information you have seen already, but there is an expansion of some of the descriptions of alternative channels that were only listed in the draft you last saw. Appendix 3 contains information that will be either adopted for use in section 4 or will form an important part of section 10.
