

Berwyn. Cook Co, Ill. Mch. 13. 1907.
To President Notre Dame University
Notre Dame. Ind.

Sir:

In 1889- I believe it was- that your
Professor of Bot. Dept- came to my home
then in Chicago- and bought my large
Herbarium of plants- some 30 Bols.
I also donated other specimens-
I think the purchase was satisfactory
to both parties. Now- I beg to say-
that- I want to sell my Lichens

Herb. of 714 species- very fine- all
put up in books- on cards, labelled
etc- about 24 volumes- I have not
before offered it to any one- and if my
eye was good would not let it go-
Nor is my health good. Our other trade
being so pleasant I hope you get this.

\$100.00 will take it- which is very low
price. The great Genus- Cladonia- I
have made a specialty of- there are
over 120 species of this. I can send
a list of species if you wish to see it
specimens fine- abundant. Would
like your botanist to see the collection-
Kindly consider my offer.
Berwyn- on C. B + C. Very respectfully
time ^{from} to him- 22 minutes W. W. Catkins

Also for sale- Botany and other books

Prof. J. A. Newland

My dear Sir: { Thanks for expressions.
yours noted. } I do not sell the coll. this year -
you stand in a chance in 1908. No doubt
I may add to coll. meantime. Will be
glad to see you if you come here.

I enclose list of books I want to sell -
as will not be of use to me any more -

Also, I only need works on Lichens
now and my eye sight being poor
may not need these long. I hope that
you will want some or all the books on
enclosed list. Except Mac Millan -
can mail the others - but if all to go
must be via Ex. Allow me to inquire -

if you make any study of Ecology -
(plant societies, plant housekeeping)
in your botanical courses - if so and you
have published any thing I would like to see
it. This seems to be a recently developed
phase of Botany - in the U. S.

^{Lichens}
W. W. Calkins
book co. is in
your library
I think -

Very sincerely, Yrs

My dear
Professor Newland -
I am to presume that
you saw nothing on
my book list that you
want - since I wrote
I have found a few
more rare / or desirable
books - list enclosed.
This last list I mark
at prices - which the
books cannot be bought
for ^{elsewhere} all are clean and
perfect. But though at
my prices - they foot up
over \$4.00 you can
have the two lots

for \$4.⁰⁰ If taken
you get them via
Exp- And if you do
buy - please send P.O.
order - as is handiest
for us -

In regard to my
Lichen collection
written about - I will
now make an awful
sacrifice on former price
if taken within two
weeks from this date - wit-
\$60.⁰⁰ cash & 6 volumes -
714 species. This is worth
considering - Kindly answer
soon - Of course nothing but
financial stringency impels
me to this offer -
Very sincerely Yrs
W. W. Watkins

Berwyn. Ill. 4/17. 1907.

Dr. J. A. Menziesland
Notre Dame. Ind.

My dear Sir

Yours. 15th inst. noted. I will await the
return of President which is faint to do.
Meantime I will send you the books
via Ex to morrow. and will put in the
top a list of the species in the Herbarium
so that you can see what they are. You will
find two lists - the N. Am. 439 species
and the foreign list of 268 species -
you will notice species numbered as
No. 20 & 21 A. B. C. Such are duplicates
from a different locality than the 1st
No. thus there are many duplicates -
but all such are in under the original
Number - as A. B. etc., and there are 101 of these
duplicate species in the N. Am. list. Also in
the foreign list - (mainly Cladonia) are many
duplicates. Of Cladoniae - there are all
about 129 species - including varieties -
of the 129 - 68 or 70 are N. Am. or some
30 more than Tuckerman gives in his Synops.
but we have progressed since his day. The
foreign species are abundant and elegant
so are all others. If you can come up let
me know the day - and I will be here how

about next Saturday? Lots of trains on C. B.
& L. R.R. out here - Union Depot. Time
22 min. each way - I enclose (table)
I prefer to know you see the Coll. before
buying - then - no aftermath - and if you can
come before seeing Dr. B. the better -
If bought - I will pack in a box -
and send by freight or Ex - as you direct -
and take to Depot here or in Chicago -
but freight you pay - The big Herb. now in
N.D. I shipped as freight - via St. Louis -
I believe - If you come I have no doubt
you will want the Herbarium. There are 26
volumes - My labels on all the species collected
by me - printed labels - Those sent me by others
I retain their labels - as more valuable. As to the
Cladonia - a remarkable genus, no one can
name the species correctly without having
a full set of the foreign and these I have
in abundance. Now as to the books I
send - I think that all are now sorted out
for you - that I listed to you - I kept
no duplicate of list - so if any missing let
me know and I will mail such. Remit by
P. O. order please or pay if you come in -

30 Apr. 57.

Dr J. D. Newland
My dear Sir:

You noted - I will pack
up box to day and send
via Ex. to monrow probably -

I have no idea but what
you and all of your
confreres will be pleased
with the purchase and will
consider it a prize at
the price - or would beat
twice the money. Such is my
sincere opinion - but tho-
I feel (already) kind of sick
to see it go, no matter. By
the way a box of books came
yesterday from N. Mich. State
Normal School for me to
have. I shall not open
it until I get your

Got off - and if any are
new to "Herb" I will send
to you later free. About
60 big Institutions
have now my sets of
riches - but none have
so full a set of *Cladonia*
species as you will have -
and authoritative too.

To close I will say that
it will please me in future
to add to your Herb - any
thing desirable that comes in
and no doubt much will
come for names.

Very sincerely yrs.

Dr. J. A. Newland

Bot. Dept Univ. of Notre Dame.

My dear Sir,

Your box of lichens starts this p.m.
Find Receipt herein, also bill for same.
The Ex. Co. Apt. said 75cts would be
about the charge - 70 lbs - I packed up
the books secure the no. of each vol.
is marked on outside wrapper. 18
vols of U. Am - 4 of French - 4 German,
you will find all the lichens A. 1, as to
the books - I made these - not being
able to have them made and uniform
as per VOL. 1. French lichens; a vol. I
had on hand. As to the material - ample,
except in a few instances, but later I will
supply it. All species printed but 2 or 3 -
which never are found in fruit. There are
3 or 4 specimens too bulky to put in books.
Which I put in boxes - number is on. By the way,
the 4 vols - German - all Gladonia, I put in
the books in the packets, they came in with label
names on the packets - easily opened - and
better than to glue on cards - better to study -
and I shall thus hereafter put up Gladonia.
Now you will see how much time and labor
I put in - worth more - than you pay for

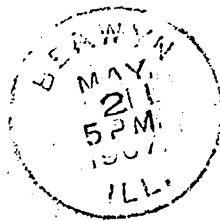

the whole thing - so I hope the Herb. will
 please you all and be a great addition
 to the Minn. I regret but one thing -
 is - that the books are not all alike -
 same as Vol. 1. referred to - As said
 previously - any thing new coming in
 from coll-tors, I will send gladly -
 The bill enclosed I think best to
 make in the terms you see it looks
 better. I put in a rare palm, etc -
 no use to me -

With best wishes

Very sincerely Yrs!

W. W. Watkins

University of Pennsylvania.

THE COLLEGE.

BOTANY.

PHILADELPHIA, 5th June, 1907.

Dear Professor Nieuwland:

Accept my sincerest thanks for the rich and valuable material of conjugating diatoms that you so kindly sent. If we can at any time send you either living or preserved material from the Botanic Garden or from our preserved supplies for use in your classes kindly give me an opportunity of doing so.

Sincerely yours,

John M. Macfarlane

UNIVERSITY OF OREGON
EUGENE

DEPARTMENT OF BIOLOGY
ALBERT R. SWEETSER
JOHN F. BOYARD

June 5, 1907

Prof. J. A. Niemoland,

Notre Dame, Ind.

Dear Professor:- I should be very much pleased to receive some of the preserved conjugating desmids. If there is anything that I can offer you in exchange let me know and I will gladly do so.

I have a plenty of the spirogyra that you mention.

Thanking you for your kindness I am

Very truly yours

Albert R. Sweetser

Brookland D.C.

Sept. 20. 1907

Dear Father Newlands:

I hasten to inform you that the Torrey Botany you mention in your letter of 18th inst. is the very one I showed you, and if you can get it complete for \$8.00 you ought take it at once, whether the plates are colored or black.

This work with Gray's own editions are and will be the standard works in Systematic Botany, and I am sure you will find their diagrams a thousand times more correct than in any of the recently published books on our flora.

Allow me to thank you for your kind

invitation, and if I do succeed in making a
journey through your State to my beloved
Rocky Mts., I shall be only too glad to visit you.

I am sorry your visit here was so short, but
I hope you will call again when you sometime
again visit Washington.

Before long I shall send you the promised papers
of mine and some direct observations.

The weather is fine and warm and I have

~~done a good deal of work since you were here.~~

Lobelia inflata for instance shows many points
of great interest from an anatomical point of
view. Strange to say the flower has, so far,
never been properly described! The corolla has two
saccate protuberances with secreting hairs, by
which character the species ought be placed near
L. Ludoviciana Gray!

With kind regards, yours sincerely

Chrevolue

DEPARTMENT OF CHEMISTRY
UNIVERSITY OF NOTRE DAME

NOTRE DAME, INDIANA. October, 30, 1903.

Professor I. Remsen,
The Johns Hopkins University.

My dear Professor:

I doo that my thesis is about to appear in the Journal as Dr. Griffin explained to me. The work ought not to be published until I know how it will appear whether under my name with references to my Professor Dr. J. J. Griffin, or under both names. The former I notice is the custom of the Hopkins University as of most Universities worthy of the name. I should, I think be entitled to know these facts before the work appears, if it does.

Very Sincerely Yours.

No. 653.
Per J.

P.S. I am referring to the paper, "Some Reactions of Acetylene", handed you by Dr. Griffin.

AMERICAN CHEMICAL JOURNAL.

IRA REMSEN,
EDITOR.

BALTIMORE, MD. November 8, 1907

Dear Sir:

I have gone carefully over the articles which you have submitted for publication in the American Chemical Journal, and I am sorry to say that I find that they will need extensive revision before they will be in form for use in the Journal. In a work entitled "Acetylene", by Vivian B. Lewes, published in 1900, you will find a fairly satisfactory résumé of the literature of your subject, so that the résumé given by you is practically superfluous. A brief statement embodying your own results might possibly be worth publishing, but, after all, your results are extremely meagre.

Under the head of "Chlorination of Acetylene", again you give a good deal of space to the literature which is summarized in the work I have referred to. In my opinion too much space is given to negative results. The most important part of this article is that in which you describe the action of acetylene and chlorine alternately on antimony and pentachloride. I assume that this has not been previously described. A brief note on this subject might be prepared.

The third article should also be much contracted. In fact, I should suggest that you embody the few results you have actually obtained in one short article of five or six pages, under the title of "Some Experiments with Acetylene". I return the article herewith for your further revision.

AMERICAN CHEMICAL JOURNAL.

IRA REMSEN,
EDITOR.

BALTIMORE, MD. November 8, 1907

Do not regard this letter as a criticism of your dissertation. It is not intended as such. Much that you have embodied in the dissertation is perfectly proper material for such a purpose, but when it comes to publishing the results in a scientific journal it is necessary to avoid repetition and to give that which is new.

Yours truly,

A handwritten signature in cursive script, reading "Ira Remsen". The signature is written in dark ink and is positioned to the right of the typed name "Ira Remsen".

Dr. Julius A. Nieuwland.
