## Challenger explodes in flight; seven aboard presumed dead

Associated Press

CAPE CANAVERAL, Fla. - Space shuttle Challenger exploded into a gigantic fireball 75 seconds after liftoff yesterday, apparently killing all seven crew members, including schoolteacher Christa McAuliffe.

Fragments of the \$1.2 billion spacecraft, one of four in NASA's shuttle fleet, fell into the Atlantic Ocean 18 miles southeast of the Kennedy Space Center launch pad.

More than two hours after the accident, officials said no announcement on the fate of the crew would be made until all search-and-rescue efforts were exhausted. But it seemed virtually impossible that anyone could survive such a cataclysmic explosion.

No American astronaut had ever been killed in flight before yesterday.

The explosion occurred as Challenger was 10.35 miles high and 8.05 miles downrange from the Cape, speeding toward orbit at 1,977 mph.

The shocking spectacle was witnessed by family and friends of the

astronauts who had gathered at Cape Canaveral and by millions more around the country who viewed the launch on television.

President Reagan postponed last night's State of the Union speech for one week and sent Vice President George Bush to the Cape to observe the investigation.

Reagan told reporters at the White House that "it's a horrible thing all of us have witnessed. I can't rid myself of the thought of the sacrifice of the families who were there at the Cape and watching this tragedy also. I can't help but think what they must be going through."

Bush, after his arrival at Kennedy Space Center, said "today's tragedy reminds us that danger awaits all who push back the frontier of space. It reminds us that the great adventure of space travel requires men and women of spirit and bravery."

Among those who witnessed the explosion were McAuliffe's husband Steve and their two children, Scott, 9, and Caroline, 6. Also on hand were members of Scott's third grade class from Concord, N.H., displaying a large "Go Christa" banner.

Many cried after the explosion, friends hugged one another and parents quickly cleared children off the viewing bleachers and aboard buses.

McAuliffe's parents, Ed and Grace Corrigan, of Framingham, Mass., stood silently during the launch, arm in arm. A NASA official climbed the bleachers, walked to them and said "the vehicle has exploded."

Mrs. Corrigan looked back at him. "The vehicle has exploded?" she asked. He nodded silently and the Corrigans were quickly led away.

McAuliffe, 37, had been selected from 11,146 teacher applicants to be the first to fly in NASA's citizen-in-space program.

The launch had been delayed repeatedly, most recently because of fears that icicles on the launch pad this morning could harm the shuttle.

It was the first in-flight disaster in 56 U.S. manned space missions, although three astronauts were killed in a launch pad fire during a test - 19 years ago Monday. In January 1967 astronauts Virgil "Gus" Grissom, Ed-

## State of Union address rescheduled by Reagan

Associated Press

WASHINGTON - President Reagan yesterday postponed the State of the Union address he had planned for last night and instead prepared to address the nation on the space shuttle tragedy.

"The president, like all Americans, watched this on television," presidential spokesman Larry Speakes said. "He felt very keenly the emotion that must be felt by the families down there, who have watched this in person, and very keenly what the American people must be feeling."

"He consulted with the congressional leadership, and the consensus of opinion of the executive and legislative branches was that it was appropriate to postpone" the speech, his fifth annual address of the state of the union.

So, Speakes said, Reagan will deliver the speech to a joint session of the Senate and the House next Tuesday.

Reagan had been scheduled to, in the words of one aide, "redefine the role of the government for the next decade and into the next century."

Speakes also said Reagan was delaying three days of campaign-style speech-making he had planned to buttress his State of the Union.

President Reagan halted an Oval Office meeting with top aides when he learned the shuttle carrying the teacher he sent into space had exploded and stood in "stunned silence" as he watched a television replay of the fiery disaster.

"It's a terrible thing," Reagan told reporters. "I just can't get out of my mind her husband, her children, as well as the families of the others on board."

In an account provided by an Independent News Network correspondent who attended a lunch at

which Reagan spoke, the president expressed confidence in those running the space program and said those aboard were aware of the risks they were taking.

Asked what he would tell the nation's schoolchildren, who watched this flight more closely than others because a teacher was aboard and many special projects were planned for them, Reagan said "you have to be out there on the frontier taking risks. Make it plain to them that life must go on."

Speakes said Vice President George Bush and Reagan's national security adviser, Vice Admiral John Poindexter, interrupted the meeting between Reagan and senior aides to tell him of the explosion.

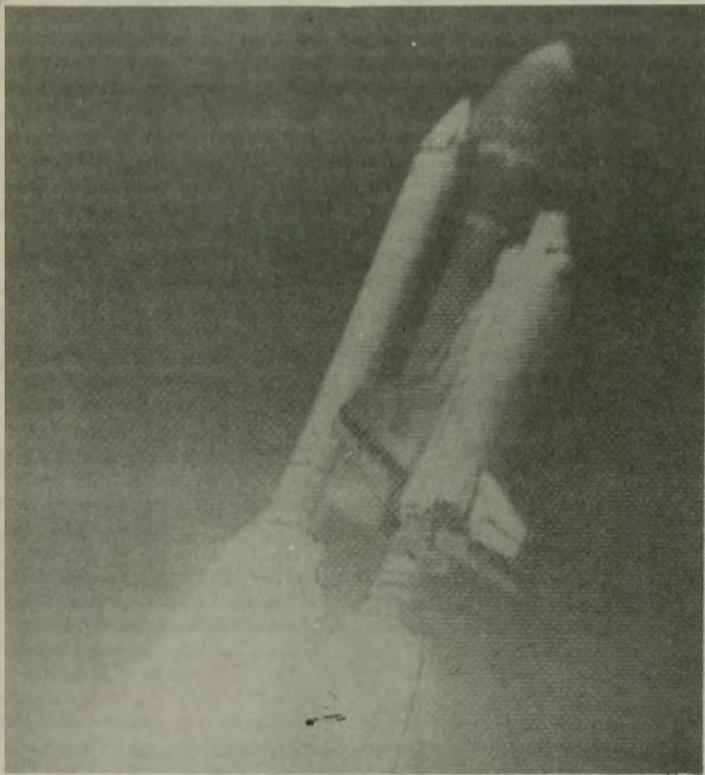

The spokesman added that "quite frankly, the president stood there in almost stunned silence as he watched the television."

Reagan had been scheduled to host a luncheon for television anchors and network White House correspondents in the Roosevelt Room near his office. But the principal anchors hastily left the White House when they learned what had happened, and Reagan, after first postponing his appearance, cancelled to await further reports, leaving Chief of Staff Donald T. Regan to begin the luncheon meeting late.

As for the impact of the explosion on the future of the space program, including future civilian participation in flights, Speakes said such questions were "premature."

"I'm sure it will not affect the United States' determination to continue the exploration of space," he added.

"The United States has met adversity many times before in the space program," the spokesman said.

## HPC discusses parietals survey

By ALEX PELTZER  
Copy Editor

An overwhelming majority of Notre Dame students believe the penalties for parietals violations are too severe, according to tabulated student responses to the parietals survey presented to the Hall Presidents' Council last night by Bruce Lohman.

Lohman, who is serving as director of the survey, said it had a total of 227 responses out of 500 polled. He said the survey was taken before Christmas break.

The survey found that:  
•146 of the 227 asked agreed with the concept of parietals, but...  
•83 percent thought that penalties for parietals violations

are too severe and none thought they are too lenient.

•Only 4 percent thought that reduction of minimum penalties would greatly hinder the observance of the parietals code, while 36 percent thought it would not at all.

•70 percent thought that the parietals code does not enhance the growth of responsible young adults.

Lohman said that these results would "provide a solid support to take to the CLC (Campus Life Council)." Lohman is one of the representatives who works with the CLC concerning the parietals question.

Lohman also said the same survey taken of rectors, assistant rectors and faculty members had not been tabulated yet but would

also be used in his presentation to the CLC.

Another issue brought up at the meeting was the ability of hall members to have parties restricted to those 21 years of age or older. Stanford Hall President Jim Crandall said that he had the okay from Vice President for Resident Life John Goldrick to have a party in his dorm at which alcohol could be served.

Crandall told the council about the ability to rent out the party room of a dorm. "Treat it like you're renting out a space off campus," he said.

Crandall reminded the council of the rules for a "21 party." He said that every dorm participating had to provide a bartender,

# ND students make Noise about musical alternatives

Whoever said Notre Dame was a cultural wasteland? The usual musical options offered to the Notre Dame community -- the boring, predictable top 40 of U93 and ZIP-104 -- are being challenged by a new campus publication which features music most stations refuse to play. The Replacements, Black Flag, Husker Du. The present.

Noise magazine, the last edition of which was four 8 by 11 sheets with a staple in the corner, is the newest substantive addition to the Notre Dame musical scene since the marching band. It consists of record and concert reviews by the most current groups in new music, as well as occasional interviews with whatever artists the editors can contact.

Currently, Noise is assembled, published and distributed by two student coordinators and about 20 contributing writers. Tim Adams, a sophomore from Hinsdale, Illinois, and Pat Beaudine, a senior from Chesterfield, Missouri, are the two ambitious students who founded and presently publish Noise.

Noise comes out every second Friday. The next issue is scheduled to be distributed to the dining halls at lunch on Feb. 7.

According to Adams, they started the magazine last November for a number of reasons. "First, we're doing something we like. If people are adventurous and they read an album review of maybe the new Husker Du album, they might go out and pick up the album," he said.

"It also makes it easier to get bands on campus. Right now ND has a radio station, but it's only AM, which makes it kind of limited. If you can tell a band that you have a magazine too that makes it easier," said Adams.

"Also, one of the reasons Pat wanted to start it was to have a place to publicize some of the bands on campus. They really don't have many other places to publicize," he said.

Every aspect of the magazine seems to be evolving with every issue, including the name. The first issue of the magazine was named Jellied Eel. But that didn't go over too well, Adams said. Then, it was changed to Communist Rag from Hell, but advertisers were a little wary of paying for space in a magazine with such a radical title. Two issues ago the title was changed to Noise.

## Dan McCullough

News Editor

The content also has evolved. For the first four issues, the magazine was exclusively album and concert reviews, with an occasional interview thrown in for good measure.

But last edition featured the top ten albums and singles of the year as chosen by the magazines writers, as well as a short essay on the new music scene in St. Louis.

Future editions will concentrate more upon a more particular type of new music. "You won't see as much

Thompson Twins or Clash, or bands with that level of popularity. We want to get more into the underground scene," said Adams.

Noise is not affiliated with the University, other than that it is put out by Notre Dame students. Adams said he doesn't know if anybody under the dome has even heard of Noise, let alone read it.

Some of the costs of printing and distributing the magazine come from advertising revenue. But while the last issue of Noise contained a full page advertisement for the upcoming Chuck Mangione concert

sponsored by the Student Activities Board, it does not yet pay for itself.

"Printing it costs about \$60 for the 300 copies we put out. Last issue we got about \$30 to \$35 in ads. Pat and I generally chip in the rest," Adams said.

# McAuliffe's students, colleagues mourn death of 'teacher in space'

Associated Press

CONCORD, N.H. - Within seconds, a party died in silence as hundreds of Christa McAuliffe's friends, students and colleagues watched the shuttle Challenger blast off yesterday and then explode.

The 37-year-old teacher's long-awaited launch was watched in classrooms throughout Concord High School, where she taught social studies and law and planned to return to teach in the fall.

About 200 pupils and teachers watching a television set in the

auditorium counted down the last 10 seconds to launch and cheered wildly as the shuttle's engines blasted the craft toward space.

Students continued to cheer and blow their party horns for only a few seconds, until someone yelled, "Damn it! there's a major malfunction. Shut up so we can hear."

Only the sound of NASA reports from the television filled the room as the students and teachers sat stunned, news television cameras filming their shock.

"It's awful. Just too awful even to contemplate," Concord High Prin-

cipal Charles Foley said as he fought back tears. "I hope God will be good. I hope he'll be good to all of us."

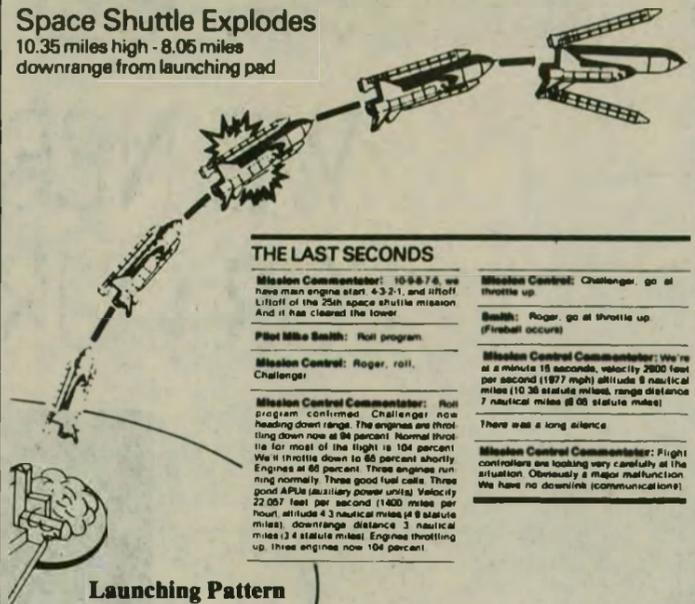

Later, Foley said, "We extend our sincere condolences to the McAuliffe family in this terrible hour of tragedy, theirs and ours. We hope people of the world will recognize her as the heroine she is."

Foley dismissed classes for the day and later canceled Wednesday's session to allow the staff to meet with school counselors.

After the explosion, McAuliffe's colleagues stood in shock and students whispered to each other and to themselves, "This isn't real is it? This can't be happening?"

"People were so high up and now they're down so low," said 16-year-old Craig Burbank of Concord.

Space Shuttle Explodes  
10.35 miles high - 8.05 miles downrange from launching pad

### THE LAST SECONDS

Mission Commentator: 10:33:7.8, we have main engine start 4:32:1, and liftoff. Liftoff of the 25th space shuttle mission. And it has cleared the tower.

Pilot Mike Smith: Roll program.

Mission Control: Roger, roll, Challenger.

Mission Control Commentator: Roll program confirmed. Challenger now heading down range. The engines are throttling down now at 94 percent. Normal throttle for most of the flight is 104 percent. We'll throttle down to 85 percent shortly. Engines at 85 percent. Three engines running normally. Three good fuel cells. Three good APUs (auxiliary power units). Velocity 22,057 feet per second (14,350 miles per hour), altitude 4.3 nautical miles (4.9 statute miles), downrange distance 3 nautical miles (3.4 statute miles). Engines throttling up, three engines now 104 percent.

Mission Control: Challenger, go at throttle up.

Smith: Roger, go at throttle up. (Preblast occurs)

Mission Control Commentator: We're at a minute 15 seconds, velocity 2600 feet per second (1877 mph), altitude 8 nautical miles (10.36 statute miles), range distance 7 nautical miles (8.05 statute miles).

There was a long silence.

Mission Control Commentator: Flight controllers are looking very carefully at the situation. Obviously a major malfunction. We have no downline (communications).

The Student Alumni Relations Group (S.A.R.G.) is taking applications for membership. If you are interested in applying for membership in S.A.R.G., please come to the Alumni Association office, 201 Administration Building and pick up an application. All applications are due in the Alumni Office by Monday, Feb. 3, 1986.

## Shuttle

continued from page 1

ward White and Roger Chaffee burned to death while preparing for an Apollo flight when a fire destroyed their capsule during a training drill.

Four Soviet cosmonauts have died in space accidents - one in 1967 and three in 1971.

The explosion was a devastating setback for the National Aeronautics and Space Administration after 24

successful shuttle missions in slightly less than five years.

Challenger, the second of the agency's four ships to fly, was making its 10th flight, more than any of the other shuttles. Its destruction leaves a fleet of just three shuttles and a program in considerable uncertainty.

"We've become accustomed to success. It's been an amazing success story so far," said Sen. John Glenn, a former astronaut who was the first American in orbit.

On a slow-motion video rerun of the explosion, it was difficult to determine the exact source of the explosion. But when the huge fuel tank with nearly 500,000 gallons of volatile propellant ruptured, it un-

mistakably tore Challenger into many pieces.

Half an hour after the explosion, a serpentine trail of white smoke, twisted by the upper wind, remained in the clear sky, marking the path of the shuttle's wreckage.

NASA has rescue plans should a shuttle be forced to land in the ocean, but there are no ejection seats that might propel an astronaut to safety in the event of mid-air disaster.

There were seven crew members aboard, including McAuliffe.

The other crew members were Commander Francis Scobee, 46; Pilot Michael Smith, 40; Judith Resnik, 36; Ronald McNair, 35; Ellison Onizuka, 39; and Gregory Jarvis, 41.

Computer Science Majors

# WE NEED SHARP IDEAS FOR OUR CUTTING EDGE.

**T**he Travelers doesn't believe in cutting corners.

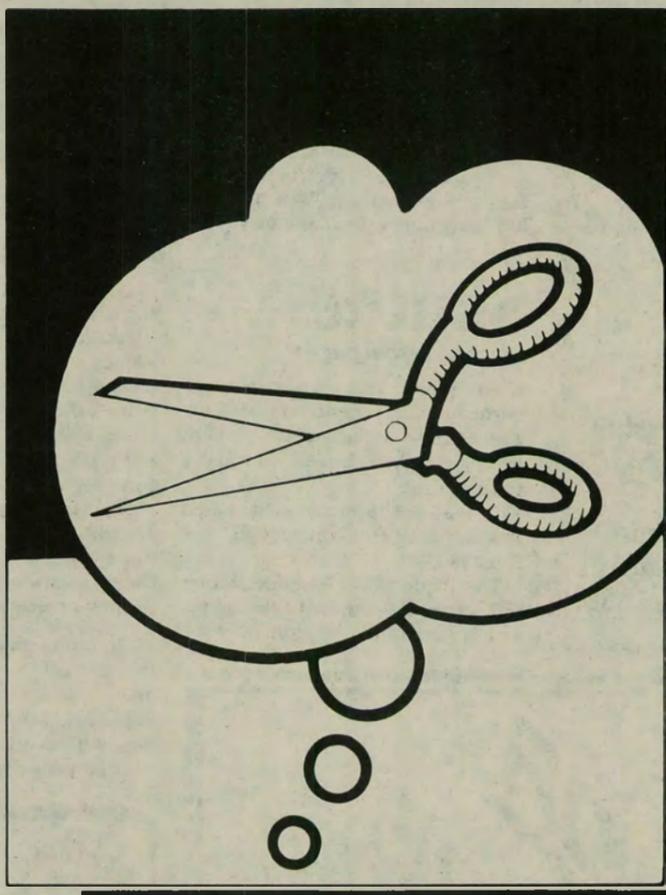

In fact, when it comes to data processing careers, we've got a sharp edge on the competition. Because our ACCENT program is designed specifically for Computer Science majors. It's a fast-paced, challenging training program. Offering diverse assignments leading to key management positions.

All in an advanced environment—the largest IMS shop in the industry. With 19 IBM mainframes. A 23,000 terminal SNA network.

But, our commitment to DP doesn't stop there. We're gearing up for the future—with the purchase and installation of 12,000 IBM PCs. And, we're looking for several enthusiastic people as recruits for our next ACCENT program in our Hartford, Connecticut home office.

If you have a degree in Computer Science or a related discipline, high academic achievement, exposure to hardware and software, and some programming experience, you have the right credentials for ACCENT.

If you're a highly-motivated person, an independent worker, and an innovative thinker, you have the right chemistry for ACCENT.

Now make the right move. To The Travelers ACCENT program. Where you'll find high visibility. Varied learning experiences. Career growth potential. And your own IBM PC—to take home with you. As a key member of a premier financial services company, you'll enjoy

a competitive salary and complete benefits. Plus generous relocation assistance.

So, bring your talent to The Travelers. Where we put the accent on people. And you get the edge on a successful career.

Sign up for our campus interview schedule. Recruiters will be on campus Friday, February 14. Or send your resume or letter of interest to: Priscilla Pellett, 30-CR, The Travelers Companies, One Tower Square, Hartford, CT 06183.

Data Processing  
For Dedicated People.

## Keenan Revue party subject to restrictions

By MARK DILLON  
Senior Staff Reporter

Several changes and restrictions will be implemented at this year's Keenan Revue Cast Party, according to Keenan Hall President Bill Boyle.

The party, hosted by Keenan residents, has been an open-house attended by as many as 3,000 people in the past. "The numbers became unworkable and difficult to control," according to Boyle. "Student Affairs found our open-house concept totally unacceptable. With over 3,000 people in the dorm they felt it was unsafe and I agreed," said Boyle.

After the party last year it was rumored that the event would have to be curtailed, according to Boyle. "Residents wanted the party to be as close to last year's as possible. We thought of having it in the North Dining Hall or at Stepan Center but felt that it should remain in Keenan," Boyle said.

In order to keep the party in-hall, Boyle met with Keenan Rector Brother Bonaventure Scully and other dorm representatives to formulate a party proposal to submit to Student Affairs for approval. Together with Student Affairs, a set of guidelines was drawn up for the Keenan Revue Party.

Scully said, "The cast party will be by invitation only instead of open-house. Each Keenan resident will be allowed to invite three guests. This will give us a maximum of 1,200

people including the 300 residents of the hall itself."

To accomplish this Scully said, "Each resident will receive a form with space provided for the names of their guests. The people appearing on these lists will receive written invitations for the party."

Boyle added, "There will be no alcohol served in the basement party area and it will be restricted from the hallways."

Security for the party will be handled by Keenan Hall staff and government, said Scully. Resident assistants will be checking invitations at the door and also will be patrolling the hallways. The University has, however, offered access to campus security should the need arise, Scully said.

Keenan Hall residents have been informed of the new party guidelines through section leaders and by a letter from hall government.

Boyle said, "We all wanted it to be as close to last year's party as possible. I think this plan is the most acceptable to the majority of the dorm."

Rob McHugh, a sophomore Keenan resident, agreed with Boyle. He said, "I think it will still be all right but not nearly the same magnitude as last year." McHugh, however, said he felt that the invitation procedure was too selective. He said, "We get four tickets to the show so it seems ridiculous to give only three invitations to the party."

the expenses of the party had to be split equally between alcoholic and non-alcoholic beverages.

In other news, Mike Millen gave a report of the first feedback report conducted by the Progressive Student Alliance. He said the survey had been distributed too late before finals to get a good response but that the responses he did get were valuable.

He said another survey would be taken at a more opportune time.

## Students scramble for cash while slinging slop

ANDREW HUGHES  
features writer

Most every college student scrambles for spending money while away at school. Some Notre Dame students scramble eggs at the North and South dining halls to earn themselves some eggs-tra cash.

Student dining hall workers cook and serve meals, as well as prepare and clean the eating and serving areas. Students assigned to back rotation "work on the conveyor belt taking paper, glasses and silverware off (the trays)," said freshman Dave Ragan.

Ragan cooks breakfast two days a week, unloads the dishwasher once a week and works back rotation, "the most dreaded job of all," once a week. "Slop is the worst job on the back rotation, that's cleaning the food off the plates."

These workers have seen everything from soup to nuts on the trays as the trays shuffled along the conveyor belts. ID cards, letters, keys, dental retainers, notebooks and apples carved as jack-o'-lanterns.

"I hate the creative things students do to their trays before they put them on the conveyor belt," said Bridget McGrath, a freshman who serves food at dinner and who works back rotation.

Students smear butter all over the trays and put butter slabs underneath the plates. All agreed that peanut butter in a bowl is the worst to clean off a tray. Sometimes students will even spell out words with their food.

Some students try to hide the silverware and the napkins or place as many glasses as possible onto a single tray.

Brian Peterson, a junior, says the best aspect of his job is "the afternoon work where I can do a variety of things, plus it is easy to work around a class schedule." Peterson makes sure the milk machines are full and unloads the dishwasher at diner time. He is also part of the afternoon crew in charge of defrosting the ice cream freezers and cleaning the soda machines.

"I like the job," says Ragan. "because of the people I meet and interact with, especially when I cook - the guys in the back are really funny." He said he enjoys "the good pay, meeting people, the convenience, the flexibility and great student managers. I must wake up at 6 a.m. to cook breakfast and that the job takes away time from classes and recreation."

After three years of working in the dining hall Peterson said "the monotony of doing the same thing over and over within each job," is one of the minuses of the job.

Joe Schultz, a freshman, says he believes the \$4 per hour wage rate is "very fair." Working a maximum of three hours per shift is what he recognizes as the job's draw back. He works the afternoon shift in back rotation and unloading the dishwasher.

Though a job in the dining hall is basically unexciting, some interesting events do occur. Schultz remembers three particular stories. "The incident that sticks out in my mind is the time I broke about 50 glasses in 10 seconds by knocking

The Observer/Justin Smith

David Ragan unloads the dishwasher wearing thick gloves to protect his hands from the scolding dishes.

over a stack of them when working back rotation. I was wheeling them from the conveyor belt to the dishwasher when the wheels on the cart locked and the stack tipped over. The manager just shook her head mildly annoyed while most of my coworkers and I just laughed.

"Another interesting incident," said Schultz, "was when a cook took a pan of pizzas out of the oven and laid it down on my bare hand. Another time I saw a full glass of water

upside down on the conveyor and not leaking."

McGrath said the worst part of the job is the time eaten up in her day when working at the dining hall. The best part of the job for her is "the guys who cook, especially (the permanent chefs) George and Tex, who are always friendly. I don't hate the job. I mean it's not the best job in the world, but there are worse jobs."

Peterson seems to be satisfied with his job. "yeah, it gets a little tedious sometimes but overall it's not too bad. The dining hall is alright" as a job.

"Because it's not exactly intellectually stimulating," Schultz does not particularly like working in the dining hall. "If I could do something else, such as work off-campus in a store if I had the time and transportation, I would."

## Yellow cards key to finding treasures

J. CHRISTOPHER MURPHY  
features writer

Boy, you know, I really do miss that watch that I lost way back in October. It's been a while but I certainly don't want to go out and buy a new one. I wonder if... no... nobody ever returns things to the Lost and Found. I guess it's gone forever.

These were my gloomy thoughts until I finally became so frustrated as to actually check out the Lost and Found. Lo and behold, there was my watch, along with about 10 other watches, stacks and stacks of books, and several boxes of gloves and hats.

Other strange articles in the office were: headphones, a diamond, license plate border, contact lense cleaner and an Air Force cover.

Jane Urbanski, who has worked for Notre Dame's Lost and Found for 29 years, was more than happy to return my watch, provided of course that I signed a "yellow card" for it.

Urbanski mans the Lost and Found daily and among some of the more unusual items that have passed through her office are: an ironing board cover, convertible top cover, along with several kittens and puppies which she cared for until steps could be taken to find their owners. She is aided by seniors Bill Byrne and Tony Hackey and freshman Mike Schrimpf, each of whom has a regular beat for picking up items at the classroom buildings on campus. Things are collected in these buildings by secretaries and janitors. Many articles are dropped off by students who find them. They are asked to fill out an information card, as many people wish to thank the returners.

Items are categorized by what they are and when and where they were found. The staff use any and all means possible to return the articles to the rightful owner: names, ID numbers, or phone numbers. Keys can be traced through a locksmith. Rings are traced through initials and the year of graduation. One ring was even returned to a Villanova

graduate visiting his son on Parents' Weekend. Owners are notified by phone or by mail when their belongings are found.

The most commonly lost articles are notebooks, novels and umbrellas; most being found in O'Shaughnessy Hall or in the Memorial Library. Students are not the only ones losing things. Faculty members' portfolios and gradebooks show up every once in a while and staff members looking for lost keys and glasses is a fairly common occurrence. Clothes and books are kept until the end of the year. At the end of the year the books are sold to a local merchant and the clothes are donated to a mission. Watches, rings and other jewelry are kept indefinitely.

The hard-working staff do their best to return lost articles to the owners. But the real efficiency of the process lies with the members of the Notre Dame community. Things must be turned in and forms must be properly filled out when you have lost something for the Lost and Found to be useful. The staff asks that all students on or off campus put their name in or on everything that may possibly be misplaced. This will enable the office to return the lost items promptly.

This promptness comes in handy when you need those gloves back in January or that notebook in time for finals. The staff also ask that you are careful to take your things and only your things out of the classrooms and bookstore.

The Lost and Found office will be permanently located on the first floor of LaFortune, just to your right as you walk in the main door, as soon as the final renovations are finished in the spring.

Currently, the office is on the second floor of LaFortune, next to the International students office. It is open 9 to 11:45 a.m. and 1 to 4:45 p.m., five days a week. If you think that the office may have any of your belongings please stop by or call at 239-5036.

The Observer/Paul Pahoresky

Notebooks pile up in the Lost and Found office waiting to be claimed.

## Administration has made benefits of ND a reality

While studying during the Washington Semester at American University, I encountered an editorial in the school newspaper that severely criticized Notre Dame. This article attacked the Administration and its authoritative policies in regard to student living. Unfortunately, it exaggerated the situation and used several falsehoods to illustrate its point. I responded to this article in an attempt to correct its unfounded attack.

**Paul Brady**

guest column

Although I do not entirely agree with the Administration's authoritative style, my great sense of pride compelled me to defend Notre Dame. As I began to construct my defense, I realized my appreciation for Notre Dame had

grown immensely since having the opportunity to study at another university.

Most important, my appreciation for the Notre Dame community has increased. The students here at Notre Dame are motivated and conscientious workers who strive for achievement. These achievements can be seen in the classroom, on the playing field and in the greater community. Given these attributes, growth and development result for the individual as well as for those around him.

The faculty also adds to this growth and development with their contributions in the classroom as well as their personal care and attention outside the classroom. Yet it is not my intent to focus on the students or the faculty. I am confident that the students recognize their qualities as well as those of the faculty.

Instead, and perhaps more controversial, I wish to focus on another member of the Notre

Dame community - the Administration. Students contend that the Administration imposes too many restrictions on their personal lives. Unfortunately, the negative criticism merely severs the relationship between the students and the Administration.

While I do not entirely agree with the Administration's implementation of its policies, I support its intentions behind these policies. As a Catholic institution, the Administration strives to promote responsible living in accordance with its religious beliefs.

Admittedly, I have been away from the campus and missed the Administration's latest decisions which have irked the students. For this reason, it is not my place to comment on these events. Upon my return, I have heard several stories from students with whom I sympathize. Yet, I hope that the students can move beyond these isolated policies of the Administration and focus instead on its role in

the University.

The Administration keeps the school in operation. It is responsible for maintaining Notre Dame's tradition and preserving its Catholic values. Given these tasks, it is important to appreciate the Administration's overall contribution to Notre Dame.

On a personal level, I am more than willing to endure the Administration's limitations in order to enjoy a challenging academic environment, a cultivated spiritual life and a fine collection of students - all of which Notre Dame offers.

In closing, I believe the students of Notre Dame also recognize the many benefits of Notre Dame; yet it is also important that they recognize that the Administration has made these benefits a reality.

*Paul Brady is a junior government and ALPA major at Notre Dame.*

## P.O. Box Q

### Times at Notre Dame changing for the better

Dear Editor:

Times are changing here at Notre Dame. Gone forever are the "good ole" days when social life revolved around drinking fests in dorm party rooms. Yes, times are changing, and they are changing for the better. Our new social life will be much better. Social events will become more creative, more diverse and more FUN. Hopefully, alcohol will become part of good events, rather than events themselves.

Events such as the Junior Class Super Bowl suitcase party, the Around the Corner Club's undergraduate club nights and last semester's Windham Hill series signal the beginning of this change. The completion of the LaFortune renovation and the restructuring of Student Government will accelerate this change. Yet, the responsibility to develop this change to its fullest potential lies with us students. It is time to forget yesterday and look toward tomorrow.

No longer can we blame "them" (the administration) or the alcohol policy for killing our social life. As Sarah Hamilton stated in her column of Jan. 27, 1986, it is time to say, "Hey Domers, this your university; this is your life. Take it into your own hands and have fun."

On the subject of Hamilton's letter, while she is correct in proposing a cure for social life, she is dead wrong, and negligent, in her assailing of Joni Neal and the student activities office. It is time for students to realize that Neal, Ceil Paulsen, Adele Lanan and Amy Kizer are here to help students, not to hinder them. Having worked extensively with them this year, I assure you that no one wants or is

working harder to achieve a better social life than these people.

Many of the creative social events that have occurred this year were born in or developed by this office. These four work long hours to help students create a better social life, a fact which Hamilton failed to note. I encourage any students that have serious ideas about changing social life to work with this office. You will find their support and encouragement very helpful. Let's all start working together to improve our social life.

*David Johnson  
Dillon Hall*

### Campbell's programs are response to boycott

Dear Editor:

In a recent editorial letter on Jan. 23, 1986, Bradley Johnson, president of the Indiana Federation of College Republicans, criticized the Farm Labor Organizing Committee's boycott of Campbell's Soup. He claimed that Campbell's is being "victimized by FLOC supporters... simply because of its size and recognition."

We strongly disagree. Campbell's has been boycotted because it exerts inexorable control over the tomato industry. Any change in farm labor treatment will necessarily involve the cooperation of Campbell's. By refusing to voluntarily improve farm working conditions, Campbell's has taught the FLOC that only pressure will bring about the institution of such change.

The boycott has forced Campbell's into defensive action. This action, however, is limited in that it provides only for surface reforms. The reality of daily exploitation

remains unaltered for the majority of migrant laborers.

Johnson praises Campbell's for creating a program designed to provide laborers with adequate housing. The fact is, though, that in the four years since this program was conceived, only eight of the 90 Campbell's farmers in Ohio have provided their workers with standard housing conditions.

Johnson also lauds Campbell's provision of day care centers for migrant families' children. Again, he is not fully informed. For the entire Midwest region, only three centers exist. They accommodate no more than 6 percent of the 2000 migrant children living in greater Ohio today. Here is yet another example of the blatant inadequacies in Campbell's "save-face" programs.

These programs are a direct response to the FLOC boycott's economic pressure; they never existed before the boycott. Clearly, the reforms are an attempt by Campbell's to combat the 'negative publicity to which the boycott has given rise. We caution both Johnson and the Notre Dame student body against being fooled by such insufficient, half-hearted reforms. Only by continuing to exert economic pressure on Campbell's will real comprehensive change in migrant working conditions occur.

We applaud Johnson's attempt to reveal the other side of the issue. However, we question the source on which he bases his arguments. Surely, he must know that the Campbell's Soup public relations department has a vested interest in presenting a rosy picture of their company's labor practices. We also question Johnson's assertion that the FLOC's attacks on Campbell's are "unfair." The Ohio Catholic Bishops have lent their support to the boycott. Is he saying that they are unfair? We

urge you to look more closely into this issue. We think you will agree that it is the Campbell's Soup Company that is unfair.

*Patrick Markey  
Susan Yadlon  
N.D. FLOC Support Group*

### Women not ordained out of fear of change

Dear Editor:

As a young woman in the Catholic Church, I find the recent stand by the synod of bishops on the role of women in the Church to be greatly disturbing.

The statement that women should continue their "meaningful participation in the Church" is insulting in its ambiguity and emptiness. Women's participation is welcome on councils and at church bake sales, but must end at the seminary. The Church's reluctance to ordain women as priests is rooted not in scriptural evidence supporting this view, but rather in the fear of change from the long tradition of male dominance in church affairs.

But to make the ordination of women an "equal rights" issue would be a mistake, since we are discussing a vocation - a calling from God, not maternity leave. For the Church to ignore this call would be to ignore the equality we all share in God's eyes. Do the Catholic bishops really believe that women are not called in the same way as men? Jesus chose to be born a Jew, yet to exclude non-Jews from full ministry in the Church as priests would be ridiculous.

It is time that those women who feel they can best serve God and the Church in the priesthood be allowed to do so.

Senior defensive standout

# Veteran Ebben leads by example

By MIKE SZYMANSKI  
Sports Writer

When the Notre Dame women's basketball team looks for experience and concentrates on the fundamentals of defense, it follows the example of senior co-captain Lynn Ebben, who has seen a wide gamut of game situations.

"Ebben is the hardest working player I have ever coached," said Irish head coach Mary DiStanislaio. "She is a defensive player, but she is creating a whole lot more than before - offensively with her ballhandling. She is a smart player who draws most of the tough defensive assignments."

Ebben's family has influenced her throughout her basketball career. Her father was an All-American basketball player at Detroit and later went on to play with the NBA's Detroit Pistons. She also has three younger brothers with whom she practiced.

"My brother and I would play 2-on-1 against Dad, and we watched him referee games," says the 6-0 Ebben. "I've played organized ball since fourth grade and really concentrated my efforts on basketball during high school. I played with the guys during the off-season, and I still practice with the boy's high school team while at home."

Ebben, a native of Mendham, N.J., cites her most valuable experience as her involvement in a summer league in Harlem a few seasons ago.

"It was incredible," she recalls. "The intense style (and calibre) of play was excellent."

"International, professional, and top collegiate players all faced off. The neighborhood people and kids would surround the outside courts and hang on the fences. They really wanted to see you play, so it was a very realistic, organized game situation."

"Lynn is a good leader and listener who can read game situations well," says DiStanislaio of Ebben's role as co-captain. "It is good for the younger players to see her work so hard at practice. She's very tuned in to her teammates and very supportive."

Ebben has her own philosophy on the game.

"I want to show (my teammates) what we do at Notre Dame," she explains. "I want our opponents to say 'I have never seen a team that worked so long and hard at defense.' I never want us to be out-rebounded, or to turnover the ball in the double digits."

"We strive to have a disciplined team willing to take advantage of the fast break transition game. We want depth, in order to substitute players in a game with no lull in intensity."

As for team goals, Ebben said that the season is made of plateaus.

"We have final goals in mind, but those are assessed after the regular season. Right now (on a game-by-game basis), we want to win our remaining North Star Conference games, and we have a very good chance to do it with our talent."

"Individually, I take pride in my defense. I may not be the quickest

player, but I have learned things from my experience."

Against Rutgers, Ebben contained the Lady Knights' superb 6-3 forward, Sue Wicks.

"I stayed one step ahead of her on her inside moves, and tried to be as big as I could," she says. "I anticipate moves in order to never lose sight of my man."

Lynn Ebben

Ebben believes that consistency is the main concern for the Irish in the NSC race.

"The team is coming together game after game," she says. "The younger players now have more experience and are comfortable with their positions (and the college environment.) Our confidence level is up."

Among key players for the Irish, Ebben pointed out that the team is very deep in talent.

"(Sophomore center) Sandy Botham must continue to be a consistent offensive and defensive threat, while (freshman) Heidi Bunek will give us more inside power to relieve Sandy," says Ebben.

"(Senior) Trena Keys' mere presence on the floor affects teams, since they will either leave her open

to score, or cover her and leave gaping holes for others like (freshman guard) Mary Gavin."

Notre Dame's next test will be on the road at Butler today.

"It's always tough on the road," says Ebben. "Teams always want to beat Notre Dame because it is their big game."

"Often we play against people who were recruited by Notre Dame, players who we hosted during visits. That always adds an interesting twist. I love to beat people on the road."

"Butler's record (2-12) doesn't mean a thing when you go down there to play," says DiStanislaio. "We expect a very tough game and we will have to crash the boards and get great execution in our offense to win."

"Winning on the road is very important in the NSC this season and this will be our first test. They are depleted in the front line because of injuries, but they are aggressive with more young talent this year."

"We cannot concentrate on any one player because they have an equal opportunity offense with seven players in the 7-9 point range," explains the Irish coach. "Our teamwork will be the difference for the rest of the season, with every player making the contribution that she can."

# SMC fencing now 3-3

By ANDREA LaFRENIERE  
Sports Writer

The Saint Mary's fencing team traveled to Chicago on Saturday, winning two matches and losing one.

The Belles, now 3-3, beat the University of Chicago, 13-3, and defeated the University of Michigan-Dearborn, 9-7, but lost to the University of Wisconsin-Madison by a score of 14-2.

Coach Mike Weeks was pleased with the Belles' performance.

"Considering the health of the whole team, I thought we fenced well," Weeks says. "All I heard was coughing and sneezing on the way to Chicago, but we matched up pretty well with the other teams."

Weeks was particularly impressed with the improvement of senior fencers Mary Beth Proost and Ann Raney. Proost, the team captain, went 7-4 at the meet, bringing her overall record to 11-11. Raney, who posted a 7-5 record, now stands at 12-10 for the season.

Mary Francis Wilkin, who is currently in her fourth season of fencing for the team, improved her overall record to 5-3 at the meet, winning two bouts and losing one.

Senior Becca Barnett went 7-5, and Laura Harris, a returning varsity letter-winner, went 3-7.

## New NVA policy

The Non-Varsity Athletics has put into effect a new policy regarding how elimination tournaments will be run. Each player (or team) is responsible for calling NVA for opponents and dates of matches. NVA will no longer be calling participants.

In addition, players are responsible for submitting results within 24 hours of a match or deadline. Forfeits will be declared for failure to call for a first match, failure to report scores immediately following a match, and failure to play at a scheduled time.

## Irish hope to use tough inside game to claim 13th victory against Utah

By NICK SCHRANTZ  
Sports Writer

For the second time in two weeks the Notre Dame men's basketball team faces a squad from the state of Utah. Sixteen days ago the Irish lost by a disappointing 80-76 score at Brigham Young, but tonight they hope to even things up with the Beehive State as they host the University of Utah at 7:30 at the ACC.

The Runnin' Utes enter tonight's contest with a 12-7 record, which includes an 87-69 loss Saturday to BYU and a 62-52 defeat at the hands of nationally-recognized University of Texas-El Paso.

According to Irish head coach Digger Phelps, the Utes' mediocre record isn't representative of their overall strength.

"Utah's record is deceptive," Phelps explains. "They are a talented team that can really explode on you. They have a good coach, talented athletes, quickness, and they change defenses often. We just have to respond to that."

Leading the way for Head Coach Lynn Archibald's team is forward Jerry Stroman. The 6-6 senior currently paces the Utes' offense, as he has averaged over 18 points a game on the year. Stroman is also the team's third-leading rebounder, with almost six per game.

Stroman has been especially hot during Western Athletic Conference play, by averaging over 24 points a

game and twice being named the WAC's player of the week.

Guard Manuel Hendrix rates right behind Stroman as a potent offensive force. The 5-11 senior has poured in over 16 points a game, including seven games with more than 20 points. Hendrix has struggled somewhat during the WAC schedule, but rebounded to score 23 points in Utah's game with BYU.

Albert Springs may only be 6-4, but his jumping ability and quickness have enabled him to tally almost 10 points per contest and seven rebounds per game, second on the team. In addition, the junior forward is the team's best defender and its most accurate shooter, converting on almost 58 percent of his shots from the floor.

Mitch Smith is Utah's tallest starter at 6-8. The freshman center leads the team with over seven rebounds a game and also adds over six points per contest.

Sophomore Gale Gondrezick rounds out Utah's starting lineup. The 6-4 guard directs the teams offense and leads the squad in assists, while also scoring six points a game.

Guard Kelvin Upshaw led Utah in scoring last year, but this year he is the team's first man off the bench. The 6-1 senior hasn't lost any of his shooting touch, as he scores over 10 points a game averaging only 20 minutes of play.

Sophomore Bobby Adair comes off the bench to provide valuable

help inside for the small Ute lineup. The 6-8 forward helps out by providing six points and five rebounds per contest.

After Notre Dame's disappointing loss to North Carolina on Sunday, the team needs a victory to get its season back on track. Phelps knows his team needs a win, and even with tougher games ahead on the schedule the Irish are preparing solely for Utah.

"Coming off a loss you have to get going again," the coach says. "We have to come out ready to play, and I think they're ready to drill somebody."

"We can't look ahead to Marquette and the rest of our schedule because we look to Utah as a challenge and I think they'll come in quite competitive. I guarantee there will be enough intensity in practice so we will not overlook Utah."

The signs point to a probable victory for the Irish, as Notre Dame is unbeaten at home while the Utes are only 2-5 on the road. Also, the Notre Dame's height advantage should enable it to control the boards, something the Irish have done well all year, while Utah often has been outrebounded by its opponents.

However, if the Irish have another scoring drought like they did at North Carolina, then they could be in trouble. Utah can use its great quickness to score points in a hurry, and should use this ability to give the Irish a good game.

Irish forwards Donald Royal (15) and Ken Barlow (44) close in on UCLA's Reggie Miller during Notre Dame's clash with the Bruins earlier this season. The Irish will be looking for their 13th win tonight when they take on Utah at the ACC at 7:30, a game which Nick Schrantz previews at left.

## Divisional races tighten in men's interhall hoops

By MICHAEL KEEGAN  
Sports Writer

At the midpoint of the regular season, the men's interhall basketball divisional races are unfolding. Last week's games featured the continuing success of divisional powerhouses, coupled with the strong play of the teams that are chasing the division leaders.

In the ACC division, this week saw the showdown between Alumni I and Morrissey, the two undefeated teams. At the beginning of the game it was Morrissey that jumped out to a 9-0 lead. But consistent play by the

Alumni team erased the Morrissey lead and built a six-point advantage with about five minutes remaining in the game.

At this point, Morrissey went on to outscore Alumni 14-4 in a crucial closing stretch and eventually pulled away to defeat Alumni, 50-40. Morrissey upped its record to 3-0 with the win, while Alumni fell to 2-1. Pete Kolletis, a Morrissey captain, said that a strong defense and some key players helped carry his team to victory.

"Positioned defense and strong rebounding were the two key factors in our win," said Kolletis. "We are not as quick as other teams, but

we always compensate with strong defensive play.

"In addition to a strong defense, a few players must be singled out for their play. During our final run, Scott Veselick scored three straight baskets which ignited our play. Also, Steve Treacy, who led the scoring with 12 points, and Brian Koehr, who made a few clutch free throws in the end, contributed greatly to our win."

In other ACC games, Alumni I and OC Bombers (2-1) both gained forfeit wins over OC I which never fielded a team. In addition, Grace II (2-1) gained a forfeit win over the Carroll Vermin (0-3). The only ot-

her game that was actually played in the ACC division this week saw Dillon I (2-1) defeat Flanner II (0-3), 65-50.

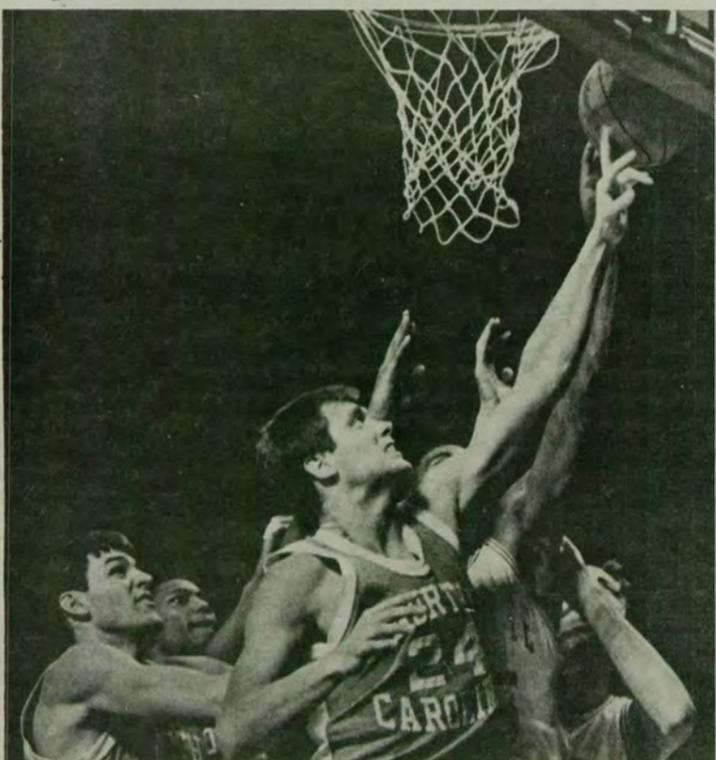

In the Big Sky division, Flanner I and Keenan remained undefeated, while Grace I and Stanford trail by only one game. In this week's action, Keenan (3-0) crushed the OC Slugs (1-3) by a score of 80-51. Flanner I (4-0) easily defeated both St. Ed's (0-4) and the OC Slugs, 68-49 and 78-45 respectively.

Also having an impressive week was Stanford (3-1). The Studs scored victories over Zahm (1-2) and Cavanaugh (1-2). Cavanaugh picked

up its first win of the season with a 59-55 victory over winless St. Ed's.

In the Big Ten division, a tough Sorin team (3-0) defeated Pangborn (1-2) by a score of 52-37. Also, the undefeated Dillon II team (3-0) beat Howard (1-2), 53-39. Other winners in the Big Ten division this week were Holy Cross (1-2), Alumni II (1-2), and Pangborn.

At this point of the season, all the divisional races are still up for grabs. Each division has at least two teams competing for the divisional title. In the remaining weeks, key matchups between the leaders of each division will decide who makes the playoffs and who does not.

Marquette's Dave Boone (25) and Mike Davis (22) defend on the play during a game played earlier this season. The Tar Heels stayed on top of the latest AP poll, which appears on page 9. Poll details are at right.

### Irish move up to 14th

## Richmond falls prey to Top-20 jinx

Associated Press

RICHMOND, Va. - Richmond wasn't thinking about a place in college basketball's Top 20 when it went into Monday night's game against Old Dominion, but the ranking jinxed the team anyway, said Spiders Coach Dick Tarrant.

"It's like a kiss of death," Tarrant said yesterday. "We cracked the Top 20 and got bitten last night."

The Spiders were 20th in The Associated Press poll which was released yesterday, the first time Richmond had been ranked since the 1954-55 season.

Just hours before the weekly poll results were released, Richmond dropped a 62-59 home court decision to unranked Old Dominion, the Spiders' second loss in 18 games.

"To be in the Top 20 you have to beat somebody of note - somebody in the Top 20 - and we haven't done that," Tarrant said.

"Navy was close, but we took such a beating at Georgia Tech that our guys weren't thinking about it."

The Spiders beat the Midshipmen, who were ranked 19th in the

preseason poll, 67-61, last Thursday and their only previous loss was a 90-64 defeat at Georgia Tech Dec. 30.

North Carolina, 21-0, remained the unanimous No. 1 choice of the nationwide panel of sportswriters and broadcasters for the second

### AP Poll on page 9

straight week. The Tar Heels, who beat Georgia Tech and Notre Dame on consecutive days last weekend, have been atop the poll for every voting except the preseason.

Notre Dame moved up to the No. 14 spot. The Irish were ranked 16th in last week's poll.

Following North Carolina, which received 1,260 points for its 63 first-place votes, was Memphis State, 20-0, the only other major unbeaten, with 1,171 points.

Rounding out the Top Ten were Georgia Tech, the preseason choice as No. 1, Kansas, Duke, Oklahoma, St. John's, Kentucky, Michigan and Nevada-Las Vegas.

Syracuse, a Top Ten team all season until this week, leads the Second Ten, followed by Georgetown, Bradley, Notre Dame, Indiana, Virginia Tech, Louisiana State, Louisville, Texas-El Paso and Richmond.

Undefeated Memphis State took over the No. 2 spot from Duke, which led the Tigers by a slim 20-point margin in last week's poll. While the Blue Devils dropped to fifth, Georgia Tech rose to the No. 3 spot despite losing to top-ranked North Carolina last Saturday.

Kansas made a move to break up the Atlantic Coast Conference's domination of the top four spots in the poll. The Jayhawks rose from seventh to fourth in this week's rankings. The ACC had three of the top four spots in last week's poll. With Duke's drop the conference now has three of the top five teams.
