---

In the year 1836, the Rev. S. T. BADIN, of venerable memory, while traveling through the northern section of the State of Indiana, visited the spot *now* known by the name of "NOTRE DAME," but then lying unnoticed in its native forest wilderness and beauty. Struck by its loveliness, or, to speak more correctly, influenced by that Providence which directs the most apparently unimportant events for the accomplishment of its own eternal designs, Father Badin resolved at once to secure this place to the Church as the site of a future College. This resolution he executed. Not long after, it passed into the hands of the Right Rev. Bishop de la Hailandière, who transferred it to the Very Rev. E. Sorin, Priest of the Congregation of the Holy Cross, who, with a few Brothers of the same Order, had come to America about a year before. In 1842, they first took possession of it, and in a few years were enabled, by the blessing of God, to erect spacious College buildings, which have been year after year much enlarged and furnished with all the modern improvements.

Such has been of late the rapid increase of the number of Students, that the Board of Administration has felt obliged to throw aside all previous calculations, and to prepare at once ample room to accommodate fully and comfortably five hundred boarders. To meet every want of that number, a new building, 160 feet long, 85 feet deep and six stories high, has been erected, finished with all the latest improvements of the age,—every thing that an experience of a quarter of a century has shown to be beneficial and desirable; also a new Infirmary Building, 100 feet long, 50 feet deep and three stories high; a Music Hall of the same dimensions, Recreation Rooms, and an Exhibition Hall.

To the already spacious grounds very large additions have been recently made, which are being artistically laid out in landscape form, thus at once affording excellent means for physical development, and the cultivation of refined taste.

This Institution was incorporated by an Act of the State Legislature of Indiana, in 1844, under the name and style of "University of Notre Dame," and empowered to confer Degrees in all the learned Professions.

The University of Notre Dame is situated in the lovely Valley of the Saint Joseph, scarcely a mile from that river, and on the banks of two beautiful lakes of pure spring water. It is in the midst of a fine and healthy farming region, and by means of two great trunk lines of Railroad,—the Michigan Central and the Michigan Southern & Northern Indiana, the latter passing within a mile of the College grounds—is easily and quickly accessible from every part of the country. At the Michigan Southern Railroad Depot, at South Bend, omnibuses or private conveyances can be obtained. Besides

this, a stage passes the College twice a day, connecting with the two lines of Railroad. In the city itself there are large and commodious hotels, where every comfort may be enjoyed.

The University is conducted by the Fathers of the Congregation of the Holy Cross; a number of highly competent Lay Professors assist in the various branches of Studies; other Teachers and the Prefects of Discipline are supplied by the Brothers of Holy Cross, who are, like the Fathers, devoted by their sacred calling to the education of youth.

The disciplinary government is mild, yet sufficiently energetic to preserve the most perfect order and regularity. The morals and the general deportment of the Pupils are assiduously watched over, and their comforts and personal habits receive the same attention as if they were in the bosom of their own families.

The Tables of Honor, Weekly Notes, Monthly Certificates, Quarterly Bulletins, Semi-Annual Examinations and Annual Distribution of Premiums are among the many means made use of to excite emulation and a love of study in the minds of Pupils and reward the diligent.

Experience constantly proves that a young man may be kept within the line of duty more by a sense of *honor* and *justice*, than by *fear of punishment*.

Catholic parents may rest assured that the most zealous care will be taken that their children comply regularly with their religious duties, and that no efforts will be spared in instructing them fully in the principles and obligations of their Holy Religion.

Although all the members of the Faculty and other College officers profess the Catholic Religion, Students belonging to any other denomination are received; nothing is required of them, in this respect, but to assist, for uniformity's sake, at all the public and regular exercises of Religion with propriety and decorum.

The Pupils are divided, according to their age, into the Minim, Junior and Senior Departments, each having its separate dormitory, study-hall, classrooms, play-grounds, etc., its complete Gymnasium, with its own Prefects and Teachers.

The Institution possesses a valuable Library of about seven thousand volumes, besides three other smaller Libraries for the use of the different College Societies, a complete set of Philosophical and Chemical Apparatus, a Museum of Natural History, and a rich Collection of Plants.

This year the Astronomical Department has been enriched by the addition of a Telescope of rare worth, an imperial gift from his Majesty, Napoleon III.

Among the peculiar advantages which this Institution presents, as a place of Education, may be noticed—

1.—ITS RETIRED LOCATION. At a time and in a country where serious and solid studies are rare; where dissipations of every kind are thrown in the way of the young Student; where visitors often interrupt the course of the

student; and where morals are but slightly watched over, it seems that every parent who desires to secure to his son an opportunity of spending the few years of his education usefully and profitably, and passing safely the dangerous season of early youth removed from all the temptations of our large cities, should readily comprehend the advantage of placing him in such an Institution as NOTRE DAME. Here, the young student is under the most watchful and parental care; here he can apply himself, undisturbed, to his studies, under competent Professors, and may acquire a solid knowledge of every thing to which he may wish to devote his attention; here also, his young mind breathes an atmosphere of piety, the influence of which will hover around him throughout life.

2.—ITS EXTENSIVE GROUNDS. If Students are here deprived of hurtful pleasures and dissipation which abound in large cities, they are amply remunerated by those delightful and innocent amusements which the nature of this locality so abundantly provides. Nearly one thousand acres of land are attached to the College, and are well laid out, both by nature and art, for College purposes. Whilst the moral and intellectual culture of the Students is attended to with all possible care and solicitude, their physical development is by no means neglected. Two ball-alleys, two ten-pin alleys, three gymnastic apparatuses, lately built with much ingenuity and skill, together with a variety of the latest and most interesting games, viz: foot-ball, cricket, etc., tend alike by their judicious use to invigorate the body and recreate the mind. Moreover the extensive forests surrounding the College give the best opportunities to those who are fond of hunting, whilst the two beautiful Lakes, upon whose banks the University stands, afford choice opportunity for fishing, boating and bathing in summer, and almost uninterrupted skating during winter. No one for a moment can doubt that these manly sports are highly conducive to the health and happiness of Pupils. All Educators know that innocent, exhilarating and somewhat exciting amusements are the best safeguard of morals for children, especially for young men.

3.—THE CARE TAKEN IN SICKNESS. Students, when ill, have not to remain in the College Rooms, but are immediately taken to the apartments of the Infirmary, where they are attended and nursed, with devoted care, by experienced Sisters, who strive to supply the place of their absent mothers. An eminent and experienced Physician—a graduate of the "Ecole de Médecine" of Lyons, France—resides permanently in the College.

The last scholastic year has been marked with a success unprecedented in the annals of the Institution, the average number of Pupils greatly exceeding that of any former year.

The different Departments have likewise been more fully developed, both in reference to classes and discipline. The Faculty is also more efficient and more numerous than before.

Students are not allowed to keep money in their possession: whatever pocket-money parents may choose to allow to their sons must be placed in the hands of the Treasurer of the Faculty, who will give it out as prudence may suggest or occasion require.

No Student will be received for a shorter period than one session of five months. The most eligible time for entering is at the beginning of a scholastic session, viz: in September or February, but Pupils are admitted at all times during the year, and their session commences with the date of their entrance.

When Parents wish to have their children sent home, they must give timely notice, settle all accounts, and supply means to defray all traveling expenses.

Should a Student withdraw himself, or be withdrawn by his parents or guardians before the expiration of the session, no deduction is made, except in case of sickness or absolute dismissal.

## General Information.

The Academic year commences on the first Tuesday of September, and closes on the last Wednesday of June, when the Annual Commencement, the Conferring of Degrees and the Distribution of Premiums take place. It is divided into two Sessions of five months each. At the termination of each Session, a strict examination of all the different classes is made in the presence of the Faculty.

When a Student presents himself for admission into the College, he is examined by the Director of Studies, and placed in that class for which his previous attainments may have qualified him. His further promotion depends on his application and progress. Should any Student, during the year, be found capable of passing to a higher class, he will be promoted, and such promotion is equivalent to the honors of the class he left.

The Degree of Bachelor of Arts will be conferred on such of the Students as shall have completed their Classical Course, and passed successfully a strict examination before the Faculty.

The Degree of Master of Arts will be conferred on each of the graduates of the first Degree, who shall have devoted at least two years to Literary or Scientific Studies.

The Degrees of Bachelor of Science and of Master of Science will also be conferred on similar conditions.

Diplomas will be given to those Students who shall have completed the Commercial Course, passed a satisfactory examination before the Board of Examiners, and given clear evidence of their moral character.

Students who do not desire to graduate, may adopt a partial or irregular course, fitting them for Commercial life, for Civil Engineering, &c., or for any pursuit outside of the Learned Professions, which requires a special training. Such a course would run parallel with the regular course, and would include all the advantages, literary and otherwise, which the Institution offers to all its inmates.

Special facilities exist at Notre Dame for the acquirement of the French and German Languages. Not only are these Languages taught very carefully by persons of acknowledged competency, but many of the members of the Institution being natives of France and Germany, opportunities at all times occur for conversation in these tongues.

All Students applying for admission will be required to give satisfactory evidence of their moral standing.

All letters sent and received by Students may be opened and read by the President or his substitute.

## Regulations of the University.

1. All the Students of this Institution are required to attend the exercises of public worship with punctuality and decorum. They shall assist at Mass on Sundays and Wednesdays. Catholic Students shall go to Confession every month.

2. As soon as the bell announces the beginning or end of a College exercise, every one shall repair in silence to the discharge of that duty to which he is called.

3. The time for recreation excepted, silence must be inviolably observed in all places.

4. Students must show themselves obedient and respectful toward the Professors and Prefects of the Institution—never absenting themselves from the place in which they ought to be, without permission from proper authority.

5. Students must carefully avoid every expression in the least injurious to Religion, their Professors, Prefects or fellow-Students.

6. Students are not permitted to visit private rooms.

7. The use of tobacco is forbidden.

8. Intoxicating liquors are absolutely prohibited.

9. Compensation for all damage done to the furniture, or other property of the College, will be required from the person or persons causing such injury.

10. No branch of study, once commenced, shall be discontinued without the permission of the Director of Studies.

11. No one shall leave the University grounds without the permission of the President or Vice-President.

12. Any breach of pure morals, either in words or actions, must be reported forthwith to the President or Vice-President.

13. No one shall keep in his possession any money, except what he receives weekly from the Treasurer, on Wednesday, at 9 o'clock, a. m. The College will not be responsible for any valuables, such as watches, money, etc., unless deposited with the Secretary.

14. Bulletins are sent to parents in the beginning of October, December, February, April, and June.

15. On the first Wednesday of every month, "CERTIFICATES OF GOOD CONDUCT" and of "IMPROVEMENT IN CLASS" are issued by the Faculty to such Students as deserve them.

16. In the Refectory of the Senior Department, and also in that of the Junior, conspicuous to the eyes of visitors, may be seen the "TABLES OF HONOR," presided over by the Vice-President and Prefect of Discipline. At these are seated twenty-two of the Students whose conduct has been the most exemplary during the preceding week. They are elected by the unanimous vote of the Professors and Prefects.

17. Bath Rooms, provided with hot and cold water, are fitted up, in which the Students take a bath once a week; in warm weather, however, they bathe twice a week in St. Joseph's Lake.

18. On Sunday and Wednesday mornings, the Students must wrap up and place upon thier beds their soiled linen of the previous half week. On Monday morning, the Students of the Senior and Junior Departments repair in ranks and in silence, to the Dormitories, whence they take their Sunday clothes and carry them to their trunks. And on Saturday, at half-past three o'clock, they go in the same manner to the Trunk-room, and bring their Sunday clothes to the Dormitories. The Students will be reviewed at eight o'clock on Sunday and Wednesday mornings, with special reference to their personal neatness.

19. Stationery, etc., will be delivered to Students, as follows: on Mondays and Tuesdays at half past twelve o'clock, to the Students of the Senior Department; and on Tuesdays and Fridays, at the same hour, to the Students of the Junior Department. Every Student should have a memorandum book in which to enter all his receipts and expenditures, and his notes for recitation in class, and for conduct during his stay in College. Books prepared expressly for this purpose can be obtained from the Secretary.

20. Students who have failed to give satisfaction in the Class-room, or who shall have been guilty of misconduct or breach of rule, will be sent to the Detention-room during the recreation or the promenades, and required to prepare their lessons, or perform such tasks as shall be assigned them, and will be excluded from all College exercises until such tasks be accomplished.

21. Those Students who read sufficiently well and audibly, will occupy the Reader's stand, in their turn, in the Refectory. An alphabetical list of Public Readers, will be posted in a conspicuous place, and every one named in it will read one day, in order, at dinner and supper. At the end of each meal, any Student is liable to be called upon to give an account of what he has heard read.

22. Senior Students will be permitted to read or study from eight to a quarter to nine o'clock, p. m.

23. Every month, all the Students must write to their parents or guardians, and have their letters corrected by a member appointed by the President of the Faculty, previous to their being mailed. All letters sent or received may be opened by the President or Vice-President.

24. When a student is sick, he will obtain permission from the Prefect of Health to go to the Infirmary, where he must observe the regulations of the place until his recovery.

25. No book, periodical or newspaper shall be introduced into the College, without being previously examined and approved by the Director of Studies. Objectionable books found in the possession of Students, will be withheld from them until their departure from the University.

N. B.—Whether in class or in recreation, when permitted to converse at table, or during their walks, Students should endeavor to improve the purity of their language, and cultivate urbanity of manners. A few years in College would be profitably employed, if nothing else were learned than to converse and behave with the dignity and propriety of gentlemen.

The happiness, no less than the improvement of Students, is so closely connected with the good order and even rigid discipline of the College, that no young gentleman of good sense, who has at heart his own welfare and the accomplishment of his purpose in entering the Institution, can fail to discover the importance of a strict observance of the foregoing Rules. If the authorities of the University exhort all to exhibit a sincere and unwavering zeal in keeping those Regulations, they demand of Students nothing more than the promotion of their own interest.

☞ There are in the Institution several Societies, whose Constitutions and By-Laws have been approved by the Faculty, such as the Archconfraternity, Holy Angels', Holy Childhood, Philodemic, St. Edward's, Thespian, St. Cecilia's, and Philharmonic, Societies with which Students are authorized and recommended to connect themselves.

## ST. MARY'S ACADEMY,

[ONE MILE WEST OF NOTRE DAME UNIVERSITY,]

*Conducted by the Sisters of Holy Cross.*

---

THIS Institution, situated on the beautiful and picturesque banks of the St. Joseph River, is every thing that could be desired as a locality for a Female Academy. All the branches of a solid and complete Education are taught here. Music especially, both Vocal and Instrumental, and the MODERN LANGUAGES, form prominent features in the Course of Instruction.

Particular attention is paid to the Religious Instruction of Catholic pupils. Pupils of all denominations are received, and, for the sake of order, merely required to attend the public religious exercises with the members of the Institution.

The Buildings are spacious and commodious, suited to the Educational requirements of the day, and furnished with all Modern Improvements. Every portion of the building is heated by steam, and hot and cold baths are attached to the sleeping apartments.

The Grounds are very extensive, beautifully adorned, and situated in that charming seclusion which is so favorable to the healthful development of moral, physical and intellectual power.

The proximity of the two Institutions to each other is a great convenience to parents having children at both, when they visit their sons and daughters.

\*.\* For further particulars concerning this Institution, the public are referred to the "Eleventh Annual Catalogue of St. Mary's Academy," for the year 1866-7, or address

N. B.—The friends of the College will be pleased to learn that there is a regular line of omnibuses between South Bend, Notre Dame and St. Mary's, which connect regularly with all the trains arriving at South Bend.

## Miscellaneous Remarks.

### THE FRENCH LANGUAGE.

The French Language is now one of the branches which are required to be pursued by those who follow the Scientific Course ; and though Latin or German may be taken as an equivalent yet we wish to impress upon the minds of parents and students the great importance of the study of this beautiful tongue. The intercourse between France and America is becoming more intimate, year by year ; and even at present the majority of American youth look forward with more certainty and pleasure to the time when they shall visit Paris and France than they do to any event that may happen during their travels in other parts of the world. A knowledge of the French language has indeed become a necessary part of a polite and of a professional education. The United States government has recognized this fact, by requiring that the French tongue shall be taught in the army and navy schools of the nation. At Notre Dame the facilities for becoming thoroughly and *practically* acquainted with the French language and literature are unrivaled, the Professors in this department being natives of France and teaching their pupils to speak the language fluently as well as to read and write it correctly. It is hoped that during the coming year the classes in French will be much larger than usual.

The higher classes of the French course will be taught exclusively in French.

### THE GERMAN LANGUAGE.

The importance of the study of German is so generally felt and acknowledged that it is unnecessary for us to insist upon its advantages. It is now a necessity for every one who would be a thoroughly educated business man. We have accordingly placed this language among the studies of the Commercial course, earnestly hoping that every young man who wishes to graduate in this department as master of a complete business education will not fail to make himself well acquainted with the German tongue. The facilities at Notre Dame for learning to speak the German language fluently, are equal to those enjoyed by the students of the French department. The Professors are natives of Germany, and the language is taught in class as a living tongue ; the recitations in the advanced classes are always conducted in German, and the pupil has thus the means of learning to speak the language like a native. The German classes in the University have always been large and numerous ; and we have good reasons for believing that during the coming year the number of those studying German will be even greater than usual.

## MUSIC.

Great attention has always been given at Notre Dame to Vocal and Instrumental Music ; and so successful have been the efforts of the Officers of the University, and the teachers of Music to develop a taste for this elegant art that the number of those taking lessons in Music is now so great as to form of themselves a separate department for the study and practice of the art in all its branches. It is but a few years since a large hall was built and supplied with instruments for the exclusive use of this department ; but during the past year the number of music pupils has largely increased ; and it is now found necessary to provide more ample room for their accommodation. During the last year the brass band was the largest and finest ever known at the University. Among the projected improvements for the coming year is an appropriate music hall for the especial use of the band ; this will leave more room for those students who pursue other branches of music.

## DRAWING AND PAINTING.

The number of students who take lessons in drawing, is now, and has been for some years quite large, and their productions have always been among the most pleasing objects of interest to the visitors, at the annual Commencements. An artist of acknowledged merit, has been engaged for the coming year, who will give lessons in painting, and add a still greater impulse to the study of this beautiful art at Notre Dame.

## CHEMICAL LABORATORY.

This is one of the principal improvements to be undertaken during the coming year. It is designed to be complete in every respect, both as to the building itself and the material and apparatus necessary to illustrate the principles and laws of the Sciences of Chemistry and Mineralogy, and to supply the means by which Students may become thorough practical Chemists.

## THE NEW TELESCOPE.

The University has just been made the recipient of a fine refracting Telescope, presented by his Majesty the Emperor of France. It is one of the best instruments of its size ever manufactured, and when mounted in the new Observatory will give a great impetus to the study of Astronomy and the higher Mathematics. The focal length of the Telescope is over nine feet, and the diameter of the object glass six inches clear. There are two eye-pieces for land objects, one of seventy-five, and the other of one hundred power ; and five eye pieces for celestial observations, whose powers range from seventy-five to four hundred. The Observatory for the reception of this instrument will be built immediately, after the most approved models ; and, besides the Telescope, will be furnished with a transit instrument and a sidereal clock. Advanced students in Astronomy will be instructed in the use of the instruments, and have an opportunity to participate in the observations.

### THE GREAT BELL.

Not among the least of the attractions of Notre Dame for the next year will be the magnificent bell, Our Lady of the Sacred Heart, which was presented to the Church of Notre Dame, by the friends of the institution. Its weight is 13,000 lbs, and its diameter at the base is eight feet, eight inches. Morning, noon, and evening, and again at the hour of retiring to rest, the whole country round about will be filled with the grand aerial voice of one of the largest and finest bells in the New World.

### COURSES OF STUDY.

There exist at present in the University three prescribed courses of study ; the classical, in which students are graduated as Bachelors of Arts ; the Scientific, in which students are graduated as Bachelors of Science ; and the Commercial, in which students receive the diploma of Master of Accounts. These courses are complete and thorough in their several departments ; and every student on entering the University will be required to take up one of the prescribed courses and follow it until he graduates or leaves the University. The studies in each course have been arranged with care, and students will make more rapid and thorough progress in their education by following a regular plan of study, than by taking up at hazard whatever branches they may fancy at the beginning of each year.

 The particular attention of Parents and Guardians is called to this matter ; and they are requested to specify what course of study they desire their children to pursue. If the student is not yet advanced in age, and has a reasonable prospect of spending a few years at College, we would earnestly advise that he should pursue the Classical Course. There is no extra charge for Latin and Greek. But, in any case, each student will be required to follow one of the three regular courses, as laid down in the Courses of Study.

### WEEKLY BULLETINS.

It will be gratifying to parents and Guardians to learn that in future they will receive weekly in the Journal of the Institution a bulletin of several pages written by a special committee with the view to keep them informed of whatever may interest them at Notre Dame and St. Mary's. The weekly news of two such Institutions would fill up a Journal of no ordinary interest to those for whom it is intended as will appear from a few of the chief headings, viz: New Arrivals, Table of Honor, Health of the Institution, Celebrations, Visits of distinguished Personages, Extraordinary and Meritorious Compositions, or Progress, Monthly Honorable Mentions, Promotions, and whatever may give our patrons an insight into the life of their children or wards. If it be true that whatever affects a child always interests his parents, we may well say that in the course of a Collegiate year, there are a thousand items which our friends will like to read and communicate to their neighbors, whilst to our pupils it will be a pleasure and a new incitement to virtue, to know that their parents will read such a bulletin every week.
