Notre Dame University.

Early Days.

HE UNIVERSITY OF NOTRE DAME was founded more than forty-one years ago. Two years later, or in 1844, it was chartered by the Legislature of Indiana. At that time but very limited progress had been made in the development or settlement of the great region known as the Northwest. Towns were few in number and small in size.

Great stretches of timber land or forest were numerous, as were also swamps and marshes. While, as a rule, roads were bad, many of them were worse than bad, being practically impassable. Railroads were almost unknown in the West, and travelers were forced to rely upon stages, or private conveyances, to carry them from place to place. The transportation of heavy articles was generally left to ox-teams; and by the same primitive means immigrants were ordinarily constrained to travel with their families and personal effects to their new homes in the West.

Foundation of the University.

At that period the Rev. E. SORIN, now Superior-General of the Congregation of Holy Cross, had occasion to travel extensively through Michigan, Indiana and other States, in connection with his missionary labors. In 1842 he visited this locality, and recognized at once its many natural beauties. The Indians, who then lived here, gave him a hearty welcome. All things contributed to make him feel a special interest in the place. It seemed to him that in all his travels he had not seen a locality more picturesque and beautiful. The two lakes, glittering like jewels of nature in the sunshine, the higher ground surrounding them, and spreading off to the horizon in pleasing undulations, with groves and prairie tracts

admirably interspersed; and the St. Joseph river, with its tortuous channel and romantic scenery, skirting the landscape in the distance, combined to form a spectacle of extraordinary charm and loveliness. Appreciating all these advantages, the zealous and indefatigable missionary determined to found here an institution of learning that should be worthy of the locality, worthy of the exalted aspirations he cherished, and worthy of the great cause to which he had solemnly dedicated his life. In that spirit he established here, upon the most conspicuous elevation above the lakes, an educational institution that has expanded and grown with the years—an institution now known as the University of Notre Dame. Though the beginning was necessarily humble, nevertheless there has been an annually increasing growth in the usefulness, strength and influence of the institution. It is now well and, we trust, favorably known throughout the United States, while it has many friends in various other parts of the world. Yet, it is by no means content to rest upon the credit of its past achievements. Its officers, its Faculty, and all connected with it, are determined that it shall continue undeviatingly in its course onward and upward, ever directed and stimulated by the laudable motives and enthusiastic zeal of its venerated founder.

Location.

The University of Notre Dame is located just north of the enterprising and flourishing city of South Bend, in the northern part of the State of Indiana. Being about a mile and a half from the corporate limits of the city, its location is peculiarly eligible, inasmuch as it thus combines the conveniences and accommodations of the city with the salutary isolation, wholesome climate, and many natural beauties of the country. The University buildings are situated near the center of an extensive tract of land, comprising several hundred acres, and belonging to the Congregation of the Holy Cross. And thus is art afforded ample scope and opportunity to supplement the many natural attractions of the vicinity, or to train them to more striking manifestation. Indeed, this opportunity has already been improved to a great extent, as is amply indicated by the numerous walks through the grounds, the long lines

of shade trees, the skilfully trained shrubbery, and the admirably arranged promenades and recreation grounds for the use of students. The ground north and west of the University buildings slopes gently downward to the lake basin. The soil is somewhat sandy and porous. Hence it is practically impossible for water to accumulate in the vicinity and form stagnant pools. It is practically impossible for noxious exhalations to rise and vitiate the atmosphere. All things that can be mentioned appear to combine to render the climate of this locality exceptionally wholesome. Observation and experience alike testify to the peculiar eligibility of the location selected for Notre Dame.

Accessibility.

Notre Dame occupies a position nearly central with reference to the most important cities in the Mississippi Valley. For the sake of illustration, the circle may be indicated by naming Chicago, Milwaukee, Omaha, Des Moines, Kansas City, St. Louis, Louisville, Indianapolis, Cincinnati, Pittsburgh, Cleveland, Toledo and Detroit. It is therefore readily accessible to persons coming from, not only all parts of the Mississippi Valley, but also all parts of the Union. The railroads especially available are the Lake Shore & Michigan Southern, the Grand Trunk, the Great Western, and the Michigan Central. The road last named is connected with South Bend by a lateral line which runs southward from Niles, Mich., passing through the University grounds. Omnibuses, or private conveyances, by which visitors may expeditiously reach Notre Dame, are always to be found upon the arrival of trains at the stations of the other roads named.

Discipline.

The regulations in force to maintain discipline among the students are sufficiently liberal to meet the reasonable expectations of all who conscientiously seek to conduct themselves as gentlemen. To all such, the rules are very easy of observance. But as to any who so far forget themselves, or who are so ignorant of the requirements of gentlemanly deportment as to act and comport themselves otherwise, the rules are strict and coercive enough. Whenever a student habitually pursues towards the Faculty or his fellow-students,

for a given time, a particularly offensive course, or proves incorrigible, he forfeits all claims to the privileges of the University, and is subject to expulsion.

There is probably no great educational institution in the country in which students learn to know one another more intimately than they do at Notre Dame. Friendships are formed here that last through life. And it could hardly be otherwise, considering that the students are brought, in connection with their several duties, into daily and almost hourly contact. This fact, too, serves to emphasize the importance of requiring compliance with regulations calculated to render them courteous, upright, honorable, pure in expression, respectful to religion, and emulous to excel as students.

The more general rules are calculated to subserve the personal interests of the students, as viewed from the standpoint of their physical needs. They are required to rise at the same hour in the morning, and at the same hours during the day they have their meals. All are required to retire as early as 9.30 o'clock p. m., and the signal for rising and beginning the work of the day is given at 5.30 o'clock a. m. Three times daily, too, all are required to take necessary out-door exercise.

While students of all religious denominations are admitted upon an equal footing to participation in the privileges of the University, nevertheless, it is strictly a Catholic institution; and all students are required to attend divine services at stated times, as on Sundays and holydays. Persons who have noted with what rigor pupils in the various sectarian institutions are required to participate in daily worship, or "chapel exercises," can certainly not object to the discipline in this regard which obtains at Notre Dame.

Other regulations suggested by experience, and sanctioned by time as salutary, may be summarized as follows: 1. No branch of study shall be discontinued without the permission of the Director of Studies. 2. No student shall leave the University grounds without the permission of the President or Vice-President, or the person delegated to represent them. 3. The use of tobacco is peremptorily forbidden, except to such students of the Senior Department as have received from their parents written permission to use it. 4. Intoxicating liquors of all kinds are absolutely prohibited. 5. Any person who does damage to the property of the University shall

be required to furnish compensation for the same. 6. Students guilty of such misconduct as calls for reprehension may be required to perform certain tasks in addition to those devolving upon them in connection with their regular duties. 7. To guard against clandestine and improper correspondence the President reserves the right to supervise the correspondence of students. 8. Books, periodicals and newspapers received are subject to the approval of the Director of Studies.

Education.

The standing of Notre Dame among the educational institutions of the country is already established. It has struggled long and energetically to attain the creditable rank which it now holds. Sustained efforts are constantly making to raise the standard of studies. No pains or expense has been spared to secure the services of able, experienced and gentlemanly professors; and in this respect the authorities of the University have ground for believing that they have been especially fortunate. And it may be repeated that constant and steady progress has been made. The standing of the institution has advanced and kept unbroken pace with its material growth. The log-cabin, which was here dedicated to religion and education over forty years ago, gave place in time to a building of fair size and creditable appearance; and that, in its turn, to the magnificent edifice which was destroyed by fire in April, 1879; thus making way for the present imposing buildings—which, in size, symmetry, general attractiveness, and special appropriateness for the purposes they are severally designed to subserve, can creditably sustain comparison with structures of like nature in any part of the United States or the world.

Another fact, too, is worthy of attention: There is no educational institution anywhere that affords students more generous facilities than are enjoyed at Notre Dame for studying and making substantial progress in work. The comparative isolation of its location offers to the students immunity from distractions of every kind. The surroundings are all favorable to study—all tend to promote diligence in work. "Society" throws no allurements in the way of the student to tempt him from his duties. Association

with persons of depraved nature and bad habits is necessarily avoided. Free from distractions, and apart from all vicious associations, the mind of the student is quietly supplied with all the knowledge attainable in the schools; the judicious regimen and regular physical exercise insure health and strength; and the course of life pursued under the salutary discipline in vogue, serves to mould the character and establish habits that go to form an upright, moral, temperate and honorable man.

General Remarks.

Students are classified according to age as Seniors, Juniors and Minims. The Seniors range in age from 17 years upward. Their dormitories, study-hall, refectory, wash-rooms, etc., are in the eastern half of the University. The Juniors, whose ages range from 13 to 17, occupy the western portion of it. The Minims have a building exclusively for themselves. It is known as Minim Hall. The three departments to which students are thus assigned, viz., the Senior, Junior and Minim departments, are entirely separate from one another. Seniors and Juniors are seldom brought together except in a few of the Collegiate Course classes. The Minims have no direct intercourse with the students of the other departments. They have separate recreation grounds, dormitories, study halls, etc. The accommodations are ample for 500 resident students. The ventilation is exceptionally good. Scrupulous cleanliness is everywhere visible. The fare is abundant and wholesome. The buildings are heated by steam and lighted by gas, and hence there is practically no danger of fire. But to guard against all contingencies in that regard, there are on each floor exits and fire-escapes that insure absolute safety. The class rooms are large and well-lighted, as are also the rooms used by the literary, debating and other societies. The ornamental work in these rooms, as exhibited more especially in the painting and frescoing, renders them particularly attractive. There are several societies in the University, and they afford opportunity for ample practice in de-

bate, essay-writing, declamation, dramatic personations, etc. All who desire to join them may do so. Their meetings and exercises are not only interesting and instructive, but also a source of salutary diversion. The societies devoted more particularly to the cultivation of music and the drama have always been very popular, and many of their members frequently reach a higher degree of skill than mere amateurs are expected to attain. This is due to the fact that they are aided and stimulated by the sedulous co-operation and encouragement of professors specially qualified to impart instruction in music and the drama. Then, too, there are societies particularly calculated to promote the interests of religion and lead to a well-founded knowledge of Christian doctrine. By means of essays, debates, and the discussion of philosophical subjects, great readiness in argumentation, as well as felicity of expression, is attained. Boat clubs, base-ball clubs, etc., as well as the bars, swings, turning-poles and other accessories of the gymnasias, offer all requisite inducements to engage in salutary athletic exercises. The students of all the departments are under the supervision of their respective prefects or professors; and, while they enjoy all the freedom compatible with the requirements of good order, they are firmly held to an observance of the courtesies and obligations recognized by gentlemen in their intercourse with one another. But, then, there is very little occasion for the exercise of rigor in that particular; for, in nearly all instances, the students of Notre Dame come from homes in which they have been brought up under the salutary influence of careful and proper training. By precept and example they have been trained to recognize and observe the courtesies characteristic of gentlemen. And to confirm them as such is an important aim of the discipline in force at Notre Dame.

PROGRAMME OF STUDIES.

Preparatory Department.

The studies pursued in this department are preparatory to the Classical or Scientific Course. Students who have completed them receive a diploma admitting them to membership in the Freshman Class. Those entering the Course are expected to be able to read and write, besides having an elementary knowledge of Grammar, Arithmetic and Geography.

FIRST YEAR PREPARATORY.

FIRST SESSION.

I.—LATIN.

- 1 Grammar—As far as the end of Regular Conjugations.
—*Harkness.*
- 2 Exercises—Twenty-nine Lessons—New Latin Reader.
—*Harkness.*
- 3 Historia Sacra.

II.—ENGLISH.

- 1 Grammar—To Irregular Verbs.—*Harvey.*
- 2 Letter Writing.
- 3 Geography—General Geography of the World—Special Geography of the United States, including Outlines of Physical Geography.—*Sadlier.*
- 4 U. S. History—Through the Revolutionary War.—*Hassard.*
- 5 Penmanship.

III.—MATHEMATICS.

- 1 Arithmetic—To Fractions (exclusive), in Progressive Practical Arithmetic.—*Robinson.*

SECOND SESSION.

I.—LATIN.

- 1 Grammar—First Session's work reviewed, and Etymology completed.—*Harkness*.
- 2 Exercises—First Part, Introduction to Latin Composition.
—*Harkness*.
- 3 Fables—New Latin Reader.—*Harkness*.

II.—ENGLISH.

- 1 Grammar—Etymology Completed—General Rules of Syntax.

- 1 Plautus—Captivi, Trinummus and Rudens.
- 2 Quintilian—Book X.
- 3 St. Augustine—De Rhetorica Christiana.
- 4 Composition—Original Themes.

II.—GREEK.

- 1 Plato—Crito.
- 2 Pindar—Selections.
- 3 Euripides—Medea, and Iphigenia in Aulis.

III.—PHILOSOPHY.

- 1 Theodicy and Ethics.—*Fouin*.
- 2 Dissertation.

IV.—HISTORY.

- 1 Philosophy of History.—*Balmes* and *Schlegel*.

V.—NATURAL SCIENCES.

- 1 Geology—Dynamical and Lithological.—*Dana*.

VI.—MATHEMATICS.

- 1 Astronomy to Eclipses.—*Loomis*.

SECOND SESSION.

I.—LATIN.

- 1 Ancient Latin Literature—Entire Subject.—*Louage*.
- 2 Cicero—De Officiis and Tusculans.
- 3 Composition—Original Themes.
- 4 Terence—Andria and Adelphi.

II.—GREEK.

- 1 Plato—Apology.
- 2 Sophocles—Philoctetes and Antigone.
- 3 Aristophanes—Selections.
- 4 Ancient Greek Literature—Entire Subject.—*Louage*.

III.—PHILOSOPHY.

- 1 Philosophical Systems, and History of Philosophy.
- 2 Dissertations.
- 3 Lectures by Professor.

IV.—NATURAL SCIENCES.

- 1 Paleontology.—*Dana*.

V.—MATHEMATICS.

- 1 Astronomy—From the Eclipses to the end.—*Loomis*.

N. B.—During the four years of this course, students have an opportunity of attending Lectures on Historical, Literary, Philosophical and Scientific subjects.

Elective Studies.

Commercial—Book-keeping, Commercial Law.

Languages—French, German, Italian, Spanish, Hebrew.

Fine Arts—Painting, Drawing—(Figure, Landscape, Mechanical and Architectural.)

Music—Vocal and Instrumental.

Mathematics—General Geometry, the Calculus, Surveying.

Dogma.

II.—SCIENTIFIC COURSE.

NOTE.—*The preparatory studies are the same as for the Classical Course, except that Latin or Greek may be replaced by one of the Modern Languages.*

FRESHMAN YEAR.

FIRST SESSION.

I.—ENGLISH.

- 1 Composition—Through Figures of Rhetoric—Essays.—*Hart*.
- 2 Ancient History—To Partition of Alexander's Empire.—*Fredet*.
- 3 Ancient Geography—To correspond with the subject matter of History.—*Mitchell*.

II.—MATHEMATICS.

- 1 Algebra—(Completed) From Series (inclusive) to the end—University Algebra.—*Robinson*.
- 2 Geometry—Plane Geometry—Five Books.—*Loomis*.

III.—NATURAL SCIENCES.

- 1 Human Anatomy and Physiology—Structure and Mechanism of the Human Body—Nutrition.—*Mivart* and *Huxley*.
- 2 Botany—Structural Botany.—*Gray*.

IV.—LANGUAGES.

- 1 French, German or Latin*—(See Course of Modern Languages.

V.—DRAWING.

- 1 Linear Drawing.

SECOND SESSION.

I.—ENGLISH.

- 1 Rhetoric—From Figures (exclusive) to the end, with review of Composition.—Essays.—*Hart*.

* Students preferring to take Latin or Greek will follow the regular grades of the Classical Course.

- 2 Ancient History—From the Founding of the City of Rome to the end.—*Fredet.*
- 3 Ancient Geography—To correspond with subject matter of History.—*Mitchell.*
- 1 Geometry—Plane Geometry (Completed), Geometry of Space (Solid and Spherical).—*Loomis.*

III.—NATURAL SCIENCES.

- 1 Human Anatomy and Physiology—Nervous System and Hygiene.—*Mivart* and *Huxley.*
- 2 Botany—Systematic Botany.—*Gray.*

IV.—LANGUAGES.

- 1 French, German or Latin—(See Course of Modern Languages).

V.—DRAWING.

- 1 Architectural Drawing.

SOPHOMORE YEAR.

FIRST SESSION.

I.—ENGLISH.

- 1 English Literature—Entire Subject.—*Hart.*
- 2 Modern History—To the Crusades.—*Fredet.*
- 3 Elocution—Principles of Elocution and Voice Culture.—*Lyons.*

II.—MATHEMATICS.

- 1 Trigonometry—The Entire Subject, including Mensuration.—
—*Loomis.*

III.—NATURAL SCIENCES.

- 1 Geometry—(Conic Sections).—*Loomis.*
- 2 Zoölogy—Structural Zoölogy.—*Orton.*

IV.—LANGUAGES.

Elective Studies.

Languages.—Greek, Italian, Spanish, Hebrew. Fine Arts.—Painting, Drawing (Figure and Landscape). Music.—Vocal and Instrumental. Dogma. Ecclesiastical History.

Any Student in this Course is at liberty to take any of these Studies at any period of his Course, provided he can do so consistently with his regular studies. In addition to the regular recitations and practical illustrations in the Natural and Physical Sciences, Lectures are given throughout the Course by the Professors.

* It must be remembered that whichever of the Four Languages, viz.: French, German, Latin or Greek, is taken up at the beginning of the Freshman Year, must be continued to the end of the Course, or till satisfactorily known.

SPECIAL COURSES.

τὸ φῶς ἐν τῇ σκοτίᾳ φαίνει.

Special Courses.

I.—LAW.

Numerous changes have been made in this Department. Chief among them may be mentioned the extending of the course to a period of three years, the raising of the standard of studies to the most approved plane, and the partial substitution of the lecture system for the compulsory use of text-books. The result meets the expectations of all concerned. It may now be confidently claimed that no law school in the country offers students superior facilities for acquiring a thorough and practical knowledge of the law. Young men in this Department pass through a course of study that qualifies them to undergo the most searching examination for admission to the bar in any part of the Union. No special preparation is requisite for matriculating. Any student who is 17 years of age, and has a fair English education, is eligible. Young men may enter the Department as students at any time during the year; though, of course, it is more desirable to do so at the beginning of a session.

Methods of Instruction.

Instruction is given by means of daily lectures, with accompanying examinations, and the trial from week to week of moot-court cases. The order of procedure in dealing with these cases corresponds as closely as practicable with that followed in the trial of actual cases in the regular law courts. The lectures embrace the various branches of International, Constitutional, Commercial, Maritime and Criminal Law, together with Medical Jurisprudence, Common Law and Equity Pleading, Practice, Evidence, etc. Each candidate for a degree is required to prepare and submit to the Faculty a dissertation of at least 30 folio pages upon some legal subject, the selection of which is left to himself. It should be submitted at least six weeks before graduation, and it must be

satisfactory in substance and manner of treatment. The elementary text-books should, if practicable, be read collaterally with the lectures. However, these lectures are so full and comprehensive that they cover all subjects likely to arise in connection with even the most thorough examination. They deal with all living branches of the law, and the student who writes full notes of them and diligently studies the same, acquires a complete and reliable knowledge of its elementary principles. The decisions of the courts are invariably based upon these principles, and it is the aim of the course of instruction at Notre Dame so to impress them upon the mind that they are not likely under any circumstances to be forgotten. Their relations to one another are pointed out, the growth of subordinate principles from them is explained, and the construction upon them of actual or hypothetical cases emphasizes the important office they serve in furnishing a key to complicated questions of law.

While the lectures are complete enough to impart as general a knowledge of the law as students require for admission to the bar and practice in the courts, it is nevertheless deemed advisable to urge them to pursue collaterally a course of reading. The works here named are recognized and recommended as among the most serviceable and popular of

Standard Law Books:

Blackstone's and Kent's Commentaries, (the use of which is compulsory during the first year of the Course,) Walker's American Law, Reeve's or Schouler's Domestic Relations, Angell and Ames on Corporations, Parsons on Contracts, Washburn on Real Property, Story on Agency, Stephen's or Gould's Pleading, Greenleaf's or Wharton's Evidence, Story on Bailments, Parsons on Bills, Parsons on Partnership, Bishop on Marriage and Divorce, Wharton's Criminal Law, Willard's Equity, Story's Equity Pleadings, Cooley on Torts, Cooley's Constitutional Limitations, Schouler on Personal Property, Redfield on Wills, Wheaton's International Law, Story's or Wharton's Conflict of Laws, Benjamin on Sales, Parsons' Maritime Law, Washburn on Easements, Sedgwick on the Measure of Damages, Freeman on Judgments, Freeman on Executions, Tidd's Practice, etc.

Expenses.

All these books are available in actual practice, and consequently students need incur no special loss in purchasing such of them as they can find time to read. However, the matter of purchasing or not purchasing them is, to a great extent, left optional with the students themselves. It is not regarded as essential to read in connection with the lectures more than a few of the most elementary works indicated in the preceding list. The lectures are prepared with reference to that fact; and one of the objects in view in so preparing them is to place at a minimum figure the expenses incident to pursuing the study of law at Notre Dame. It does not admit of doubt that many worthy and promising young men in different parts of the country are deterred from gratifying a cherished ambition to engage in the study of Law by the apprehension that they cannot meet the expenses. They fancy that the single item of books demands an outlay of from \$150 to \$300, or more. But that supposition is erroneous. The study of Law can be pursued at Notre Dame without any noteworthy expense, aside from what is voluntarily incurred. In that particular, there is probably no university in the country that surpasses Notre Dame in the inducements offered to students. While the incidental expense is merely nominal, the accommodations, which include board, lodging, washing, etc., are excellent, and the course of study covers a period of almost ten months in the year. In other well-known institutions the annual duration of the professional courses is only six months. But it is hardly necessary to indicate more particularly in this connection the special advantages offered to students of the Law Department.

The Course of Studies.

The Law Course covers a period of three years. But in cases where students are entitled to advanced standing, by reason of previous study, they may be graduated in two years, providing they satisfactorily acquit themselves in an approved examination. Students of the advanced class have the opportunity of reviewing their studies by attending the exercises of the lower class. The authorities have been actuated by commendable motives in extend-

ing the Law Course to three years. In the first place, they recognize that the standing of the professions has been lowered by a too indiscriminate admission to them of persons of limited education and technical training of a narrow and circumscribed range. And to such persons, generally, a professional life offers numerous disappointments and temptations. It frequently proves to be a life of barren results, and that fact is usually discovered too late to admit of being readily remedied. Having made their choice, they find themselves, as a rule, subject to circumstances that forbid a change of occupation. It is also recognized that, as a rule, young men do not make amends for defects in their education after becoming involved in the activities of business. To guard against such disappointments and mistakes it is sought to make graduation in this Department a sufficient test of the education and professional qualifications of the student to assure him that he is making a proper choice, and to assure the profession that he may be admitted to its ranks without detracting from its dignity or compromising its honor.

With a view, therefore, to supplying young men with a good general education, as well as professional knowledge, all the departments and courses of the University are open to them. Without extra expense, they may enter the classes and pursue the studies of the Scientific and Classical courses. As they find time and have inclination they may study Mathematics, the Natural and Physical Sciences, Literature, Ancient and Modern Languages, etc., in connection with the Law. And thus the authorities of the University seek to meet the most exacting expectations of its friends, and the public generally, by assuring to students of this Department, not only qualifications of a high order in their profession, but also a sound general education.

Such are some of the considerations that have influenced the authorities to extend the Law Course to a period of three years. Students of this course mingle with the other students of the University, and, without distinction, have the same advantages, privileges and accommodations. They are likewise subject to the same rules of discipline. These rules have been adopted with reference to the acknowledged fact that a high moral standard is an important requisite to an honorable and successful career. They are calculated to shape the acts in accordance with such a standard, and inculcate, at the same time, a wholesome tone of moral and professional ethics.

II.—CIVIL ENGINEERING.

Candidates for admission into this Course must pass a thorough examination in the Chemistry and Physics of the Scientific Course and in the several branches of Pure and Mixed Mathematics, besides Grammar, Rhetoric, History, Geography, and Geology. The Course requires one year, as follows:

FIRST SESSION.

I.—DRAWING.

- 1 Theory—Shades, Shadows, etc.—Advanced Course in Perspective.
- 2 Practice—Topographical Drawing.

II.—APPLIED MATHEMATICS.

- 1 Civil Engineering—(Begun)—*Mahan*.
- 2 Lectures on Resistance of Building Materials, etc.
- 3 Pure Mathematics—Calculus reviewed.

SECOND SESSION.

I.—DRAWING.

- 1 Plans and Elevations of Engineering Constructions—Stone-Cutting.

II.—APPLIED MATHEMATICS.

- 1 Civil Engineering—Concluded.—*Mahan*.
- 2 Lectures on Roads and Bridges.
- 3 Hydraulics.

III.—COMMERCIAL COURSE.

It will be seen that the course requires two years' study for graduation; it includes arithmetic, grammar, letter-writing, geography, United States History, reading, orthography, penmanship, book-keeping, and Commercial Law,—in other words, a complete business education.

Considering the character and needs of the country, especially the great West in which we live, this Course is the most practical, and one of the most important that an educational institution can afford.

Those, therefore, who have not the time or the means to take a complete College Course, in the Classics and Sciences, would do well to enroll themselves in the Commercial Course. No plan of study is more injudicious than a hap-hazard selection of such studies as an inexperienced young man may fancy. The consistent training resulting from a fixed course of studies is of the utmost benefit to the student.

The Commercial Course at Notre Dame has always received the most careful attention on the part of the officers and Commercial Faculty of the University. Notre Dame claims to give the graduates of this Course a more complete business training than can be obtained in any commercial college. Believing that a business education includes something more than a mere knowledge of Book-keeping, and that a good education cannot be had in a few weeks, the authorities have extended this course over two years, the shortest time in which the studies necessarily used in business life can be mastered. Should a student desire during this period to pursue any other studies in which he may be interested, and for which he has time, he will have liberty to do so. General History and Linear Drawing are especially recommended to the students of this course. Many commercial students find it also to their advantage to take up the study of German or French, for which there are the amplest facilities. A talented and studious young man

may thus in the course of two years find himself in possession of a most valuable practical education, which will fit him to take his place in the front rank of educated business men.

JUNIOR YEAR.

BOTH SESSIONS.

- 1 Arithmetic—Same as First Year Preparatory in Classical Course.
- 2 Grammar and Letter-Writing—Same as First Year Preparatory in Classical Course.
- 3 Geography—The amount included in both Sessions of Collegiate Preparatory Course (Eclectic Series).
- 4 United States History—The amount included in both Sessions of Collegiate Preparatory Course.—*Hassard*.
- 5 Reading and Orthography.
- 6 Penmanship.

SENIOR YEAR.

FIRST SESSION.

- 1 Arithmetic—Same as First Session of Second Year Preparatory in Classical Course.
- 2 Grammar and Letter-Writing—Same as First Session of Second Year Preparatory in Classical Course.
- 3 Orthography.
- 4 Book-keeping—Theory and Practice—Initiatory Sets by Double Entry.—*Notre Dame System*.—*Tong*.
- 5 Penmanship.

SECOND SESSION.

- 1 Arithmetic—(Completed)—As in 2d Session Second Year Preparatory.
- 2 Grammar and Essays—Same as 2d Session of Second Year Preparatory in Classical Course.
- 3 Orthography.
- 4 Book-Keeping—Banking, Railroading, Steamboating, etc.—*Notre Dame System*.—*Tong*.
- 5 Commercial Law.
- 6 Penmanship.

The routine of study in the Course of Book-Keeping embraces the following, the whole being completed in one scholastic year:—Preparatory Instructions and Definitions; Initiatory Sets by Double Entry; 1st Series, embracing the Buying and Selling of Merchandise on Private Account; 2d Series, On account of others; 3d Series, Buying and Selling the same on Joint Account; 4th Series,

Importing and Exporting on private account, on account of others, and account of ourselves and others in company; 5th Series, Receiving and forwarding Merchandise, the Management and Settlement of Executors' Accounts, Buying and Selling, Remitting, Collecting, Discounting, Accepting and Paying Bills of Exchange, Banking—Private and Joint Stock—Steamboating, Railroading, Retailing by Double Entry, Farming, Mechanics' Accounts. Saturdays are devoted to Commercial Law. Particular attention is paid to the explanation of the Law of Negotiable paper.

IV.—MODERN LANGUAGES.

GERMAN.

FIRST YEAR.

FIRST SESSION.

- 1 Ahn's Rudiments of the German Language—One Hundred Exercises.
- 2 Exercises in Penmanship and Orthography.

SECOND SESSION.

- 1 Ahn's Rudiments of the German Language—From the 100th to the 200th Exercise.
 - Exercises in Penmanship and Orthography.
-

SECOND YEAR.

FIRST SESSION.

- 1 Ahn's Second German Book.
- 2 First German Reader.
- Exercises in Penmanship and Orthography.

SECOND SESSION.

- 1 Ahn's Second German Book.
 - 2 First German Reader.
Exercises in Penmanship and Orthography.
-

THIRD YEAR.

FIRST SESSION.

- 1 Ahn's Third German Book—75 Exercises.
- 3 Lescuebungen unn Erklaerung ausgewachtler Stuecke ans Bone's Lesebuch, erster Theil.
- 3 Deutche Grammatik—die Formenlehre.

SECOND SESSION.

- 1 Ahn's Third German Book—to the End.
 - 2 Bone's Lesebuch—Fortsetzung.
 - 3 Grammatik—Wiederholung und Fortsetzung der Formenlehre.
-

FOURTH YEAR.

FIRST SESSION.

- 1 Ahn's Fourth German Book.
- 2 Sprachliche und sachliche Erklaerung ausgewaehiter Stuecke aus Bone's Lesebuche, sweiter Thiel.
- 3 Deutche Grammatik,—die Satzlehre.

SECOND SESSION.

- 1 Ahn's Fourth German Book—To the End.
- 2 Lesen Erklaeren, Declamiren aus Bone's Lesebuch, zweiter Theil.
- 3 Grammatik—Wiederholung und Fortselzung der Salzlehre.
- 4 Compositions, and Introduction to German Classics.

N. B.—In the first two years the English, and in the last two the German language is employed as the medium of instruction.

FRENCH.

FIRST YEAR.

FIRST SESSION.

- 1 Fasquelle's Introductory French Course—Thirty Lessons.
- 2 De Fiva's Elementary French Reader—Twenty Pages.
- 3 Orthography.

SECOND SESSION.

- 1 Fasquelle's Introductory French Course—Thirty-nine Lessons—Regular Verbs.
 - 2 De Fivas' Reader—To the end.
 - 3 Orthography.
-

SECOND YEAR.

FIRST SESSION.

- 1 Fasquelle's French Course—Forty-five Lessons, and from page 261 to page 357 of Second Part of same work.
- 2 Buffet's Literature.
- 3 Letter-Writing.

SECOND SESSION.

- 1 Fasquelle's French Course—From 46th Lesson to end of First Part, from page 327 to end of Second Part—Irregular Verbs.
 - 2 Littérature Contemporaine—To end.
 - 3 Exercises in Composition.
-

THIRD YEAR.

FIRST SESSION.

- 1 Grammaire de Noel et Chapsal, with Exercises—Etymology.
- 2 Littérature Classique.
- 3 Conversations—Weekly Exercises in Composition.

SECOND SESSION.

- 1 Grammaire de Noel et Chapsal, with Exercises—Syntax.
- 2 Télémaque—For Translation.
- 3 Conversations and Compositions.

N. B.—Similar Courses exist in the University for the other Modern Languages—especially the Spanish, a knowledge of which is now becoming so useful to students from the southern and south-western States and Territories.

MISCELLANEOUS.

Science Hall,

NOTRE-DAME, IND.

Miscellaneous.

Post-Graduate Course.

The Students in this Course occupy themselves with Philosophy, History, and the Natural and Physical Sciences. Law, Medicine, and Civil Engineering are optional studies of the Course.

Civil Engineering.

The Course of Civil Engineering has been established of late years, and it affords advanced students the opportunity of fitting themselves for the practice of this eminent profession.

Natural and Physical Science.

Students wishing to pursue a Scientific Course will find every facility for doing so at Notre Dame. Fully aware of the demands of the age, the authorities have spared neither pains nor expense to meet all the requirements of the student of the Physical and Natural Sciences.

The Physical Cabinet

contains an extensive collection of apparatus of the latest style and most improved construction. Several of them were on exposition at the Centennial, and obtained for those who exhibited them the highest awards given for physical instruments. Among these may be mentioned König's Apparatus for analyzing sound, electrical and optical apparatus by Edgerton, instruments for projection, etc. Besides the apparatus designed for subjective use and for experimental purposes in the class-room, there is a large number of select instruments for lecture purposes, especially for illustrating those interesting branches of Physics, Acoustics, Optics, Magnetism, and Electro-Magnetism, and Statical and Dynamical Electricity. In

Acoustics, the instruments for studying the origin and nature of sound, the existence and interference of vibrations, together with the beautiful apparatus designed by Lissajous, König and others for the observation of sonorous vibrations by the optical and stroboscopic method, and by means of manometric flames, are of the most improved character. The instruments for illustrating Optics are also most select and complete. Besides the stereopticons, vertical lanterns, microscopes, spectrosopes, etc., for projection, there is a large number of slides, transparencies, and preparations for illustrating the various branches of Physical and Natural Science, Astronomy, Architecture, Art, etc. The apparatus for the study of spectrum analysis—including a fine Heidelberg spectroscope, a collection of Plücker tubes for obtaining the spectra of gases and vapors—prisms, lenses, and other apparatus for projecting spectra on the screen, as well as those used in studying the phenomena of the double refraction and polarization of light, should also be mentioned. For studying statical and dynamical electricity, magnetism, and electro-magnetism, there is a large number of electrical machines, and batteries of different kinds, coils, helices, magnets, electro-magnets, galvanometers, thermo-electric multipliers, Geisler tubes, rotators, magno-electric and electro-magnetic machines, telegraph apparatus, telephones, dynamo-electric machines and lamps, of the Vanderpoel and Maxim types, etc.

The Chemical Laboratory

is fitted up with all the appliances necessary for the successful study of General Chemistry and Chemical Analysis. As in the Physical Cabinet, additions are constantly being made to the Laboratory, and it will be the object of the authorities to make it in all the details as complete and perfect as possible.

The Museum of Natural History,

embracing large and rare geological, mineralogical, zoölogical and botanical collections, is as complete in all its arrangements as the student could desire.

The Mineralogical Cabinet

contains a large collection of minerals from all parts of the world.

It is especially rich in specimens illustrating the crystalline structure, modes of occurrence, etc., of the various ores and minerals, and embraces a large number of magnificent specimens of pellucid quartz crystals, cairngorm stone, amethyst, agate, jasper, sardonyx, chalcedony, geodes of various kinds, calcite of all the principal crystalline forms, amazon stone, fluorspar, mica, tourmaline, beryl, dendrite, selenite, garnet, the various ores of gold, silver, iron, copper, lead, zinc, as well as of the other metals of rare occurrence. For the practical study of the physical properties of minerals the student of mineralogy will find in this collection all he could wish for. Besides this, there is also a rich store of specimens for blow-pipe analysis.

The Geological Cabinet.

is very complete, both in the number and character of the specimens it contains. It embraces fossils of all the geological formations, both of this country and Europe. Among them are many unusually well preserved, and of more than ordinary size. In a word, it is furnished with all the specimens that the student needs to make the study of Geology easy and interesting.

Popular Lectures on the Physical and Natural Sciences

form one of the most interesting features in connection with the Scientific Department. These are intended mainly for those students who cannot or do not wish to take up the Scientific Course, but who nevertheless desire to have a general knowledge of the leading facts and principles of the Physical and Natural Sciences. All these lectures, especially those on Physics and Chemistry, are illustrated experimentally, and, to attain most effectually the object in view, the best of apparatus and specimens, especially those designed for projection, have been secured.

Languages.

It is the desire of the authorities of the University of Notre Dame to promote the study of the foreign languages, the use of which is so frequent and necessary for business or scientific purposes.

The German Language—the classes of which are so numerous

attended—has been taught by five Professors during the past scholastic year. The number of German students attending the University is becoming greater every year. The study of French is recommended to all students of the Collegiate Course. The course of Spanish will receive special attention in future, and other modern languages may be taught when required.

Telegraphy.

This branch invites the special attention of the students of the Commercial Course. The Telegraph Department is fully organized, and is placed under the management of a skilful electrician. Notre Dame is in direct communication with South Bend and the rest of the world by electric wires.

Phonography or Short-Hand,

of which Dr. Johnson said “its usefulness is not confined to any particular science or profession,” and which, with a good education, is a profession in itself, has been taught for many years at Notre Dame. A knowledge of this useful art, besides being of incalculable benefit in the higher branches of education, will also be found useful in professional life. By its aid, notes of readings and lectures can be taken with the rapidity of thought and vocal utterance. Phonography has of late come into almost general use in the mercantile community, to expedite correspondence, etc.; a knowledge of the art will therefore be a recommendation to its possessor for positions of confidence and trust, and thus perhaps become a stepping-stone to fortune.

Elocution.

No educational institution in the country surpasses Notre Dame in the facilities offered to students for acquiring proficiency in elocution. The instruction is thorough, the exercises are practical, and the subjects of study exhibit judicious variety. These exercises are held in “St. Cecilia Hall,” which is peculiarly adapted

Academy of Music;

for the purpose, being eligibly situated, large in size, and elegantly furnished. They constitute an important part of the studies of young men who strive to cultivate with success literature, oratory and the dramatic art. The approved methods of stimulating and developing the natural elocutionary powers are called into requisition as occasion seems to warrant. And to this end the drama receives a due share of attention. From time to time an appropriate tragedy or comedy is rendered by students, on the stage of the new Music Hall, with all the accessories and appointments customarily in use in connection with dramatic performances. Four public exhibitions are given during the year, while public literary exercises are held seven times in the same period. An oratorical contest is one of the notable features marking the close of the year. For the purpose of encouraging and stimulating students to put forth their best efforts, premiums and gold medals are offered to those who most distinguish themselves. When all these things are duly considered, there need be no hesitation in repeating that, "No educational institution in the country surpasses Notre Dame in the facilities offered to students for acquiring proficiency in elocution."

Anatomy and Materia Medica.

Young men desiring to prepare for the Medical profession will find opportunities to do so at Notre Dame. The Course of Studies in this Department embraces *Materia Medica*, *Anatomy*, and *Surgery*. As a preparatory Course, that which is given here, under L. NEYRON, M.D., a graduate of the *Ecole de Médecine*, Lyons, leaves nothing to be desired.

Drawing and Painting.

The University, which is becoming every year more widely and favorably known as an art centre, enjoys ample facilities for imparting instruction in this branch. It possesses a large number of models in all sorts of drawing, a fine Studio, and qualified and zealous teachers of the art. The eminent artist Signor Luigi Gregori, of Rome, is still in charge of this Department.

Music.

This Department is complete in all its appointments. It has able Professors, and is divided into classes on the regular Conservatory system. An Orchestra of fifteen pieces, with an excellent Quartette, and a Brass Band of twenty-five instruments, are some of the leading features of the Musical Department.

Vocal Music, to which special attention has been paid, and which has contributed so much to the pleasure of the students during the past few years, will receive even more careful attention in future, and it is hoped that this branch will become every year more popular.

Astronomical Observatory.

A temporary Astronomical Observatory has been erected, in which the fine instrument presented by the Emperor Napoleon has been placed. The studies of the class of Astronomy are thus rendered practically interesting.

Reading-Rooms.

The lower floor of the new Music Hall is divided into large and neatly furnished Reading Rooms for the benefit of the Senior and Junior departments. These Reading Rooms are supplied with books and periodicals from the library, and students have access to them during the hours of recreation.

The Lemonnier Library

continues to receive contributions from liberal friends, and now numbers over 17,000 volumes. A Reading-room has been opened in connection with the Library, in which the following periodicals are to be found on file, viz.: Atlantic Monthly, Lippincott's Magazine, Harper's Magazine, Cornhill Magazine, Macmillan's Magazine, Geological Magazine, Blackwood's Magazine, International Review, North-American Review, British Review, Edinburgh Review, London Review, Westminster Review, Contemporary Review, Fortnightly Review, The Nineteenth Century, Le Correspondant, Le Contemporain, Revue Catholique, Athenæum, Academy, Scientific American, Science Review, Dublin Review, Lamp, Catholic Quarterly, Catholic World, London Month, Alt und Neue Welt, Der Hausschatz, besides a large number of dailies and weeklies. The members of the Library Association desire to give their Alma Mater a collection of books which can stand comparison with those possessed by any other educational establishment of the United States; therefore they call on the friends of the University to assist them by donations of books, pamphlets, periodicals and manuscripts. All contributions should be addressed to the Librarian of the Lemonnier Library, Notre Dame University, Notre Dame, Indiana.

Minims' Hall.
(NOTRE-DAME, IND.)

Minim Department.

For the care and training of boys under the age of thirteen, there has been established a Department to which the most scrupulous attention has always been paid by the College authorities; it is known as the Minim Department, and has ever been one of the greatest objects of interest to the Faculty as well as to all persons visiting Notre Dame.

Thorough and comprehensive instruction in all the elementary branches of an English education is here imparted, together with a fundamental knowledge of Latin, French and German. Vocal Music, Violin, Piano and Drawing form no extra charges—a concession made by the authorities in order to develop this Department, and thereby extend the advantages it affords for the mental, moral and social culture of the young. The pupils of this Department are taught by Sisters of the Holy Cross, under whose maternal and tender care they pass nearly the entire day. During the hours of recreation, and while in the refectory and dormitory, they are under the charge of kind and efficient Prefects.

Discipline.

The following is the order of the day: Rising, at half-past six; toilet, etc.; seven, breakfast, after which there is a short time given for exercise in the Campus; half-past seven, study; half-past nine, recreation and lunch; ten, study; a quarter to twelve, toilet; twelve, dinner, followed by recreation; half-past one, study; half-past three recreation and lunch; half-past six, supper and recreation; half-past eight, retiring. From this it may be seen that while the Minims devote never less than six hours a day to study, they are never more than two hours in succession in the class-room. The recreation and exercise in the fresh air, between each two hours of study, unbend the mind and prepare the boys to return to their classes refreshed and ready for work.

The Minims are always under supervision—during the hours of

recreation, as well as in the class-room and study-hall. The presence, however, of the Prefects, is far from being a restraint on the amusements of the boys; for while it is the duty of the Prefects to insist that their young charges shall always keep within the limits of the strictest propriety, they, at the same time, take part in all sports, organize games, and do everything in their power to foster a love of healthy exercise. The play-ground consists of a fine, level, four-acre field, well supplied with turning-poles, swings, ladders, rings, parallel bars, and all other necessary gymnastic apparatus. That the boys make good use of them can best be seen from their healthy, happy appearance, which invariably attracts the notice of visitors. Few places, if any, present a more animated appearance than the Minims' Campus at recreation hours. Connected with the play-ground is a fine brick play-hall, 160 feet long, heated by steam. There the boys play in rainy or cold weather. In this building is one of the finest hand-ball alleys at Notre Dame. Adjoining the grounds is a large orchard to which the Minims have access in proper season. They are allowed so many privileges of a similar nature that, among the students of the other departments, they are often pleasantly spoken of as the "privileged class of the little College world." They write home once a week. Particular care is taken to foster respect and affection for parents. Though the toilet is made regularly before meals, yet, to secure perfect neatness, free access may be had, whenever necessary, to the wash-room—which is supplied with cold and warm water. The Sisters preside at the toilet; they clean and mend the clothing, see to all the needs and to the comfort and convenience of the Minims. Baths are taken every Saturday. Underclothing is changed regularly twice a week. Great care is taken that the boys be neatly dressed, and that the clothing be suitable to the season. As the Sisters take entire charge of all these details, boys as young as six years of age are received. They are separated from the larger Minims and enjoy all desirable privileges.

Societies.

There are two societies in the Minim Department: that of the Guardian Angels of the Sanctuary, which has for its object to supply servers for the Church offices; and the Sorin Association, which

has been established with a view to give the students a start, as early as possible, in Elocution. The Society is in charge of one of the Professors, who finds it a pleasant duty to draw out the talent of these promising young orators. Meetings are held once a week, after school hours. These meetings are a source of pleasure as well as of profit. The members prepare original compositions, deliver declamations, are trained to debate, etc. Only the best behaved and more advanced in studies are admitted to membership. To encourage this young Literary Society a Gold Medal is annually awarded at Commencement, for Elocution, to the most deserving member.

General Remarks.

The discipline to which the Minims are subject is much milder than that which is suited to students more advanced in age. Recourse is scarcely ever had to punishment. Those in charge endeavor to govern by kindness and gentleness, and by appealing to the boys' sense of honor. The names of all whose conduct and application to studies are satisfactory appear under the heads of Roll of Honor and Class Honors in the *Scholastic*, a paper published weekly at Notre Dame. To find his name mentioned in these rolls is found to be as great a reward for the deserving pupil, as its non-appearance is a punishment for the undeserving.

Then, again, there is a Gold Medal awarded at the end of two full years to all whose deportment has been generally satisfactory during that period. As this fact is made known to the Minim immediately after his entrance, he generally endeavors to shape his conduct with a view of receiving an "Honor." The greatest care is taken to form their young hearts to habits of virtue, and to inculcate the practice of refined manners, and it is no doubt to the fact that they show themselves at all times so polite and refined in their habits that they are familiarly known throughout the Institution as the young Princes of Notre Dame—a title affectionately bestowed upon them by the venerable Founder of the University.

Not the least of the advantages enjoyed by the Minims is their complete separation from the larger students. An elegant and commodious building, known as the Minims' Hall, affording ample accommodation for over one hundred students, is devoted to their

use. It is four stories in height, ninety-five feet long, and forty-five wide; heated by steam, lighted by gas, supplied with hot and cold water. The ceilings in the Study Hall, Class Rooms, and sleeping apartments are fifteen feet high. The windows are large and numerous, affording abundant light and ventilation. The Study Hall commands a charming view from each of its eleven large windows. It is tastefully decorated with statuary, beautiful pictures, choice plants and beautiful flower caskets, etc. Besides the pleasure the Minims derive from studying in this bright, beautiful hall, their habits and tastes are cultured by coming into contact with such refining objects. Fronting the building is a handsome park, which with its sparkling fountain, rare trees and flowers, adds not a little to the beauty of the Minims' Hall, as well as to the happiness of the Minims.

These remarks, which have been made to satisfy parents and others who frequently write for more detailed information, will show that while the Minims have every possible advantage to aid them in acquiring a good, solid education, they have also a most happy home where they enjoy the same ease and freedom as they would under the care of their mothers.

MINIM DEPARTMENT.

RELIGIOUS.

Society of the Holy Childhood.

The primary object of the Society of the Holy Childhood, of which this Society forms a part, is to offer an opportunity to children throughout the Christian world to contribute their share towards the redemption of pagan children from the darkness of heathenism. The monthly contributions are small, but the aggregate is considerable—while thousands of children are by this means trained up to habits of charity.

St. Mary's Academy.

One Mile West of the University of Notre Dame.

CONDUCTED BY THE

Sisters of the Holy Cross.

ALL the branches of a solid and complete education are taught at St. Mary's. The course is thorough in the Classical, Academical and Preparatory Departments.

No extra charges for French or German, as these Languages enter into the regular course of studies.

The Musical Department is conducted on the plan of the best Conservatories of Europe.

In the Art Department the same principles, which form the basis of instruction in the Art Schools of Europe are embodied in the course of Drawing and Painting. Pupils in the Schools of Painting or Music may pursue a special course.

Those who have passed creditably through the Academic and Classical courses receive the graduating Gold Medals of these Departments.

Graduating Medals are awarded to the pupils who have pursued a special course in the Conservatory of Music or in the Art Department. Prize Gold Medals are awarded in the following courses: German, French, Christian Doctrine, Painting, Drawing, and Domestic Economy in the Senior Department; and for Polite and Amiable Department both in the Senior and Junior Departments.

Number of Teachers engaged in the Preparatory, Academic and Classical Departments, 14; Modern Languages, 6; Drawing and Painting, 5; Instrumental Music, 10; Dressmaking, Plain and Fancy Needlework, 7.

Simplicity of Dress enforced by rule.

MOTHER SUPERIOR,

St. Mary's Academy, Notre Dame P. O., St. Joseph's Co., Ind.

The proximity of Notre Dame and St. Mary's is a great convenience to parents having children at both institutions when they visit their sons and daughters. An omnibus line between South Bend, Notre Dame, and St. Mary's, connects regularly with all trains arriving at South Bend.

The Notre Dame Scholastic

is the title of a neat 16-page paper devoted to the interests of the students, which is published at the University every week during term time. This Journal opens a field for young writers, who might otherwise, for want of proper medium, allow their talents to remain inactive.

THE SCHOLASTIC contains articles of an instructive and literary character, interesting Biographical Sketches of men of note in Literature, Science, Painting, Sculpture, etc., Essays, Poetry, Notes on Science, Art, Music, and Literature, Notices of new publications, etc., etc.

In addition to its literary features, THE SCHOLASTIC has a local importance for students, their parents, and all who have attended class at the University in time past, on account of the weekly summary of events transpiring at Notre Dame, personal notices of former students, weekly Rolls of Honor, Class Honors, lists of excellence, etc., which appear in its columns every week. Reports relative to the arrangement of classes, the promotion of the more talented and energetic students, etc., also find a place in this paper, and keep parents and others informed on all that concerns their children and friends.

It will be the endeavor of the Editors, during the coming year, to merit the encouragement given the paper in the past, and the encomiums bestowed on it by the press in general.

Donations to the Museum.

A CARD OF THANKS.

The Curator of the Museum most gratefully acknowledges donations during the past year, of valuable specimens of Natural History from the following persons:

Mr. and Mrs. L. H. Scott, Chihuahua, Mexico, a valuable collection of ores from the mines of Chihuahua.

Rev. F. X. Shulak, S. J., Chicago, Ill., a miscellaneous collection of minerals from various parts of the country.

Col. A. Boone, La Veta, Colo., a collection of silver ores from the Spanish Peaks.

Col. Elmer Otis, U. S. A., a number of interesting specimens from Dakota.

Bro. John Chrysostom, C. S. C., some rare and valuable specimens from the Pacific Coast.

Mr. Tingley S. Wood, of Leadville, Colo., a typical collection of the minerals of Leadville.

Mr. T. W. Smith, Gen. Supt., and Mr. W. C. Melville, Ass't. Gen. Freight Agent, of the A. & P. Ry., Albuquerque, N. M., a valuable collection of petrifications from Arizona.

Mr. S. H. Lucas, Santa Fé, N. M., some choice turquoises and garnets.

Mr. J. M. Studéaker, South Bend, Ind., a collection of gold and silver ores from Colorado and the Black Hills.

Master F. Hagenbarth, Challis, Idaho, ores of silver from Idaho.

Mrs. S. S. Austin, Denver, Colo., specimens of Natural History from Australia.

Mrs. Gov. Gilpin, Denver, Colo., specimens from New Mexico, Jno. Cassidy, M. D., South Bend, a large and unique specimen for the geological Cabinet, from Mich.

Mr. O. Spencer, Denver, Col., silver and copper ores.

Mr. J. Fenlon, Leavenworth, Kan., minerals from Sonora, Old Mexico.

Mr. Jno. Hogue, Albuquerque, a collection of specimens of Jasper wood from Arizona.

Rev. Fr. Gleason, C. S. C., gold ores from the Black Hills.

Mr. Geo. Zahm, Socorro, N. M., specimens from New Mexico.

To other kind friends, also, who have in various ways rendered him material aid in increasing his collections, the Curator returns his most sincere thanks.

An Appeal.

One of the greatest losses occasioned by the disastrous fire that laid the College buildings in ashes was the almost total destruction of the

MUSEUM OF NATURAL HISTORY.

All the valuable collections of years were consumed,—only a small collection of specimens that happened to be in an out-building being spared. In order to repair this loss as far and as speedily as possible, the Curator of the Museum respectfully solicits the aid and co-operation of the friends and old students of Notre Dame,—of those especially who live in mining districts, or where specimens of Natural History can be readily obtained. He would be particularly obliged for specimens of

MINERALS,

FOSSILS,

SHELLS,

CORALS,

ALCOHOLIC PREPARATIONS,

INDIAN RELICS, ETC., ETC.

All collections, however small, will be thankfully received and duly acknowledged in the columns of the *Scholastic*. All contributions should be addressed to
